Under the Programme described in this prospectus, HANETF MULTI-ASSET ETC ISSUER PLC (the “**Issuer**”) may from time to time issue exchange traded securities (the “**Securities**”) linked to and secured by various underlying assets which qualify as eligible underlyings under the Programme, such as, *inter alia*, shares, indices, exchange traded products (such as funds and debt securities) and certain predetermined cryptocurrencies on the terms set out herein as completed by the final terms in respect of the relevant Securities (the “**Final Terms**”).

This document constitutes a base prospectus within the meaning of Article 8(1) of Regulation (EU) 2017/1129 of the European Parliament and of the Council of 14 June 2017 (the “**Prospectus Regulation**”) of the Issuer (the “**Prospectus**”) and has been approved by the Swedish Financial Supervisory Authority (*Sw. Finansinspektionen*) (the “**SFSA**”) as competent EU authority thereunder. This document also constitutes a base prospectus for the purposes of the UK version of Regulation (EU) No 2017/1129, which is part of UK law by virtue of the European Union (Withdrawal) Act 2018 of the UK (the “**UK Prospectus Regulation**”) and will be approved on or around the date of the Prospectus by the Financial Conduct Authority (the “**FCA**”), as competent UK authority thereunder. This Prospectus will be published in electronic form on the website of the Issuer <https://etp.hanetf.com/multi-asset-etc-documents>. This Prospectus may be supplemented or replaced from time to time to reflect any significant new factor, material mistake or inaccuracy relating to the information included in it.

The Prospectus permits offers of Securities to the public in Sweden and/or an admission to trading of such Securities on a regulated market in Sweden. The Issuer has requested the SFSA to notify the approval of the Prospectus in accordance with Article 25 of the Prospectus Regulation to Austria, Belgium, Finland, France, Germany, Italy, Ireland, Luxembourg, the Netherlands, Poland, and Spain with a certificate of approval attesting that this Prospectus has been drawn up in accordance with the Prospectus Regulation. Investors should make their own assessment as to the suitability of investing in the Securities. Securities are complex, structured products which may involve a significant degree of risk and may not be suitable or appropriate for all types of investors. It is advisable that any person wishing to invest seeks appropriate financial, tax and other advice from an independent financial advisor with appropriate regulatory authorisation and qualifications and an investment in Securities is only suitable for persons who understand the economic risk of an investment in Securities and are able to bear the risk for an indefinite period of time. A prospective investor should be aware that the value of their entire investment or part of their investment in Securities may be lost. Prospective investors should be aware that the price of the underlying asset(s) by which the Securities are secured can demonstrate high volatility and consequently the value of the Securities may be extremely volatile.

The Securities are not shares or units in collective investment schemes within the meaning of Swiss Collective Investment Schemes Act of 23 June 2006 (“CISA”). They have not been approved by the Swiss Financial Market Supervisory Authority (“FINMA”) and are not subject to its supervision. The Securities are not issued or guaranteed by a supervised financial intermediary within the meaning of the Swiss Financial Infrastructure Act (“FinIA”).

This Prospectus is valid for twelve months and may be supplemented or replaced from time to time to reflect any significant new factor, material mistake or inaccuracy relating to the information included in it. Any obligation to supplement a prospectus in the event of significant new factors, material mistakes or material inaccuracies does not apply when a prospectus is no longer valid.

1.3.1 Underlying Assets – Cryptocurrencies

The term Cryptocurrencies comprises all digital assets whose origin is derived from a blockchain, including digital currencies, digital commodities provisioning raw digital resources or digital tokens provisioning finished digital goods and services.

In this context, a blockchain can be described as a special type of database, where transactions are not governed by a single entity. Instead, the entire transaction history is recorded in a decentralised, distributed ledger. The key aspect behind blockchain is that processes are not completed by one, but by many computers, simultaneously. Trust in Bitcoin, for instance, is secured through a decentralised, immutable ledger that is not run by a single company or government but by an independent community of computers all around the world. All computers are in the same network, called a peer-to-peer network. Inside the industry, this model is often called a “distributed trust model”.

The present definition of Cryptocurrencies refers to their potential of being a digital storage or representation of value. Cryptocurrencies are usually not issued by a central bank or another public authority and may *inter alia* be accepted by natural or legal persons as means of payment. Cryptocurrencies can be stored, transferred, or traded electronically. Cryptocurrencies provide for a vast range of use case beyond conventional financial transactions. These use cases include, for instance, smart contracts, which have been popularised together with the ERC20 standard for tokens, on the Ethereum blockchain. They build the technological foundation of blockchain-based assets, such as utility tokens, which convey holders the right to use decentralised applications (DApps) or preferential access to the services of crypto-assets ecosystems, online games and security tokens.

On or around the Trade Date of a Class of Securities, Cryptocurrencies forming the Underlying Asset(s) of that Class of Securities must consist of the ones that are among the top 125 digital currencies with the highest market capitalisation on or around the Trade Date of the relevant Class of Securities (each an “**Eligible Crypto Underlying**”).

The assessment of the Cryptocurrencies to be included shall be based on: (1) the data regarding market capitalisation in US Dollar (“USD” or “\$”) as published on coinmarketcap.com; (2) if no current data is available as per (1), the most recent set of such data published on coinmarketcap.com; or (3) if (a) no current data as per (1) above is available and (b) no set of such data as per (2) is readily available for the public, the table set out in the Annex to this Prospectus (which reflects such data as of 11:29:30 am on 27 October 2023), in each case, subject to any limitations pursuant to applicable local legal and regulatory requirements:

The data regarding market capitalisation and price per unit in USD reflects such data as of 11:29:30 am on 27 October 2023. Such data is not indicative of future performance of the Securities, any single Eligible Crypto Underlying or any basket thereof. Third party source: coinmarketcap.com. This price source does not form part of this Prospectus and has not been scrutinised or approved by the SFSA or FCA.

A description of each individual Eligible Crypto Underlying is available free of charge at <https://cryptocompare.com> by selecting the individual Eligible Crypto Underlying, e.g.: <https://www.cryptocompare.com/coins/btc/overview/USD>. Each Eligible Crypto Underlying is presented with a description of features, technology and various market data. This website does not form part of this Prospectus and has not been scrutinised or approved by the SFSA or FCA.

1.3.2 Underlying Assets – Shares

Shares as a class of Underlying Assets comprise company shares of any type listed or admitted to trading (a) on (i) a regulated market within the meaning of Article 4(1) no. 21 of MiFID II, as amended or (ii) a stock exchange that is regulated and supervised as such by a competent authority in its relevant jurisdiction (each, a “**Regulated Stock Exchange**”) or (b) on a multilateral trading facility within the meaning of Article 4(1) no. 22 of MiFID II, as amended (“**MTF**”) or (c) an alternative trading system as defined in title 17, §242.300 (a) of the United States Code of Federal Regulations (“**ATS**”).

As used herein, the term Shares shall also comprise depositary receipts, such as American depositary receipts, European depositary receipts and global depositary receipts, which are instruments that represent shares in companies trading outside the markets in which the depositary receipts are traded.

The respective Final Terms of each Class of Securities will set out the specific Share(s) for such Class of Securities including the respective securities codes, whereby item 11 of Part A of the Final Terms of the relevant Class of Securities will specify the name as well as the securities codes and the (primary) Regulated Stock Exchange of the Shares and item 7 of Part B of the Final Terms of the relevant Class of Securities will set out details of where information about the past and future performance of the Underlying Asset(s) and its/their volatility can be obtained free of charge.

1.3.3 Underlying Assets - ETPs

ETPs as Underlying Assets comprise all types of collective investment undertakings, including (but not limited to) mutual funds, exchange traded funds (“**ETFs**”), open ended funds and closed ended funds and/or debt securities such as exchange traded commodities (“**ETCs**”), exchange traded notes (“**ETNs**”) and exchange traded instruments (“**ETIs**”), whereby (i) only ETPs listed or admitted to trading (a) on a Regulated Stock Exchange or (b) on a MTF or (c) on an ATS or (ii) non-listed collective investment undertakings where subscriptions and redemptions are done directly with the relevant collective investment undertaking will be permitted as Underlying Assets.

ETPs to be used as Underlying Assets under the Programme may give exposure to the following conclusive list of asset classes: (i) equity instruments, (ii) fixed income instruments such as (a) bonds issued by corporate issuers (such as euro medium term notes or structured notes) or by governmental and supranational bodies (government bonds), (b) fixed income interest rate swaps, (c) bank deposits, (d) certificates of deposits and (e) bank loans, (iii) commodities (physically or index linked / futures), (iv) emissions allowances, (v) foreign exchange rates (FX), (vi) volatility instruments, (vii) short instruments, (viii) leveraged instruments, (ix) covered call instruments and (x) combinations of various assets of the aforementioned asset classes (multi-asset instruments).

To the extent ETPs as Underlying Assets are not listed on a Regulated Stock Exchange but are either (i) listed on a MTF or an ATS or (ii) unlisted collective investment undertakings, such ETPs are only eligible to be used as Underlying Asset under the Programme, if, as a minimum, information on the following aspects relating to the ETP will be available at least on a weekly basis: (i) the current price level of the ETP, (ii) continuous information on the past performance of the ETP and (iii) the volatility levels of the ETP.

1.3.4 Underlying Assets – Baskets

Baskets as Underlying Assets may be exclusively comprised of various Eligible Programme Underlyings. The composition of any such Basket will be determined prior to the issuance of the relevant Class of Securities and will either remain unchanged or may be subject to rebalancing of the respective components.

1.3.5 Underlying Assets - Indices

Indices as Underlying Assets will always be comprised of various Eligible Programme Underlyings. The composition of any such Index depends on the respective rules and methodology governing the relevant Index, whereby only Indices that have published their index rules and index levels at regular intervals free of charge online will be permitted as Underlying Assets. Depending on the respective rules and methodology of the relevant Index, the composition of the relevant Index may either be unchanged or may be subject to rebalancing of the respective components.

For the avoidance of doubt: Where the Securities provide exposure to an Index, the assets which constitute components of such Index may at any time exclusively be comprised of Eligible Programme Underlyings which are eligible for inclusion as constituents in the relevant Index pursuant to the rules governing the relevant Index. Each Index will constitute a benchmark subject to the Benchmark Regulation (as defined below). Each Index will be administered by an administrator included in the register referred to in Article 36 of the Benchmark Regulation (as defined below). With respect to Crypto-Index Linked Securities, the Cryptocurrencies forming the Underlying Asset(s) of such Class of Securities must, on or around the Trade Date of a Class of Securities, consist of Eligible Crypto Underlyings.

1.4 Listing and Trading

The Prospectus permits offers of Securities to the public in Sweden and/or an admission to trading of such Securities on a regulated market in Sweden. The Issuer has requested the SFSA to notify the approval of the Prospectus to Austria, Belgium, Finland, France, Germany, Italy, Ireland, Luxembourg, the Netherlands, Poland, and Spain with a certificate of approval attesting that this Prospectus has been drawn up in accordance with the Prospectus Regulation. The Issuer may request the SFSA to notify the approval of the Prospectus to other EEA Member States in accordance with the Prospectus Regulation for the purposes of making a public offer in such Member States and/or for admission to trading of all or any Securities on a regulated market therein, or both.

All Securities are fully transferable. The Issuer may apply to a Relevant Stock Exchange for a Class of Securities to be admitted to such Relevant Stock Exchange and to be admitted to trading on the regulated market thereof. Application will be made for certain Securities to be listed for trading on a regulated market in Sweden, the Regulated Market (General Standard) (*Regulierter Markt (General Standard)*) of the Frankfurt Stock Exchange (*Frankfurter Wertpapierbörse*) (the “**Frankfurt Stock Exchange**”), Euronext Paris (the “**French Stock Exchange**”) and application may be made for certain Securities to be listed on the SIX Swiss Exchange according to the Exchange Traded Product Regulatory Standard of the SIX Swiss Exchange. The Issuer may also apply for a Class of Securities to be admitted to trading on a MTF or on other exchanges.

The Issuer will apply to the FCA for a permitted Class of Securities issued under this Programme to be admitted to the official list of the FCA. The Issuer will also make an application to the London Stock Exchange plc (the “**London Stock Exchange**”) for a permitted Class Securities issued under this Programme to be admitted to trading on the Main Market of the London Stock Exchange subject to the London Stock Exchange listing requirements. Admission to the official list of the FCA and to trading on the Main Market of the London Stock Exchange are offers made under, and admission to trading on a regulated market for the purposes of, the UK Prospectus Regulation. Investors should be aware that such admission to the official list of the FCA and trading on the Main Market are not offers made under the Prospectus Regulation, or admission to trading on a regulated market for the purposes of the

Prospectus Regulation, as it applies in the European Union, but are such offers and admission to trading for the purposes of the UK Prospectus Regulation.

Each Class of Securities traded on a Relevant Stock Exchanges may have different market makers, bid/offer spreads and depth of liquidity and may be traded using different platforms. In order to provide liquidity to investors and to minimise any tracking error, the Issuer will use reasonable endeavours to ensure that there is a market maker at all times following the first date that a particular Class of Securities is listed on a Relevant Stock Exchange.

1.5 Contract Structure and Flow of Funds for Securities

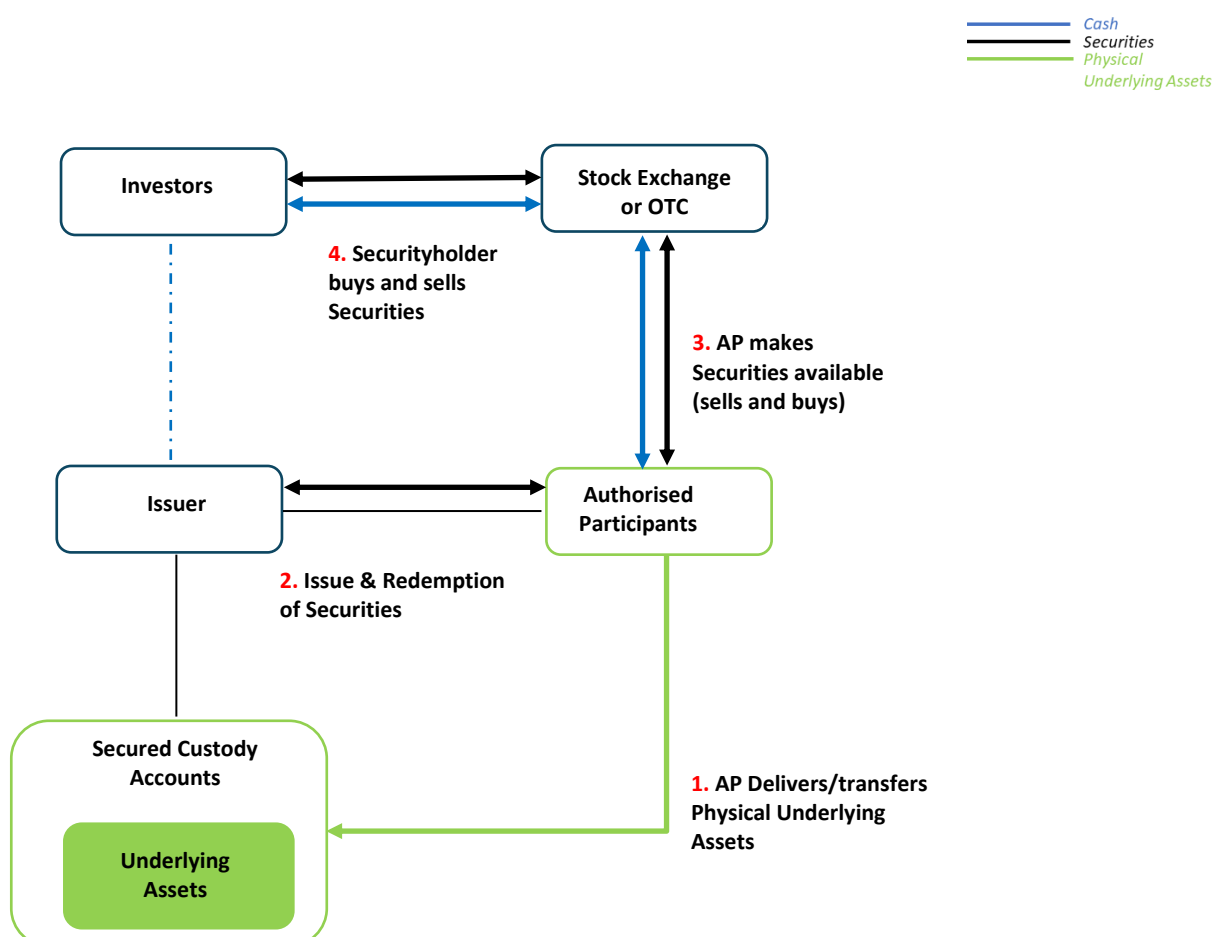

Structure

Securities are constituted by the Trust Deed. Under the terms of the Trust Deed, the Trustee acts as trustee for the Securityholders of each Class of the Securities. The relevant Underlying Assets and Secured Property held are the subject of floating and fixed charges and a pledge under the relevant Security Document(s) in favour of the Trustee to secure the obligations owed by the Issuer to the Trustee and the Securityholders in respect of the relevant Class of Securities. Additional security in respect of the Securities of each Class shall be created by or pursuant to any Supplemental Trust Deed relating to such Class and the Security Document(s) (if any) relating to such Class.

Under the Custody Agreements the relevant Custodian(s) acknowledge(s) the Security created in favour of the Trustee and agree(s) that once any relevant Underlying Assets are deposited in accordance with the relevant Custody Agreement, it may only be removed after approval from the Issuer (or the Trustee following an Event of Default). The obligations of the Issuer in respect of each Class of Security will be secured by a security such as a charge over the equivalent class of Underlying Assets in the relevant Issuer Accounts held by the Issuer and over the rights of the Issuer in respect of those Issuer Accounts under the relevant Custody Agreements.

Flow of Funds

Simplified Trading Structure for a Subscription of Securities

An Authorised Participant must deliver the relevant Underlying Assets meeting the requirements as set out by the Operating Memorandum equal to the aggregate Asset Entitlement (as defined below) into the accounts at the Custodians. Only once all of the Underlying Assets have been received will the Issuer create the relevant Securities and deliver them to the Authorised Participant via the Relevant Clearing System (such as Euroclear). Further details about settlement of the Securities in the Relevant Clearing System can be found under the heading 1.12 “*Relevant Clearing System and Settlement*” in section 1. “*General Description of the Programme*” of this Prospectus and/or in the relevant Issue Specific Option.

The Authorised Participant may then sell the Securities on a Relevant Stock Exchange, sell the Securities in off exchange transactions (known as “**OTC**” or “**Over-the-Counter**” transactions) or hold the Securities for themselves. The creation process is described in more detail under heading 1.8 “*Subscriptions and Redemptions*” below.

Non-Authorised Participants can buy and sell Securities for cash on any of the Relevant Stock Exchanges on which the Securities may be admitted to trading or in private transactions (OTC) in the same way as they buy and sell other listed securities rather than directly from the Issuer. The Issuer is not party to these transactions, and the cash used to settle these transactions is not delivered to the Issuer. Market makers work to ensure that there is sufficient liquidity on those stock exchanges. As the value of the relevant Underlying Assets backing the Securities fluctuates, so will the value of such Securities. Investors should be aware that the value of any Securities that are Cryptocurrency-Index Linked Securities, Equity-Index Linked Securities or ETP-Index Linked Securities (together, the “**Index Linked Securities**”) will not directly reflect the value of the relevant Index referenced by such Securities. Instead, the composition of the Asset Entitlement in respect of such Securities will track, to the extent reasonably practicable, the composition of the Cryptocurrencies, the Shares or the ETPs (as applicable) underlying the relevant Index. The Underlying Specific Entitlement (as defined below) in respect of such Securities will adjust as the relevant Index is rebalanced but the value of the Securities is not otherwise dependent on the performance of the relevant Index.

The relevant Underlying Assets will be held with all other relevant Underlying Assets attributable to such Class of Securities in the relevant secured accounts with the Custodians in the name of the Issuer in the Secured Custody Account.

See heading 1.8 “*Subscriptions and Redemptions*” below for information on subscription and redemption of Securities.

1.6 The System

The Issuer has implemented a system (the “**System**”) for enabling Authorised Participants to make subscriptions and request redemptions of Securities operated by or on behalf of the Issuer, the process of which is set out in the Operating Memorandum which will be made available by the Issuer to the Authorised Participants upon request.

1.7 Authorised Participants

Authorised Participants are experienced financial institutions who meet certain eligibility requirements and who have entered into an Authorised Participant Agreement with the Issuer. Authorised Participants are entitled to subscribe for new Securities directly with the Issuer, and redeem Securities directly with the Issuer. Non-AP Securityholders are Securityholders which are not an Authorised Participant. Non-AP Securityholders may therefore include retail investors as well as institutional investors who are not Authorised Participants. Non-AP Securityholders’ rights of redemption are subject to certain qualifications.

The terms of the Authorised Participant Agreements are summarised in section 11. “*Summary of the Programme Documents*” below. The Issuer has agreed to use reasonable endeavours to ensure that, generally at all times after the first date that a particular Class of Securities is listed on a Relevant Stock Exchange, there is at least one Authorised Participant.

In case no Authorised Participant has been appointed by the Issuer or in case that no Authorised Participant is available for a certain period of time in respect of a particular Class of Securities, the Issuer will give notice to the Securityholders informing them of such circumstances.

Details of Authorised Participants will be published on <http://www.hanetf.com>.

1.8 Subscriptions and Redemptions

The Subscription and Redemption mechanisms are intended to ensure that the Securities have sufficient liquidity and that the price at which they trade on the Relevant Stock Exchanges tracks the price of the relevant Underlying Asset (before fees).

Subscription Process

As set out above, only an Authorised Participant may subscribe for Securities by way of a valid Subscription Form in accordance with the terms of the applicable Authorised Participant Agreement and the Operating Memorandum.

As set out in Condition 2 and 18 of the General Terms and Conditions applicable to the Securities, the Issuer will only accept a Subscription Form and issue Securities if:

- (a) the Subscription Form is determined to be valid by or on behalf of the Issuer;
- (b) the acceptance of such Subscription Form will not cause the Programme Maximum Number of Securities to be exceeded;
- (c) the number of Securities that are the subject of the Subscription Form is greater than the Subscription Minimum (as specified in the Final Terms for the relevant Class of Securities); and
- (d) all other conditions precedent to an issue of the Securities are satisfied, including, without limitation, the payment of the Subscription Fee.

Redemption Process

Each Security carries a right on Redemption to delivery in the respective Underlying Asset of an amount equal to the Asset Entitlement per Security. Any Securityholder may Redeem Securities directly with the Issuer.

A Securityholder may Redeem Securities by submitting a valid Redemption Form to require the Redemption of the Securities it holds for delivery of the relevant Underlying Asset (or, in limited circumstances, cash) in an amount equal to the Asset Entitlement of such Securities (as calculated on the Trade Date) into the applicable Securityholder Account on the applicable Redemption Settlement Date.

The Issuer will only accept a Redemption Form if it complies with the list of requirements detailed in Condition 8.4 (*Redemption Form*) of the General Terms and Conditions. If the Issuer determines that the Redemption Form complies with these conditions, it shall confirm to the Securityholder that the Redemption Form is valid as soon as reasonably practicable, with the date of such confirmation being the Trade Date.

No Securities may be Redeemed pursuant to a Redemption Form that the Issuer has not confirmed (in its absolute discretion) as valid.

No Redemption Form will be validated by the Issuer unless the Securityholder complies with all compliance and identification checks reasonably required by the Issuer, and the results of such checks are determined to be satisfactory to the Issuer and/or its agents (“**KYC**”). The Issuer is entitled, in its absolute discretion, to determine whether KYC requirements apply to any Redeeming Securityholder and whether such KYC requirements have been satisfied (including where the Redeeming Securityholder is an Authorised Participant, whether KYC requirements have already been satisfied). The Issuer shall not be responsible or liable to any person for any loss or damage suffered as a result of it conducting KYC.

Notwithstanding any other requirements listed in Condition 8.4 (*Redemption Form*) of the General Terms and Conditions that are applicable on any Redemption, in respect of a Redemption Form submitted by a Securityholder and in case of (i) an Optional Redemption where a Non-AP Securityholder has elected for (a) Physical or (b) Cash Redemption in fulfillment of its delivery claim to the relevant Underlying Asset, or (ii) a Securityholder who is an Authorised Participant if Cash Redemption applies, the Issuer will not validate a Redemption Form until, amongst others, the Securityholder specifies a Securityholder Account into which the relevant Underlying Asset or Cash can be deposited.

The process for subscriptions and redemptions is described in more detail in the relevant Issue Specific Option.

1.9 Subscription Fee and Redemption Deductions

Fees in form of the Subscription Fee (applicable in case of subscriptions by Authorised Participants which are, as set out above, entitled to subscribe for Securities directly with the Issuer) and redemption deductions (as specified in the applicable Issue Specific Option and which include Execution Costs, i.e. costs that may occur upon a Redemption as may be specified in the applicable Issue Specific Option) will apply in case of Subscriptions and Redemptions of Securities directly from the Issuer. These fees would usually be payable by the Securityholders (in case of the Subscription Fee by Authorised Participants only as only Authorised Participants are entitled to subscribe for Securities directly with the Issuer) who deal directly with the Issuer and not by investors who buy and sell such on the secondary market, as further set out in the relevant Conditions.

In general, the Issuer, in performance of its obligation to Redeem any Class of Securities, may deduct the Redemption Deductions directly from the amounts due to the Securityholder on Redemption.

Notwithstanding the above, in the case of an Optional Redemption by a Non-AP Securityholder, the Issuer will not validate the associated Redemption Form until it receives the Redemption Fee in cleared funds from the Securityholder.

There may be additional fees payable on Subscription and Redemption which are set out in the relevant Issue Specific Option, if applicable.

1.10 Custody of Underlying Assets

The Underlying Assets upon which Securities will be secured will be held in secure accounts with the Custodian(s).

In the event that there is more than one Custodian in respect of a particular Class of Securities, the relevant Underlying Asset will be allocated amongst the relevant Custodians. The Issuer shall not be required to place the relevant Underlying Asset with a specific Custodian. The Issuer may allocate the relevant Underlying Asset amongst the relevant Custodians.

1.11 Security Structure

A security structure has been established to provide security for the Redemption Obligations of the Issuer to Securityholders upon redemption of Securities. The description of the security structure relevant for each Class of Securities is set out in more detail in the relevant Issue Specific Option and the Security Documents.

1.12 Relevant Clearing System and Settlement

Relevant Clearing System

The Securities may be issued in bearer form (including in new global note form or in classic global note form and serially numbered (“**Bearer Securities**”), in registered form (“**Registered Securities**”) or in dematerialised uncertificated registered form which shall not be exchangeable for Bearer Securities.

The settlement of transactions in the Securities will take place within the Relevant Clearing System. To the extent that the settlement of transactions in the Securities will take place in CREST, a paperless

multi-currency electronic settlement procedure enabling securities (including debt securities) to be evidenced otherwise than by written instrument, and transferring such securities electronically with effective delivery versus payment, the Securities are participating securities.

Certificated Form

For those Authorised Participants who wish to hold their Securities in Certificated Form (taking into account the principles set out below, i.e. the fact that the Issuer considers it preferable that Securities be held in Uncertificated Form), certificates in respect of the Securities will be dispatched within 10 Business Days of the Securities being issued.

For those Authorised Participants who desire to hold their Securities in Uncertificated Form, the relevant account of the Relevant Clearing System will be credited on the day on which the Securities are issued against payment.

The Issuer considers it preferable that Securities be held in Uncertificated Form. Notwithstanding any other provision in this document, the Issuer reserves the right to issue any Securities in Certificated Form. In normal circumstances this right is only likely to be exercised in the event of any interruption, failure or breakdown of the Relevant Clearing System (or any part thereof), or on the part of the facilities and/or systems operated by the Registrar in connection with the Relevant Clearing System. This right may also be exercised if the correct details (such as participant ID and member account details) are not provided as requested on the Subscription Order. No temporary documents of title will be issued and, pending despatch of security certificates, transfers will be certified against the register.

No responsibility for settlement systems

Neither the Issuer nor the Trustee will have any responsibility for the performance by the Relevant Clearing Exchange of any of their respective obligations under the rules and procedures governing their operations.

1.13 Registers

The Registrar will maintain the registers of persons holding the Securities.

1.14 Money Laundering Regulations

The verification of identity requirements of Jersey's anti-money laundering laws and regulations and/or any subsequent equivalent legislation will apply to the Programme and verification of the identity of the (i) Authorised Participants or (ii) following a relevant announcement by the Issuer through a Notice permitting non-Authorised Participants to deal with the Issuer, non-Authorised Participants, for Securities may be required. The anti-money laundering laws and regulations of other jurisdictions may also apply to the Programme and verification of the identity of the Authorised Participants or non-Authorised Participants (as applicable).

By lodging a Subscription Form or lodging an Subscription Order through the System, each Authorised Participant or non-Authorised Participants (as applicable) confirms that it is subject to the requirements of the Proceeds of Crime (Jersey) Order 1999, the Money Laundering (Jersey) Order 2008 (as amended from time to time) (in relation to Jersey), the Money Laundering Regulations 2007 (in relation to the UK) and/or any other applicable anti-money laundering laws and regulations and/or undertakes to provide such other evidence of identity as is required by the Issuer at the time of lodging the Subscription Form, or, at the absolute discretion of the Issuer, at such specified time thereafter as may be requested to ensure compliance with the Proceeds of Crime (Jersey) Order 1999, the Money Laundering (Jersey) Order 2008, the Money Laundering Regulations 2007 and/or any other applicable legislation.

The Issuer is entitled, in its absolute discretion, to determine whether the verification of identity requirements apply to any Authorised Participant or non-Authorised Participants (as applicable) and whether such requirements have been satisfied. The Issuer shall not be responsible or liable to any person for any loss or damage suffered as a result of the exercise of their discretion hereunder.

No Subscription will be accepted by the Issuer unless evidence of such Authorised Participant's or non-Authorised Participant's (as applicable) identity satisfactory to the Issuer and its agents is provided.

1.15 The Issuer and the Management and Determination Agent

The Issuer is a special purpose company incorporated in Jersey for the purpose of issuing and redeeming Securities linked to various Underlying Assets and enabling those Securities to be traded on stock exchanges along with entering into the programme documents to be entered into in respect of each Class of Securities, i.e. each Trust Deed, the Security Documents, each Custody Agreement, the Agency Agreement, the Management and Determination Agent Agreement, each Authorised Participant Agreement and the Account Bank Agreement (each as defined in the Conditions and together referred to as the "**Programme Documents**").

The Issuer has not been assigned a credit rating and it is not intended that any Underlying Assets will be assigned credit ratings.

The shares in the Issuer are all ultimately held by an orphan purpose trust the trustee of which is Apex Financial Services (Trust Company) Limited. The Issuer is neither directly or indirectly owned or controlled by any other party to the Programme.

The Issuer and HANetf Limited have entered into a Management and Determination Agent Agreement in relation to the Programme pursuant to which HANetf Limited provides operational support services to the Issuer in relation to the Programme, including obligations in relation to the making of certain calculations and determinations in relation to the Securities.

HANetf Limited is currently an appointed representative of Privium Fund Management (UK) Limited ("**Privium**"). Privium is a professional services firm authorised and regulated by the UK Financial Conduct Authority.

1.16 Administration Services

The administrator is Apex Fund Services (Ireland) Limited (the "**Administrator**"). The Issuer and the Administrator have entered into an administration agreement, pursuant to which, the Administrator will perform certain administration duties including transaction processing services, customer due diligence and calculation of the Asset Entitlement of the relevant Securities.

The Administrator is part of the Apex Group, a global financial services organisation and one of the global top tier independent service provider which retains a focus on high client service levels delivered locally and administers circa \$2.75trn in assets. Globally, the Apex Group administers over 10,000 structures.

1.17 US Broker-Dealer

With respect to each Class of Securities where the Underlying Asset is an ETF that is registered as an open-end management investment company under the U.S. Investment Company Act of 1940 as amended ("**US ETF**"), the US Broker-Dealer will perform certain services with respect to such Classes, including exercising any voting rights on behalf of the Issuer with respect to such US ETFs. The US Broker-Dealer also acts as the principal underwriter and distributor for such US ETFs in the United States of America. The US Broker-Dealer has no role in transaction processing or the selection of the Underlying Assets.

1.18 Further information

Information regarding Jersey and Swiss taxation in respect of the Programme and the Securities is set out in section 14. "*Tax Considerations*" below. If an investor is in any doubt about the tax position, it should consult a professional adviser. Your attention is drawn to the remainder of this document which contains further information relating to the Programme and the Securities.

1.19 No Securitisation, No STS Notification

The Issuer does not believe that the transactions described herein constitute a “securitisation” (as defined under Regulation (EU) 2017/2402 as amended (including by Regulation (EU) 2021/557) (the “**EU Securitisation Regulation**”) and the EU Securitisation Regulation, as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018 (as amended, the “**EUWA**”) and as amended (including by the Securitisation (Amendment) (EU Exit) Regulations 2019) (the “**UK Securitisation Regulation**”).

While the Issuer is established as a special purpose company for issuing the Securities backed by the Underlying Assets as described in this Prospectus, no notification has been or is intended to be, communicated to the European Securities and Markets Authority (“**ESMA**”) in relation to the ‘Simple, Transparent, and Standardised’ (“**STS**”) criteria set out in the EU Securitisation Regulation.

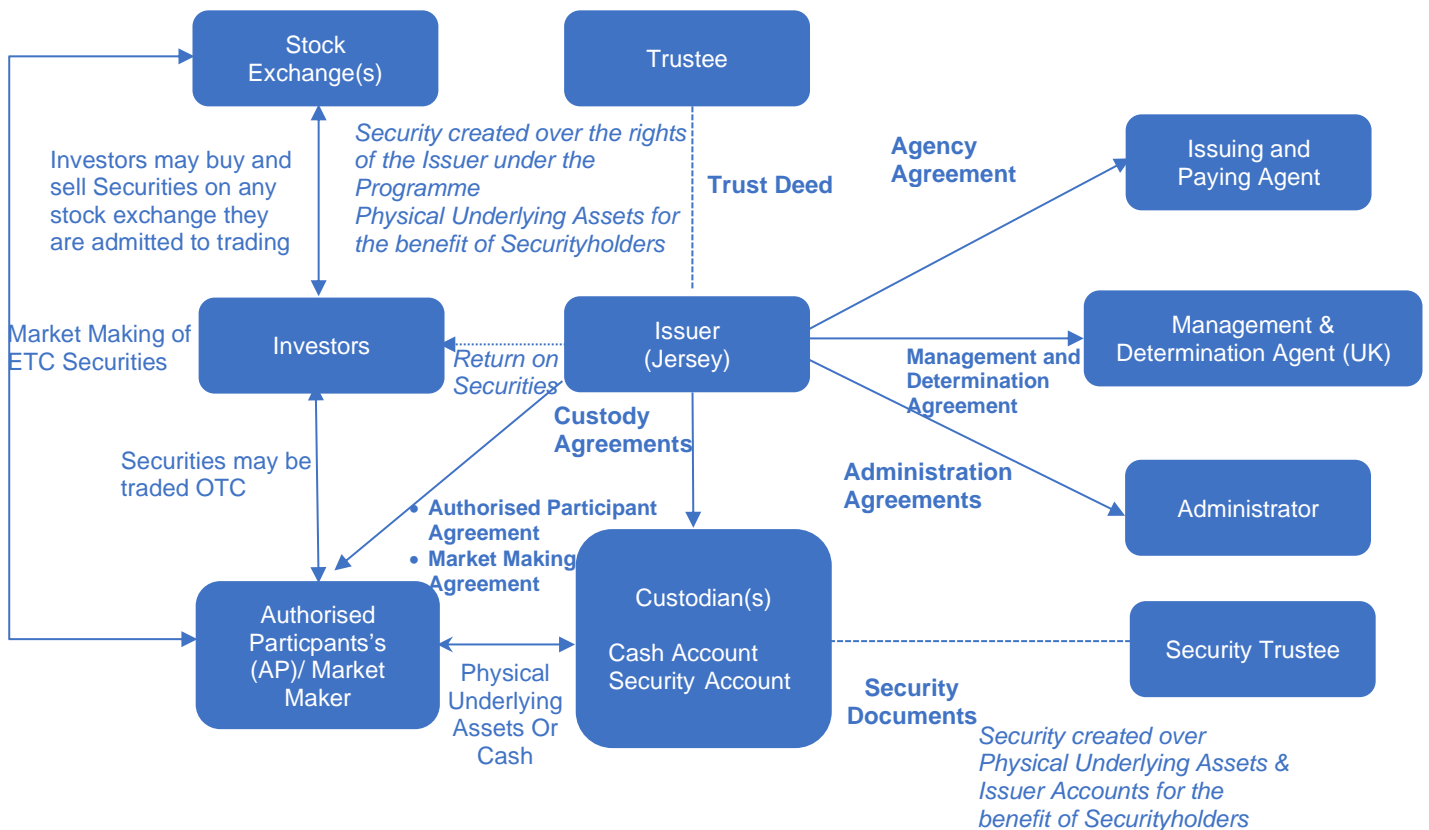

1.20 Confirmation of characteristics

The assets backing each issuance of Securities, being the Underlying Assets, have characteristics that demonstrate capacity to produce funds to service any payments due and payable on the relevant Securities.

1.21 Structure of the transaction

A diagrammatic representation of the principal aspects of the structure outlined above as currently in place appears below:

ETC Programme Simplified Overview

2. Risk Factors

This section contains a number of risk factors, both risks pertaining to the Issuer and pertaining to the Securities, which the Issuer believes may affect its ability to fulfil its obligations under the Securities.

The risk factors are presented in a limited number of categories depending on their nature. In each category, the two most material risk factors are presented first according to the assessment of the Issuer. Subsequent risk factors in the same category are not ranked in order of materiality or probability of occurrence. Where a risk factor may be categorised in more than one category, such risk factor appears only once and in the most relevant category for such risk factor.

The Issuer may issue (i) Securities linked to Cryptocurrencies, (ii) Securities linked to Equities and (iii) Securities linked to ETPs as the respective Underlying Asset. As described further below in the section “Specific risks applicable to each Class of Securities depending on the Underlying Asset”, each of these classes of Underlying Assets involve certain asset specific risks. In connection therewith, Securityholders should note, that the asset specific risks associated with the relevant Underlying Assets differ substantially between the groups of Underlying Assets, so that Securities with identical features may also differ substantially in their risk profile based on the respective Underlying Asset of the Security.

A Securityholder may lose some or the entire value of their investment or part of their investment in Securities including for reasons other than those set out in the risk factors below, for example, for reasons not currently considered by the Issuer to be material or based on circumstances or facts of which the Issuer is not currently aware.

The risk factors are presented in the following categories depending on their nature:

2.1 Risks relating to the Issuer

The following descriptions of the risk factors relating to the Issuer and their occurrence within a risk category, with the most material risk factors presented first in each category, should be understood as descriptions of residual risks, i.e. of the remaining risks following all counter measures taken in order to avoid such risks or limit their adverse effects.

2.1.1 Risks related to the Issuer's business activities

- (a) *The Issuer is a newly established special purpose vehicle with no operating and trading history. The Issuer has no track record of operating its intended business activities*

The Issuer was registered with the Registrar of Companies in Jersey on 9 November 2022. Due to such a short period of existence, the Issuer does not have a long and comprehensive track record of successfully operating the business activity described herein. There is a risk that the Issuer will not be successful in issuing the Securities, and that the Issuer will not make profits, despite this being the Issuer's aim. If the Issuer becomes unsuccessful in the issuance of exchange traded securities, the Issuer may cease its business activities as issuer or ultimately become insolvent. Although the Issuer takes reasonable efforts to develop its business, there can be no assurance that the planned business activities will be successful in the future which could have an adverse impact on the Issuer's business and financial situation. If the Issuer became insolvent, a Securityholder may lose some or even all of their investment in the Securities. For further information, please see also risk factor 2.1.2 (a) "*No Recourse Except to the Issuer and the Secured Property*" below.

- (b) *Regulation of the Issuer*

The Issuer is not required to be licensed or authorised under any current securities, commodities or banking laws in Jersey and will operate without supervision. There is no assurance that regulatory

authorities in one or more jurisdictions would not take a contrary view regarding the regulatory treatment of the Issuer and might require the Issuer to cease its operations until the relevant regulatory requirements have been satisfied. Any such requirement or change could require the Issuer to obtain licenses, registrations or authorisations or even make it impossible for the Issuer to perform its current business. The Issuer may not be granted such licenses, registrations or authorisations or it may face severe financial implications. This could have an adverse impact on the Issuer or the holders of the Securities as it may result in the Issuer redeeming the Securities early which, in turn, might lead to the Securityholders receiving a lower than expected yield on their Securities.

2.1.2 Risks related to the Issuer's corporate structure

(a) *No Recourse Except to the Issuer and the Secured Property*

The Issuer is a special purpose company established for the purpose of issuing the Securities. Any claims made against the Issuer will be satisfied in order of the priority of payments further details of which are set out in Section 6.3 "*Application of proceeds of enforcement of Security*". Claims for all amounts due to the Trustee and to payment of any remuneration and expense of any receiver and the costs of realisations of the security will rank above those of investors. If the net proceeds from the enforcement of the Secured Property in respect of a particular Class of Securities, following enforcement of the Security Documents applicable to that Class of Securities, are not sufficient to meet all obligations and make all payments due in respect of the Securities of that class, the obligations of the Issuer in respect of such Securities of that class will be limited to the net proceeds of realisation of that Secured Property. In such circumstances the assets (if any) of the Issuer other than that Secured Property will not be available to meet any shortfall, the rights of the relevant Securityholders to receive any further amounts in respect of such obligations shall be extinguished and none of the Securityholders or the Trustee may take any further action to recover such amounts. In these circumstances a Securityholder will suffer a partial or even total loss as they cannot realise the full value of their investment.

(b) *Unconnected Liabilities of the Issuer*

The Issuer is a special purpose company but it is not a regulated fund with statutory segregated liability between sub-funds with each sub-fund having separate assets and liabilities. Accordingly, the Issuer uses contractual limited recourse and non-petition provisions to achieve segregated liability and to prevent assets held in relation to any particular Class of Securities being made available to satisfy the claims of Securityholders of a different Class of Securities. While assets held in relation to any particular Class of Securities are not available to satisfy the claims of Securityholders of a different Class of Securities, there is a risk that the Issuer may become subject to claims or other liabilities (whether in respect of the Securities or otherwise) which are not themselves subject to limited recourse or non-petition limitations. If this were to happen it could increase the likelihood of the Issuer entering insolvency proceedings. If the Issuer were to enter insolvency proceedings, an Event of Default would occur in respect of each Class of Securities which would result in the Securities being Redeemed at short notice. This may result in the Securities being Redeemed on an earlier date than a Securityholder would otherwise have chosen. In these circumstances, the Securityholder may suffer a loss if the value of the Securities is lower than it would otherwise have been if the investment had been Redeemed on a day chosen by the Securityholder and may even lose all of their investment in the Securities.

(c) *Limited Enforcement Rights*

The Trustee may enforce the security constituted by the Security Documents with respect to a Class of Securities at its discretion but is only required to enforce the security on behalf of a Securityholder if it is directed to do so by an Extraordinary Resolution or in writing by holders of at least one-fifth in number of the Securities of the relevant Class then outstanding *provided that* the Trustee is indemnified and/or secured and/or pre-funded to its satisfaction. In circumstances where the Trustee is not obliged to enforce the security, a Securityholder will have no right to proceed directly against the Issuer and may therefore not be able to realise the value of their investment. In these circumstances a Securityholder will suffer a partial or even total loss as they cannot realise the full value of their investment.

(d) Administration and Winding-Up Proceedings in England

Under Section 426 of the Insolvency Act 1986, the English Courts may, if requested by a Court in a “relevant country or territory” (including Jersey), make an administration or winding up order in respect of a foreign company, such as the Issuer.

If the Issuer were placed in administration in England, the effect would be that during the period of administration, the affairs, business and property of the Issuer would be managed by a person known as an administrator and this could affect the ability of a Securityholder to redeem their Securities at a time of their choosing, which could mean a delay in the return of the Underlying Assets to Securityholders and a loss if the value of the Underlying Asset has reduced in the intervening period.

During the period beginning with making an application for an administration order and ending with the making of such an order or the dismissal of the application, no steps could be taken to enforce the security constituted by the Security Documents except with the leave of the Court and subject to such terms as the Court may impose.

In the case of administration, while the Issuer remained in administration no steps could be taken to enforce the security, except with the consent of the administrator or the leave of the Court and subject to such terms as the Court might impose. It is also open to the administrator to apply to the Court to sell property subject to the security free from the security. If the administrator were to take such a step, secured creditors would have the same priority in respect of the net proceeds as they had in respect of the assets subject to the security interests.

Under the Cross-Border Insolvency Regulations 2006 a foreign insolvency representative, in this case the insolvency representative of the Issuer in Jersey, may apply to the English Courts, *inter alia*, to commence insolvency proceedings under English law (which could include administration) or to have the English Courts recognise a foreign insolvency proceeding, or to have the English Courts grant a stay of any enforcement of any security. If any such application were made, it could affect the ability of the Trustee to enforce the security constituted by a Security Document.

If the Issuer were placed in liquidation in England, the security could be enforced by the Trustee on behalf of the Securityholders.

In the event that the Issuer became subject to an administration or winding up order, a Securityholder may lose some or even all of their investment in the Securities.

(e) Jersey insolvency procedures

The Issuer is incorporated under the laws of Jersey. Consequently and, in the event of an insolvency issuer, insolvency proceedings may be initiated in Jersey.

There are two principal regimes for corporate insolvency in Jersey: a declaration of “en désastre” under the Bankruptcy (Désastre) (Jersey) Law 1990 (“**Bankruptcy Law**”) and a winding up under the Companies (Jersey) Law 1991 (“**Companies Law**”).

The primary insolvency procedure available to creditors under Jersey law is an application for an Act of the Royal Court of Jersey (“**Royal Court**”) under the Bankruptcy Law declaring the property of a debtor to be “en désastre”. On a declaration of “en désastre,” title and possession of the property of the debtor vests automatically in the Viscount, an official of the Royal Court (“**Viscount**”). With effect from the date of declaration, a creditor has no other remedy against the property of the debtor, and may not commence or, except with the consent of the Viscount or the Royal Court, continue any legal proceedings to recover the debt. However, a secured party with the benefit of a security interest pursuant to the Security Interests (Jersey) Law 2012 (the “**Security Interests Law**”) may, without the consent of the Viscount or an order of the Royal Court, exercise any power of enforcement it may have under that law. This statutory protection is not afforded to the holder of a security interest granted under foreign law. It is, however, generally the established practice of the Viscount to respect foreign law governed security interests.

To the extent that the proceeds of such enforcement are insufficient to discharge liabilities owed, that secured party will rank as an unsecured creditor in respect of the shortfall and as such has no other remedy against the property or person of the debtor, and may not commence any legal proceedings or, except with the consent of the Viscount or the Royal Court, continue any legal proceedings to recover the balance of the debt.

Additionally, the creditors and shareholders of a Jersey company can instigate a winding up of an insolvent company pursuant to Part 21 of the Companies Law (a “**creditors’ winding up**”).

On a creditors’ winding up commenced by a company’s shareholders, a liquidator is nominated by the shareholders and creditors may approve such a liquidator or apply to appoint a different liquidator. The shareholders must give creditors 14 days’ notice of the meeting to commence the creditors’ winding-up.

On a creditors’ winding up commenced by a company’s creditors, an application is made to the Royal Court to place the company in a creditors’ winding up. At any time after the application has been made the Royal Court, the Royal Court may appoint a provisional liquidator with such powers as it sees fit. If the application is successful, the Royal Court will place the company in a creditors’ winding up and appoint a liquidator.

After the commencement of the winding up, or the appointment of a provisional liquidator, no action can be taken or continued against the company except with the permission of the Royal Court.

The liquidator will stand in the shoes of the directors and administer the winding up, gather assets, make appropriate disposals of assets, settle claims and distribute assets as appropriate.

However, a secured party (with the benefit of a security interest pursuant to the Security Interests Law) may, without the permission of the Royal Court, exercise any power of enforcement it may have under that law. As in the case of a *désastre*, this statutory protection is not afforded to the holder of a security interest granted under foreign law. To the extent that the proceeds of such enforcement are insufficient to discharge liabilities owed, the secured party will rank as an unsecured creditor in respect of the shortfall and as such has no other remedy against the company without the permission of the Royal Court in the same manner as unsecured creditors.

The Jersey Companies Law requires a creditor of a company (subject to appeal) to be bound by an arrangement entered into by the company and its creditors immediately before or in the course of its winding up if (among others) three quarters in number and value of the creditors acceded to the arrangement.

Compromises and arrangements with creditors

The Companies Law also grants the Royal Court the power to sanction a compromise or arrangement (“**Scheme**”) between a Jersey company and its creditors or shareholders (or a class of either of them) if approved by the relevant majorities of its creditors or shareholders (or a class of either of them). Once sanctioned, the Scheme is binding on all creditors or shareholders (or a class of either of them).

Reviewable transactions

Under the Bankruptcy Law and the Companies Law the Royal Court or a liquidator (as applicable) may set aside a transaction entered into by a company with any person at an undervalue. There is a five-year look-back period from the date of commencement of the winding up or declaration of “*en désastre*” during which transactions are susceptible to being set aside as a transaction at an undervalue.

Under the Bankruptcy Law and the Companies Law the Royal Court or a liquidator (as applicable) may set aside a preference given by the company to any person. There is a 12-month look-back period from the date of commencement of the winding up or declaration of “*en désastre*” during which transactions are susceptible to being set aside as a preference.

Under the Bankruptcy Law and the Companies Law the Royal Court or a liquidator (as applicable) may set aside a transaction providing credit to the debtor company which is or was extortionate. There is a three-year look-back period from the date of commencement of the winding up or declaration of

“désastre” during which transactions are susceptible to being set aside as an extortionate credit transaction.

Under the Bankruptcy Law and the Companies Law the Royal Court or a liquidator (as applicable) may within six months following the commencement of a creditors’ winding up, disclaim any onerous property of the company. For this purpose “onerous property” includes any moveable property, a contract lease or other immoveable property if it is situated outside of Jersey that is unsaleable or not readily saleable or is such that it might give rise to a liability to pay money or perform any other onerous act, and includes an unprofitable contract.

A disclaimer operates to determine the rights, interests and liabilities of the company/debtor in the property disclaimed and discharges the company/Viscount from all liability in respect of the property but does not, except so far as is necessary for the purpose of releasing the company/debtor from liability, affect the rights or liabilities of any other person.

A person sustaining loss or damage as a result of a disclaimer is deemed to be a creditor of the company to the extent of the loss or damage and has standing as an unsecured creditor in the “en désastre” or creditors’ winding up.

In addition to the Jersey statutory provisions referred to above, there are certain principles of Jersey customary law under which dispositions of assets with the intention of defeating creditors’ claims may be set aside.

In the event any of the transactions entered into under the Programme Documents are ruled against, disclaimed or otherwise become subject to the circumstances set out above, this may negatively impact on the value of the Securities and a Securityholder may lose some or even all of their investment in the Securities.

Preferred creditors

If the Issuer becomes subject to an insolvency proceeding and the Issuer has obligations to creditors that are treated under Jersey law as creditors that are senior relative to its secured creditors including the Securityholders, the Securityholders (and other secured creditors) may suffer losses as a result of their subordinated status during such insolvency proceedings. In particular, under Jersey law, upon an insolvency of a Jersey company, such as the Issuer, when applying the proceeds of assets subject to security not created under Jersey law which may have been realised in the course of a liquidation or other bankruptcy proceedings, the claims of a limited category of preferential creditors will take priority over the claims of creditors holding the relevant security. These preferred claims include the remuneration, costs and expenses properly incurred by a liquidator, the Viscount or other insolvency practitioner. Such preferred claims may negatively impact on the value of the Securities and a Securityholder may lose some or even all of their investment in the Securities.

Foreign law governed security

Under the laws of Jersey, a person incorporated or established in Jersey is deemed to have capacity to grant security governed under foreign law over property situated outside Jersey. However, to the extent that any security interest governed by a foreign law (including a floating charge) is expressed to apply to any assets of a person incorporated or established in Jersey such floating charge or other security interest is not likely to be held valid and enforceable by the Jersey courts in respect of such assets.

Further, the Insolvency Act 1986 does not apply in Jersey and receivers, administrative receivers and administrators are not part of the laws of Jersey. Accordingly, the Jersey courts may not recognise the powers of an administrator, administrative receiver or other receiver appointed in respect of Jersey situs assets.

The Royal Court may, however, assist the courts of prescribed countries and territories and, applying general principles of comity, assist the courts in other jurisdictions, in all matters relating to the insolvency of any person to the extent that the Royal Court think fit.

If insolvency proceedings have been commenced in relation to the company outside of Jersey, the nature and extent of the cooperation from Jersey is likely to depend on the nature of the requesting country's insolvency regime.

When considering how to proceed, the Royal Court may have regard to the UNCITRAL model law, even though the model law has not been implemented as a separate law in Jersey, but this is matter for the Court's discretion and they may choose not to follow the provisions of the UNCITRAL model law.

Further, as Jersey is not part of the European Union Regulation (EU) 2015/848, as amended by Regulation (EU) 2021/2260 ("**Recast Insolvency Regulation**") does not have direct effect in Jersey and has not been implemented in Jersey as a separate law. Accordingly, the automatic test of centre of main interests does not apply and the approach adopted by the Royal Court may not be consistent with the Recast Insolvency Regulation.

If insolvency proceedings have been commenced in another jurisdiction in relation to the company, the nature and extent of the cooperation from Jersey is likely to depend on the nature of the requesting country's insolvency regime and any reciprocity between the jurisdictions.

Enforcement of a security interest against a Jersey company may be further limited by fraud, bankruptcy, insolvency, liquidation, dissolution, re-organisation or other laws of general application relating to or affecting the rights of creditors.

As a result of these considerations, a Securityholder may lose some or even all of their investment in the Securities.

(f) No Guarantee by any other Party

The Securities issued under the Programme will not be guaranteed by, or be the responsibility of, any entity other than the Issuer. Aside from the Issuer, no party, or any other person (including any affiliate of the Issuer) is required to make payments on the Securities of any Class. Specifically, the Securities:

- (a) will not have the status of a bank deposit and will not be within the scope of any deposit protection scheme or any client money protection scheme;
- (b) are not insured or guaranteed by any government, government agency or other body; and
- (c) by virtue of the issue of the Securities, the Issuer is not regulated by the Swedish central bank (*Sveriges riksbank*) or any other central bank.

Consequently, if the Issuer were to fail to satisfy its obligations in respect of the Securities, the Securityholders would have no recourse to any other person or ability to require any other person to make payments on behalf of the Issuer and in such circumstances, a Securityholder could suffer a loss of some or all of their investment in the Securities.

2.2 Risks applicable to all Securities issued under this Prospectus

An investment in a Class of Securities involves certain risks associated with the characteristics, specification and type of the Securities which could lead to substantial losses that Securityholders would have to bear in the case of selling their Securities. Risks regarding a Class of Securities comprise, *inter alia*, the following risks:

2.2.1 Market trading and price risk of Securities and the Underlying Assets

General movements in local and international markets and factors that affect the investment climate and investor sentiment could all affect the level of trading and, therefore, the market price of the Underlying Assets and/or the Securities. This may lead to a fall in the value of Securities which will have an adverse impact on any investor that purchased the Securities at a higher price as that investor would suffer a loss as a result. These factors may have different effects on each Class of Securities and, therefore, the impact may be different depending on which Securities an investor is holding.

The market price of the Securities will be affected by a number of factors including, but not limited to, the value and volatility of the Underlying Asset and market perception. As a result, the price may be volatile and may fall rapidly and significantly. This could lead to an investor suffering a loss as they may not be able to sell their Securities quickly and/or at a price such that the investor is able to prevent or minimise any loss of its investment.

Prospective investors may lose the value of their entire investment or part of their investment in the Securities.

2.2.2 Risk of No Authorised Participants

There can be no assurance that there will at all times be an Authorised Participant to deal with the Issuer in applying for or redeeming Securities. If there are no Authorised Participants, the investor would need to redeem Securities either directly with the Issuer or sell its Securities on the secondary market, and this may take longer to complete or give rise to additional fees or costs. This delay in redemption in these circumstances may expose Securityholders to movements in the value of the Underlying Asset during such period, meaning that a Securityholder could receive less on redemption than they would otherwise have received had an Authorised Participant been available.

If there is no Authorised Participant, the Issuer may (but is not obliged to) determine that a Compulsory Redemption Event in respect of the Securities has occurred. In such case, the Issuer may notify Securityholders that there are no Authorised Participants and that a Compulsory Redemption Event has occurred in respect of the Securities as a result of which the Securities will be redeemed as further set out in the relevant Final Terms. If a Compulsory Redemption Event were to occur, all Securities subject to the relevant notice will be redeemed pursuant to the Redemption Payment Procedures as set out in the applicable Issue Specific Option. The occurrence of a Compulsory Redemption Event could result in a Securityholder suffering a loss of some or all of their investment in the Securities if, for example, the price of the Underlying Assets has fallen in value since the Securityholder first invested in the respective Securities and may result in the amount received by the Securityholder being less than it would have been had the Securities been redeemed on a date chosen by that Securityholder.

2.2.3 Currency Risk

The price of Securities will be calculated in the relevant Currency; in particular, in case of a redemption, the Issuer may agree to receive the redemption fee payable upon such redemption in a currency other than the relevant Currency. To the extent that a Securityholder values Securities in another currency than the relevant Currency and/or if the Issuer elects to receive the redemption fee in a currency other than the relevant Currency, that value may be affected by changes in the exchange rate between the relevant Currency and that other currency so that the price of Securities and/or the redemption fee payable by a Securityholder, as relevant, may be lower or higher than originally anticipated by the Securityholder. Such changes in the exchange rate may result in the amount received by the Securityholder being less than it would have been had the exchange rate not changed.

2.2.4 Capital Adjustment Factor changes

The variables or underlying factors that are taken into account in calculating the individual asset entitlement for each Underlying Asset comprising the Asset Entitlement for a Class of Securities linked to more than one individual Underlying Asset on any day in accordance with the relevant Issue Specific Option are reflected in the Capital Adjustment Factor (as defined in the relevant Issue Specific Option, i.e. an amount determined by the Issuer that represents fees, expenses and/or, if applicable distributions or deductions that may arise or be levied by various counterparties, service providers or market participants in connection with the relevant Class of Securities). The Issuer may vary the Capital Adjustment Factor in respect of a Class on any day (as indicated in the formula to calculate the Asset Entitlement as set out in the relevant Issue Specific Option) without giving notice to the Securityholders. Potential investors should note that the Issuer is not required to consider the interests of the Securityholders in making any such variation. Any such variation in Capital Adjustment Factor or fees may negatively impact the return for Securityholders of that Class.

2.2.5 Effects of Weight Adjustment Factor and Rebalancing Risk

In addition, where applicable, the Weight Adjustment Factor (i.e. an amount determined by the Issuer that represents a change in the individual asset entitlement for the relevant asset comprised in the Asset Entitlement for that Class of Securities to reflect the quantities of the individual asset held in respect of the Class of Securities following a Rebalancing, as further defined in the relevant Issue Specific Option) needs to be taken into account. The Weight Adjustment Factor represents a change in the individual asset entitlement for the relevant asset comprised in the Asset Entitlement for that Class of Securities to reflect the quantities of the individual asset held in respect of the Class of Securities following a Rebalancing (as further specified in the relevant Issue Specific Option). It includes costs connected to the Rebalancing such as execution costs and slippage costs.

Accordingly, the Issuer may in certain circumstances effect a Voluntary Rebalancing (as defined in the respective Issue Specific Option, i.e. an adjustment to the Asset Entitlement of a Class of Securities which may be triggered upon the Issuer, acting in good faith and in a commercially reasonable manner, determining that such adjustment is desirable to restore the initial weightings of the basket components or the composition of a basket in accordance with the objective of the basket or to help reduce a tracking error in respect of an Index (as applicable) or following the occurrence of certain disruption events). However, there can be no guarantee that the Issuer will effect such Voluntary Rebalancing even following commercially reasonable determination by the Management and Determination Agent that such Voluntary Rebalancing may be desirable. It may not always be reasonably practicable to match the new Weights of each of the Underlying Assets comprised in the Basket and/or Index, as applicable, including (without limitation), in circumstances where the relevant Underlying Asset is not supported by the Custodian(s) or there is a market disruption affecting the relevant Underlying Asset during the Rebalancing Period.

While the Issuer is required to take into account the interests of the Securityholders prior to effecting a Voluntary Rebalancing, any such rebalancing and the related execution costs may negatively impact the return for Securityholders of that Class.

2.2.6 Custodian non-performance on Physical Redemption

In the case of a Physical Redemption of the Securities, the Issuer will instruct the relevant Custodian(s) to effect a transfer of the relevant Underlying Asset(s) for the Securities being redeemed to the Securityholder. There may be circumstances in which a Custodian fails to effect such a transfer in accordance with such instructions. In that event, the Issuer will not be responsible to or liable to the Securityholder for such failure. The Issuer will to the extent practicable assign to the redeeming Securityholder its claims against the relevant Custodian(s) in respect of the Underlying Asset(s) that have not been transferred, but it may not be practicable to assign such claims and such claims may be of little or no value. As a result, a Custodian's failure to effect such a transfer may result in the Securityholder losing all of its investment.

2.2.7 Credit risk on third parties in relation to Cash Redemption or Compulsory Cash Redemption

In the case of a Cash Redemption or Compulsory Cash Redemption of the Securities, the Issuer will sell the Underlying Asset(s) for the Securities being redeemed. There is no requirement under the Programme to require the counterparty to any such sale to grant any security or provide any collateral in respect of the obligations it owes to the Issuer in respect of the sale. There may be circumstances in which such counterparty fails to perform its obligations under such sale and fails to pay the consideration for the purchase of the Underlying Asset(s) to the Issuer. The Issuer will to the extent practicable assign to the redeeming Securityholder its claims against such counterparty in respect of the redeeming Securityholder's share in the proceeds of the sale of such Underlying Assets that has not been paid, but it may not be practicable to assign such claims and such claims may be of little or no value. As a result, the failure of a counterparty to pay such proceeds to the Issuer may result in the Securityholder losing all of its investment.

2.2.8 Disruption Event Risks

If, in respect of a Class of Securities, a Disruption Event (as defined in the respective Issue Specific Option) occurs, the Issuer may suspend or postpone (i) any request for redemption of Securities, (ii) any settlement of any redemption of Securities or (iii) any Compulsory Redemption or the settlement thereof.

A Disruption Event includes (i) disruption to the market for an Underlying Asset (e.g., in the case of Cryptocurrency Linked Securities, a trading disruption in respect of the Cryptocurrencies comprising the Coin Entitlement for a Class of Cryptocurrency Linked Securities), (ii) disruptions related to the service provider (e.g. if a service provider resigns or its appointment is terminated for any reason and no successor has been appointed) and (iii) a disruption related to the Secured Property (e.g., in the case of Cryptocurrency Linked Securities, if the Cryptocurrency held as Secured Property with respect to a class has been lost or is inaccessible). Further, in respect of Index Linked Securities only, any event which results in the Issuer being unable to calculate the relevant Asset Entitlement for that Class of Index Linked Securities.

During the period that Redemption of Securities of such Class is suspended, the Securities and the Underlying Assets may decrease in value and Securityholders that were prevented from requesting a Redemption may lose all or some of their investment as a result. During the period that settlement of Redemptions or Compulsory Redemption is suspended or postponed, the Securities may fall in value so that the Redemption Amount received is lower (or considerably lower) (or has a lower or considerably lower cash value) than would have been the case if the Disruption Event had not occurred.

In addition, in case of a Disruption Event due to a (i) Secured Accounts Disruption (as defined in the Conditions) and/or a Service Provider Disruption – Assets (as defined in the Conditions), the Asset Entitlement of the relevant Securities may be subject to a permanent reduction, including to zero.

2.2.9 Redemption Deductions

Prospective investors should note that Redemption Deductions (i.e. fees) are payable in respect of redemption of Securities.

Prospective investors should note that the Redemption Amount payable by the Issuer to a Securityholder in respect of a Security will be calculated less any applicable fees, which include but are not limited to Redemption Deductions. As such, the amount due to a Securityholder in respect of each Security held by it on the Optional Redemption Settlement Date or the Compulsory Redemption Settlement Date will be less than the aggregate price per Asset Entitlement in respect of such Securities.

2.2.10 Liquidity Risk of the Securities

The Securities are intended to be listed and traded on a regulated market in Sweden, the Frankfurt Stock Exchange, the French Stock Exchange, the London Stock Exchange and may be listed or traded on one or more other Relevant Stock Exchanges such as the SIX Swiss Exchange. There is no certainty that there will be liquidity available on a Relevant Stock Exchange or that the price will be in line with the market value of the Underlying Assets at any given time. The Securities may have long settlement periods or may become hard to value, buy or sell at a reasonable price or in a large volume. The Issuer's ability to meet its obligation in relation to the Securities may also decline drastically. There can be no assurance as to the depth of the secondary market (if any) in Securities, which could affect their liquidity and market price.

Additionally, the market for certain investments may become illiquid under adverse market or economic conditions, independent of any specific adverse changes to the condition of the Issuer. As the Securities are relatively new and complex investments, their trading behaviour under a stressed financial environment is yet untested and there can be no assurance as to the depth of any secondary market in Securities which would affect the ability of an investor to trade in Securities, at an advantageous time, on the secondary market. In the event that the Securities become illiquid, this may negatively impact both the liquidity and price of the Securities.

2.2.11 Liquidity risk of Underlying Assets

The liquidity of a Security is inherently linked to the liquidity profile of the Underlying Asset which may change over time. In the event of liquidity in the Underlying Asset reducing, investors may find it difficult to sell Securities bought previously. Reduction in liquidity is often accompanied by falls in price or increased volatility. Investors should be aware that a deterioration in underlying market conditions will likely affect their ability to transact in any Security. This may adversely affect the price at which Securityholders are able to trade the Securities in the secondary market and might result in Securityholders suffering a partial or even total loss as they cannot realise the full value of their investment.

2.2.12 Secondary market price risk

At any time, the price at which Securities trade on a Relevant Stock Exchange (or any other exchange or market on which they may be quoted or traded) may not reflect accurately the Asset Entitlement. The subscription and redemption procedures for Securities and the role of the market maker(s) are intended to minimise this potential difference. However, the market price per Security will be a function of supply and demand for the Securities and the bid/offer spread that market-makers are willing to quote for Securities. As a result, an investor may pay more or less than the market value of the Asset Entitlement when the investor buys Securities on any secondary market. Correspondingly, an investor may receive more or less than the price per Security when Securities are sold on a secondary market.

Whilst market makers may have obligations to an exchange, market makers are not obliged to make a market for any Class of Securities. A reduced number of market makers making a market in Securities could impact liquidity that, in turn, could negatively impact the market price of the Securities.

Additionally, pricing and liquidity provision in the secondary market is dependent on the equities trading ecosystem and the participants within it. This includes, but is not limited to, exchanges, market making firms, banks, clearing houses, Multi-lateral Trading Facilities and associated electronic communication channels as well as connectivity infrastructure. Any disruption to this ecosystem can result in reduced liquidity and price distortion of the Security in the secondary market. Any of these factors could cause an investor to be restricted in their ability to buy and sell Securities at a particular time which could cause them to incur a loss.

2.2.13 Tracking error or tracking difference

If a Security tracks or replicates an underlying index, price or performance, the application of fees and other adjustments may cause the change in the price or performance per Security for any given period of time to differ from the change in the relevant underlying index, price or performance. As a result, an investor may find that the return they achieve from an investment in Securities is less than the return they would have achieved from an investment in the underlying index or other asset.

2.2.14 Slippage and execution costs risk

The reference price of an Underlying Asset may differ from the price at which the Issuer is able to purchase or dispose of that Underlying Asset. This may have an impact on the proceeds realised from the sale of that Underlying Asset on Cash Redemptions or Compulsory Cash Redemptions or cash creations of the Securities. As a result the Securityholder may receive less, or substantially less from the Issuer, than if they had purchased or disposed of the Underlying Asset themselves. Prospective investors in Basket Linked Securities and/or in Index Linked Securities should also be aware that a Rebalancing (i.e. an adjustment to the individual asset entitlement for the relevant asset comprised in the Asset Entitlement for the relevant Class of Securities) may require the Issuer to purchase or dispose of an Underlying Asset from time to time in certain circumstances. The price at which the Issuer is able to do so will impact the composition and weighting of the Underlying Assets comprised in the aggregate Asset Entitlement for a Class of Basket Linked Securities and/or in Index Linked Securities. This may result in the composition and weighting of the Underlying Assets comprised in the relevant Asset Entitlement being different to the composition and weighting of the relevant Underlying Asset in the Index, thereby increasing tracking error or difference. An investment in a Class of Index Linked Securities is not therefore the same as an investment in the Index itself.

2.2.15 Value of Investment – Secondary Market

A market maker may maintain such bid/offer spread as it determines in its absolute discretion. In the event that there is extreme market volatility in the price of the Underlying Asset, the market maker may use its discretion to widen spreads as necessary, or take any other action it sees fit, including exiting the market. The bid/offer spread is the difference between the bid price (i.e. the price at which a holder can sell Securities to the market maker) and the offer price (i.e. the price at which a holder can buy Securities from the market maker). Any price provided by a market maker or other secondary market price may take into account fees (including any dealing order fees charged by the Issuer to a market maker), charges, duties, taxes, commissions, liquidity, market spreads and/or other factors. Prospective investors should be aware that a market maker may purchase Securities and hold them on its own inventory and may exercise all voting rights associated with the Securities during this period. Any such actions by a market maker may adversely affect the price at which Securityholders are able to trade the Securities in the secondary market.

2.2.16 Risk of breaches in the compliance processes of the Issuer and third parties

The Issuer does not carry out any other business than the issue of exchange traded securities linked to and secured by the Underlying Assets and does not safekeep, administrate and/or protect the Underlying Assets for others, so that the Issuer does not require specific licenses under the laws of Jersey. Accordingly, pursuant to the regulatory framework which is currently applicable to the Issuer, it faces relatively low compliance requirements, as it is, for example, not directly responsible for Know Your Customer (“**KYC**”) and/or Anti-Money Laundering (“**AML**”) checks of end investors. However, the Issuer takes reasonable efforts to establish the nature of counterparty and customer activities and ascertain the legitimacy of counterparty funds. In this respect the Issuer relies on its Authorised Participants to perform checks on the sources of funds. It should be stressed that performing KYC/AML checks in respect of transactions related to the Underlying Assets is new and challenging and even though Authorised Participants are regulated entities, there is risk of compliance failures with respect to KYC/AML. Any breach of the compliance processes of the Issuer, Authorised Participants or service providers could have a material adverse effect on the Issuer’s core business, including reputational damage and significant legal and financial impact.

2.2.17 Tax

Depending on the investor’s country of residence, a holding in Securities that reference the price of Underlying Assets may have tax implications, such as value added tax or capital gains tax. Investors should consider whether such tax liabilities apply when investing in the Securities and should consult their tax advisors regarding their specific circumstances and consequences for themselves. Each investor will assume and be solely responsible for any and all taxes of any jurisdiction, including central government or local state taxes or other like assessment or charges which may be applied in respect of Securities. In the event that any withholding tax or deduction for tax is imposed on payments on the Securities, the Securityholders will be subject to such tax or deduction and will not be entitled to receive amounts to compensate for such withholding or deduction. Investors should be aware that the tax treatment of the Securities in their jurisdiction will impact the return that they achieve from their holding of Securities and this should inform their decision to invest.

2.2.18 Failure of a Custodian

If a Custodian were to enter into an insolvency procedure then that may prevent or delay access to some or all Underlying Assets held as collateral with respect to the Securities thereby causing a total or partial loss to investors. Redemptions could be delayed and the situation may also result in a compulsory redemption at a time disadvantageous to an investor.

2.2.19 Operational risks

The Issuer has developed and maintains the System for enabling Authorised Participants to make subscriptions and request redemptions of Securities with the Issuer, the process of which is set out in the Operating Memorandum. The Administrator, the Issuer and other related entities utilise the System to enable primary orders, track order settlement status and report order activity to interested parties.

Operationally the System forms a critical piece in the operation and administration Securities. Prolonged downtime of the System for any material length of time would impact the Issuer and Administrator's ability to service automated primary market order activities. The risk of delayed confirmation of primary orders would potentially occur in the event of a significant inability to operate the System in normal conditions. Any operational failure, including but not limited to any such failure and/or delay of the System, could potentially impact the provision of market maker liquidity on the secondary market. This might adversely affect the price at which Securityholders are able to trade the Securities in the secondary markets and, in case of an illiquid secondary market, Securityholders might be prevented from monetising their investment which could ultimately result in a total loss of investment.

2.2.20 Trading Hours

The Securities will trade only during regular trading hours on the Relevant Stock Exchange(s) on which they are listed. The Underlying Assets to the Securities may trade on exchanges which operate globally around the clock. To the extent that a Relevant Stock Exchange is closed while the markets for Underlying Assets remain open, significant price movements may take place an investor in Securities will not be able to take account of. This may limit Securityholders' ability to react to price movements or volatility in the markets for the relevant Underlying Asset. Additionally, Securityholders will not be able to redeem the Securities until such Relevant Stock Exchange is open for trading. In these circumstances, a Securityholder may suffer a loss if the cash value of the Securities at that time is less than it would otherwise have been if redeemed at a time when the applicable Relevant Stock Exchange was closed but other markets in Underlying Assets remained open.

2.2.21 Early Redemption

(a) Issuer call option

The Issuer may at any time, in its sole and absolute discretion, elect to redeem all Securities, or all or some only of the Securities of a Class, as further specified in Condition 9.1 of the General Terms and Conditions. In exercising such discretion, the Issuer will have no regard to the interests of the Securityholders, and Securityholders may receive less, or substantially less, than their initial investment.

(b) Compulsory Redemption Events

The Issuer may at any time determine that a Compulsory Redemption Event as further specified in Condition 9.2 of the General and Terms and Conditions has occurred, e.g. if the market value of the Asset Entitlement per Security of a Class falls below a certain percentage level of the principal amount of the respective Securities (as set out in Condition (9.2(a)) of the General Terms and Conditions), if any of the Management and Determination Agent, the Administrator, the Issuing and Paying Agent, the Registrar, the Paying Agent(s), the Eligible Cash Account Bank or all of the Authorised Participants in relation to the Securities resign their appointment or their appointment is terminated and no successor or replacement has been appointed (as set out in Condition 9.2(b) of the General Terms and Conditions), if any custody agreement is terminated and no replacement has been entered into (as set out in Condition 9.2(c) of the General Terms and Conditions) or if the Issuer determines that due to the adoption or any change in law or regulation or the interpretation thereof it has or reasonably expects that it will become illegal for the Issuer to perform its obligations under the Securities or the Issuer would incur or expect to incur materially increased costs in performing its obligations under the Securities or all Securities of any one or more Class (as set out in Condition 9.2(d) of the General Terms and Conditions), so that the relevant Securities are to be Redeemed compulsorily. In exercising such discretion, the Issuer will have no regard to the interests of the Securityholders, and Securityholders may receive less, or substantially less, than their initial investment.

(c) Compulsory Redemption for cause

In addition to the Compulsory Redemption Events set out in (b) above, the Issuer may at any time and in its absolute discretion, elect to redeem the Securities held by a Securityholder if the Issuer required the respective Securityholder to certify and provide evidence that the Securityholder is not in breach of any law or regulation or would risk exposing any other party to any Programme Document (other than

the Issuer and the Securityholders (such party, a “**Programme Party**”) to a breach of any law or regulation and the relevant Securityholder has either not provided such certification or evidence in a timely and satisfactory manner or the relevant Securityholder has certified that it is in breach or would risk exposing any other Programme Party to such breach (as further specified in Condition 9.3(a) of the General Terms and Conditions). Further, the Issuer may at any time and in its absolute discretion elect to redeem the Securities held by a Securityholder if the Issuer considers that such Securities are or may be owned or held by any person in breach of any law or requirement of any country or that the ownership or holding of these Securities would expose any Programme Party to a risk of violation of any law or regulation (as further specified in Condition 9.3(b) of the General Terms and Conditions). In exercising such discretion, the Issuer will have no regard to the interests of the Securityholders, and Securityholders may receive less, or substantially less, than their initial investment.

(d) Consequences of a Compulsory Redemption Event or an Event of Default

Following the occurrence, in respect of a Class of Securities, of a Compulsory Redemption Event or an Event of Default, the Issuer (in the event of a Compulsory Redemption Event) or the Trustee (in the event of an Event of Default) may declare such Class due and payable.

(e) Securityholder directions

The Conditions of each Class of Securities permit the holders of at least one-fifth in number of such Class of Securities then outstanding following the occurrence of (i) an Event of Default; and/or (ii) an Issuer Insolvency Event which would, upon delivery of the requisite notice, constitute a Compulsory Redemption Event, to direct the Trustee to deliver a notice or take such other action in accordance with the Conditions, whereupon each Security of such Class will become due and payable at its Redemption Amount (as applicable) immediately upon the delivery of such notice (in the case of an Event of Default) or will be compulsorily redeemed with settlement due on the Compulsory Redemption Settlement Date (in the case of a Compulsory Redemption Event). The Trustee will not however be obliged to take any step or action or to act in accordance with any such direction unless the Trustee has been pre-funded and/or secured and/or indemnified to its satisfaction by one or more Securityholders.

At any time after the security constituted by a Security Document has become enforceable, the Trustee may, at its discretion, and will, if so directed in writing by holders of at least one-fifth of the outstanding number of Securities of the relevant Class, subject to its having been pre-funded and/or secured and/or indemnified to its satisfaction by the Securityholders of the relevant Class, enforce the security constituted by the relevant Security Documents.

Consequently, an investment in Securities may be Redeemed earlier than desired by a Securityholder and on short notice. In these circumstances, a Securityholder may suffer a loss if the Redemption Amount of the Securities at that time is less than it would otherwise have been if redeemed on a day chosen by the Securityholder.

2.2.22 Insufficient Assets to Cover Principal Amount

A Securityholder may elect to receive an amount in cash equal to the Principal Amount instead of the amount otherwise specified on a redemption. Such Principal Amount operates as a minimum repayment amount which is payable at the election of the Securityholder. Due to the limited recourse nature of the Securities, in the event that the value of the Asset Entitlement of the relevant Class is insufficient to pay the Principal Amount to all Securityholders who have elected to receive the Principal Amount, such Securityholders may not receive payment of the Principal Amount in full and may receive substantially less.

2.2.23 Issuer Technical Amendment

The Trustee may agree without the consent of any of the Securityholders to a modification to the Conditions, any relevant Trust Deed and/or any Programme Document to effect any adjustment to the Conditions of the Securities as a consequence of the occurrence of an Adjustment Event (the date on which such adjustment is effected, being the “**Adjustment Effective Date**”). Adjustments so agreed as a consequence of an Adjustment Event must not have the consequence that there is a negative change to the Asset Entitlement in respect of the relevant Securities at the time the adjustments are agreed and

must not take effect until at least three calendar days have elapsed after they were announced to Securityholders in accordance with Condition 20 (*NOTICES*) of the General Terms and Conditions.

The definition of an Adjustment Event will be set out in the relevant Issue Specific Option and may include, without limitation, changes in the market for transacting in the relevant Underlying Asset, in the legal or regulatory status of the Underlying Asset or, in the case of Index Linked Securities, a cancellation or disruption affecting the relevant underlying index or a modification to the methodology for calculating such underlying index. The Trustee will not agree to such a modification unless the Issuer has certified in writing to the Trustee, upon which certification the Trustee may rely without any obligation to investigate or verify or form its own opinion and, absent its wilful misconduct or gross negligence, without liability to any person that any such modification (1) is in its opinion not materially prejudicial to the interests of any Class of Securityholders and (2) has been drafted solely for the purposes given in (i) or (ii) in the paragraph above. Thus, Securityholders may find that the terms of a Class of Securities they hold may be modified as a result of an Adjustment Event without the Securityholder having consented to such modification.

2.2.24 Requirement to Have Minimum Number of Market Makers

The Issuer may be required by the rules of a Relevant Stock Exchange to which the Securities are admitted to trading to have a minimum number of market makers. If a market maker ceases to act as market maker and a replacement cannot be found and as a result the Issuer cannot meet the minimum requirement, such Relevant Stock Exchange may require the Securities to cease trading which may make it harder for a Securityholder to sell their Securities at a time of their choosing and which could lead to a loss to a Securityholder if, when they are subsequently able to sell their Securities, the value of those Securities has dropped below the value of such Securities when the Securityholder initially sought to sell them.

2.2.25 Legal & Regulatory Risks

(a) Custody Arrangements and Clearing Systems

Underlying Assets may be held by a Custodian on behalf of the Issuer pursuant to the Custody Agreement(s). The respective Custodian may hold such assets (i) through its accounts with any relevant clearing system as appropriate, and (ii) through its sub-custodians who will in turn hold such assets which are securities both directly and through any appropriate clearing system. Those assets held in clearing systems will not be held in special purpose accounts and will be fungible with other securities from the same issue held in the same accounts on behalf of the other customers of the Custodian or its sub custodian, as the case may be. A first fixed charge over the Underlying Assets will be created under English law pursuant to the Trust Deed which will, in relation to the Underlying Assets that are held through a Custodian, take effect as a security interest over (i) the beneficial interest of the Issuer in its share of the pool of securities or other assets fungible with the relevant Underlying Assets held in the accounts of the Custodian for the benefit of the Issuer and (ii) the Issuer's ancillary contractual rights against the Custodian in accordance with the terms of the Custody Agreement (as defined in the Conditions) which may expose the Securityholders to the risk of loss in the case of a shortfall if the Custodian or its sub-custodian becomes insolvent.

In addition, custody risks may be associated with Underlying Assets that do not clear through any relevant clearing system. There is a risk, for example, that such Underlying Assets could be subject to a defect in title or claims to ownership by other parties, including custody liens imposed by standard custody terms at various stages in the chain of intermediary ownership of such Underlying Assets.

Any risk of loss arising from any insufficiency or ineffectiveness of the security or the custody and clearance risks will be borne by the Securityholders without recourse to the Issuer or any other party.

(b) Fixed Security

The English law security constituted by the Trust Deed over the Underlying Assets and Secured Property held from time to time, including the security over the Issuer Accounts, is expressed to take effect as a fixed charge, The law in England and Wales relating to the characterisation of fixed charges

is unsettled. The fixed charges purported to be granted by the Issuer (other than by way of assignment in security) may take effect under English law as floating charges only if, for example, it is determined that the Security Trustee does not exert sufficient control over the assets subject to such charge. Any floating charge would rank after a subsequently created fixed charge and behind any statutorily preferred creditors. Although the Issuer has agreed in the Trust Deed not to create any such subsequent fixed charge in favour of any other creditor and other covenants in the Programme Documents are intended to ensure the Issuer has no significant creditors other than the secured creditors under the Trust Deed, it will be a matter of fact as to whether the Issuer does have any other such creditors at any time. Accordingly, a recharacterisation of a fixed charge granted by the Issuer as a floating charge may negatively impact on the value of the Securities and a Securityholder may lose some or even all of their investment in the Securities. For further information, please see also risk factor 2.1.2 (e) “*Jersey insolvency procedures, Foreign law governed security*” above.

2.3 Specific risks applicable to each Class of Securities depending on the Underlying Asset

Depending on the Underlying Asset of the respective Class of Securities, an investment in a Class of Securities involves certain risks associated with the characteristics and features of the respective Underlying Asset:

2.3.1 Risks specific to Cryptocurrency Linked Securities, Crypto-Basket Linked Securities and Crypto-Index Linked Securities

(a) Adoption Risk

Cryptocurrencies are essentially digital protocols that rely on large numbers of people to be active in them for a given protocol to add utility to its users. The use of digital assets may vary considerably, as may expectations of future use. This means that the values of digital assets including Cryptocurrencies are likely to be highly speculative based on the future potential use case and the expectations for growth of adoption by users. If adoption levels drop, or fail to meet growth expectations, then this could cause the price of the Cryptocurrency and ultimately the value of the Securities to fall or be lower than it otherwise would have been.

Adoption of a Cryptocurrency could fall or increase at a lower rate than expected for several reasons including:

- Competition from alternative digital assets
- Changes to the protocol altering the use case
- Ethical concerns over energy usage or perceived usage in criminal activity

(b) Price Formation

- Price setting and Supply & Demand

Prices for Cryptocurrencies are set entirely by market forces and are therefore driven by the supply and demand dynamics of a given Cryptocurrency. Cryptocurrencies typically do not have any cash flow associated with them, so fundamental valuations typically do not exist. In many cases, there may be limited use of the Cryptocurrency and potential use cases are still being explored. As a result, changes in the supply and demand for the digital asset may be based largely on sentiment.

Changes in the balance of buyers and sellers can vary wildly over time and even throughout a given day, leading to high levels of volatility which could impact the price of the Cryptocurrency and ultimately the value of the Securities. Volatility may cause the price of Securities at the time they are redeemed or sold to differ from the price of such securities at the time the related Cryptocurrency is delivered to the redeeming Securityholder or the proceeds from its sale transferred to such investor.

Changes in the depth of demand for and supply of the digital asset may impact the liquidity of the digital asset as well as its price, which in turn would impact the liquidity and price of the relevant Security.

- **Exchanges and Valuation**

Many Cryptocurrency exchanges have been developed to facilitate trading in digital assets including the Cryptocurrencies. The price of a given crypto-asset will typically be the price at which it was last traded which may become stale in an asset that is thinly traded. Multiple exchanges lead to multiple sources for the last traded price and, consequently, there may be discrepancies in valuing a given crypto asset.

During time of market stress, deviations can become more severe and may lead to greater uncertainty as to the value of a crypto-asset among investors. This could adversely affect the price of Cryptocurrencies and consequently the value of an investment in Securities.

- **General Volatility & Daily Volatility**

Cryptocurrencies may be subject to very high levels of volatility. Different factors can influence this volatility which include, but are not limited to, rapid technology development, changes in regulation, news releases and investor sentiment. Investors should be aware that the value of their investment may change rapidly over a short time periods (less than one day).

- **Large Holders**

Investors with large holdings may have a significant impact on supply/demand balance and may influence the price movement if they sell a significant portion of their holdings. While this is the case for most asset classes, the impact on digital assets including the Cryptocurrencies may be greater given:

1. the tendency for protocol creators and miners to hold large positions during the initial stages of a protocol's deployment in excess of what is seen in other asset classes;
2. the relatively thin volumes observed for digital assets; and
3. that markets in Cryptocurrencies tend not to be covered by legal and regulatory regimes prohibiting market abuse, market manipulation and similar market conduct commonly banned in securities markets.

This may have a negative impact on the price and the other Cryptocurrency holders may suffer losses as a result.

(c) *Timing of settlement of Redemptions and Compulsory Redemptions*

The Conditions of the Programme grant the Issuer discretion as to the exact timing of Redemptions and Compulsory Redemptions of Securities. This reflects that there is no set timescale for the settlement of transactions in Securities. This means that there is no certainty that a holder of Securities will receive settlement of a Redemption or Compulsory Redemption on any particular date.

(d) *Tax*

Depending on the investor's country of residence, a holding in digital assets may have tax implications, such as value added tax or capital gains tax. Therefore, investors should consider whether such tax liabilities apply when investing in the Securities. Each investor will assume and be solely responsible for any and all taxes of any jurisdiction, including central government or local state taxes, which may be applied in respect of Securities.

As the digital assets space is relatively new and does not have an established template for tax administration, the Issuer may be subject to tax liabilities with which it disagrees and this may lead to legal disputes which might impact the effective running of its operations. The Issuer may redeem all outstanding Securities at any time at its discretion, i.e. also for tax reasons.

(e) AML and KYC Risks relating to Cryptocurrencies

The regulation of Cryptocurrencies is subject to change and, as Securities are relatively new investments, the AML and KYC standards relating to Cryptocurrencies are continually evolving. As a result of such changes, the Issuer's AML and KYC standards and policies may differ from other counterparties in the market. The Issuer will only obtain Cryptocurrency from counterparties that meet its AML and KYC standards, which may limit the amount of Cryptocurrency that can be obtained by the Issuer. This could adversely affect the liquidity of the Securities in comparison to the liquidity of Cryptocurrencies available in the wider market.

Further, evolving anti-money laundering and know-your-customer standards with respect to Cryptocurrencies may mean the Issuer's standards may be different or more or less restrictive than some Cryptocurrency exchanges and other market participants limiting the Cryptocurrencies that can be used to subscribe for Cryptocurrencies to those which are not sourced from suspect sources. This may impair liquidity in the Securities versus the underlying market.

(f) Storage Risk for Cryptocurrencies

Cryptocurrencies reside on the public blockchain in a distributed ledger, which means it is not held by a central authority at a single location, but rather distributed among a network of users. The ledger in public blockchains is transparent and available for everyone to view how much coins are available to spend from each address in the blockchain (which can be thought of as a kind of 'account'). However, to spend the coins from a particular address and transfer them to another address requires the use of a private key. Securing the private keys that enable assets to be transferred is therefore crucial to safeguarding the assets.

Physical storage of blockchain private keys in paper or electronic form, where the keys are generated from an offline system, is a popular solution. Investors who independently store private keys directly in this way risk losing access to their digital assets (including Cryptocurrency). This could be either through forgetting encryption passwords to access keys or losing the recovery seed to hardware wallets. Alternatively, investors may underestimate the requirement to ensure effective backups of keys, risking the loss of their investments if the medium used to physically store private keys was to fail, rendering the digital assets inaccessible and incapable of being realised. Instances of investors losing access to digital assets may adversely affect the levels of adoption and use of digital assets (including Cryptocurrencies), as well as investor sentiment towards them. This could adversely affect the price of Cryptocurrencies and consequently the value of an investment in Securities.

The Issuer will partner with reputable specialist institutional crypto custody firm(s) to minimise the risk of loss of assets. Institutional custodian solutions may vary in their specific security implementation and process. However, they often will offer duplicate high security vaults for safekeeping of private keys with elaborate security protocols surrounding access to the vaults and withdrawals from addresses associated with the private keys stored or encrypted in the vault. Such arrangements offer high levels of security versus other ways of holding cryptocurrencies. However, there is no guarantee that these arrangements fully protect from loss of assets. Furthermore such elaborate security protocols often introduce intentional friction and delays to accessing assets, which mean that in some instances assets may not be accessible and their value may not be realisable immediately, which may result in a loss in cases where the price of the relevant cryptocurrencies moves adversely. The jurisdiction or geography in which private keys are stored by the custodian firm, in case they are stored physically or on paper, may also affect the ability to withdraw assets in instances where regulation changes.

The Issuer will not be able to access its assets for a period of time should the custodian experience any kind of systematic failure relating to technology, process or people.

(g) Blockchain Risks

The factors below explain some of the key risks originating from the blockchain infrastructure.

- Private Key Risks

The private key used to prove ownership of digital assets and required to sign valid transactions may be stored in electronic form on general computers, hardware security modules (HSMs), or mobile USB devices. Alternatively, private keys can also be stored on printed paper form as Quick Response Codes (“QR codes”), list of words, or text form of the actual random number that is the private key. Whichever form the private key takes it can be damaged, lost or stolen while in storage or when in use to sign transactions. When used to sign transactions, the risk of private key theft is heightened as security measures like encryption need to be reversed in order to access and use the private key. If private keys are compromised investors risk a partial or total loss of digital assets.

- Consensus Attacks Risks

A blockchain network can be susceptible to a 51% attack when a malicious actor or actors controls the majority of the hashing power (i.e. the control of the majority of the computing power to mine blocks sometimes called a “51% attack”). With the majority control of the mining of blocks the actor can initiate forks in the blockchain and double spend native coins to the blockchain or prevent the successful settlement of specific transactions or transactions associated with particular addresses. The 51% threshold is the level which would almost guarantee a malicious actor’s success. However, such attacks could in theory occur at thresholds lower than 51% of the available hash power.

If such an attack occurred, investor sentiment in the infrastructure around Cryptocurrencies could be adversely affected, effecting demand and therefore ultimately the price of a Cryptocurrency, thus adversely impacting the value of the relevant Securities.

- Double-Spending Risks

Transactions on the blockchain can be subject to double spend (i.e. the same digital asset could be spent twice). Such a risk would result from a successful so called 51% consensus attack where malicious actor(s) gain enough hash power to create a valid new block containing an instance of a double-spend transaction. Additional valid blocks are included to ensure these transactions and blocks become the accepted record of truth by all blockchain participants. Cases of double spending may adversely affect confidence in the affected digital asset as well as in digital assets more generally, causing the use and acceptance of digital assets to be reduced. This could adversely affect the price of Cryptocurrencies and consequently the value of an investment in Securities.

A double-spend attack can cancel one of the transactions involved. Therefore, it can affect the transfer or exchange of assets so it may not be recoverable and may cause a partial or total loss to the investors.

(h) Product Governance & Forking

- Protocol changes

Changes to the consensus rules a blockchain uses to validate transactions or blocks can result in either a hard or soft fork of the blockchain. In a hard fork, the system agrees to adopt new consensus rules which are not forward compatible. This means that nodes which do not upgrade to the new rules will not be able to validate blocks and transactions based on the new consensus rules. The hard fork occurs once the blockchain splits in two with a set of nodes running under the new rules and the remaining nodes operating under the old rules. This could result in two divergent chains containing different sets of transactions and blocks. The creation of a competing blockchain and the incompatibility of the opposing consensus rules means that hard forks are often contentious events.

Soft forks are changes to consensus rules that are forward compatible. Nodes on the blockchain that decide not to support the new rules can still validate transaction and blocks proposed by nodes running under new consensus rules. This is because soft forks constrain the consensus rules as opposed to hard forks which expand the rules.

Forks are inherent to the cryptocurrency ecosystem and help to facilitate security and efficiency developments. For investors, hard forks potentially come with risks to their underlying crypto investments as competing blockchains are vying for acceptance. There is a risk that as a result of a hard fork, digital assets (including Cryptocurrencies) are converted into a different digital asset, which may have a very different price or value. This may adversely affect confidence in the affected digital asset and in digital assets more generally, causing the use and acceptance of digital assets to be reduced and adversely affecting the price of Cryptocurrencies and the value of an investment in Securities.

- **Impact on trading**

Changes to the protocol, whether hard forks, soft forks or other changes may result in disruptions to the trading environment including increases in price volatility, decreases in liquidity and suspension or delisting from trading on a given venue. This is more likely to occur when a contentious change is implemented that affects the adoption of protocol or results in a Hard Fork. Any changes that affect the proper functioning of a digital asset including the Cryptocurrencies may also increase price volatility, reduce liquidity and may cause venues to suspend or delist the asset. This could adversely affect the price of the Cryptocurrency and consequently the value of an investment in Securities.

- **Code changes that damage reputation of digital assets**

Code changes affecting blockchain protocols, consensus rules or mining procedures can be highly contentious and complex due to the distributed nature of blockchains. There is potential of far reaching negative repercussions for the reputation of affected digital assets if security vulnerabilities are introduced and the security of the blockchain is placed in doubt. As a result, the responsibility for agreeing and implementing such changes is shared throughout the blockchain ecosystem with miners, core blockchain developers, wallet providers and users of the blockchain. Code changes accepted by the community which go on to undermine the blockchain could force migration of participants onto alternative blockchains, risking the valuation of native blockchain currencies for investors.

(i) *Staking arrangement in respect of certain Underlying Assets*

Where Staking Arrangements are permitted in the Final Terms for that Security, the Issuer may enter into staking arrangements where it uses a proportion of the Underlying Assets to engage with Proof-of-Stake activities. Underlying Assets which are used to engage with Proof-of-Stake activities are likely to be required to be held in an unsegregated hot wallet and therefore more exposed to the internet and to counterparty risk to the holder of the unsegregated hot wallet than when held in segregated cold storage address accounts.

(j) *Hacking*

The blockchains in existence today use public key cryptography to sign transactions and prove ownership of funds, implement consensus rules to approve valid blocks of transactions and an immutable distributed ledger for recording transactions to provide a tamper proof history of transactions and proof of funds. Publicly known instances of hacking have tended to be against crypto exchanges, wallets and computer systems interfacing with blockchains.

Blockchains though are not immune to hacks. Implementations of technical updates are often open-source making vulnerabilities easier to identify and exploit. Transactions may be impossible to reverse, increasing the attraction for hackers and blockchain technology is relatively new with security improvements and controls having to be developed and deployed in the public glare of a live system. Security vulnerabilities continue to be exploited in the transferring of assets and systems interfacing with the blockchain such as exchanges, wallet and custodian providers.

Instances of hacking affecting systems interfacing with blockchain or affecting blockchains themselves may adversely affect the levels of adoption and use of digital assets (including Cryptocurrencies), as well as investor sentiment towards them. This could adversely affect the price of Cryptocurrencies and consequently the value of an investment in Securities. While the Custodians maintain private keys in

cold storage and implement a range of security measures to prevent successful hacking, it is possible that a Custodian or a system interfacing with a Custodian (such as a Securityholder's wallet) could be subject to hacking.

In addition, in the case of Basket Linked Securities and/or Index Linked Securities, if Cryptocurrency is being traded during a Rebalancing Period in respect of such Basket Linked Securities and/or Index Linked Securities or (in the case of all Securities) if the Cryptocurrency is in transit from Authorised Participants to the vault or from the vault to Authorised Participants, such Cryptocurrency will be exposed to the internet and thus to additional risk of hacking. Any such hacking could result in the theft of Cryptocurrency, and transactions in Securities being ineffective creations and redemptions of the Issuer.

(k) Risks whilst in transit

- Private Key Risk

While transferring digital assets specific risks should be noted. To initiate a transfer of assets a transaction must be signed using the private key of the asset holder. The private key should remain secret at all times. If the private key is not secured when in use an asset holder risks their private key being obtained by third parties, including criminals, and risk losing all or some of their investments.

- Trading Account Authentication

Exchanges are a popular venue for crypto asset investors to store assets and facilitate transactions with other participants. As with any financial transaction crypto asset holders need to ensure adequate controls are in place to authenticate themselves on these platforms. Failure to follow security best practices, including multifactor authentication (MFA), well-formed strong passwords and checks on the validity of exchange URLs may risk unauthorised transfer and loss of assets.

(l) Technology and Software Risks

- Endpoints

Endpoints are the physical devices like computers or smart phones used to connect and access a blockchain system. When accessing a blockchain from an endpoint, security is potentially at its most compromised. At this time, the private key credentials used to sign transactions on the blockchain can be both at their least secure and at their most accessible to theft. The level of vulnerability depends on how the private keys are stored and the overall security applied to the endpoint. Security best practice includes, but is not limited to, encrypting private keys and storing them on devices not permanently connected to the Internet, signing transactions on offline devices, then transmitting only signed transactions and ensuring endpoint devices are routinely checked for malware and viruses. The Custodians implement such measures but there is no guarantee Endpoints security could not be breached, which may result in Securityholders losing all or a proportion of their investments.

- Proprietary Issuer and Custodian Technology

Institutional management of digital assets generally employs further layers of technology and systems responsible for the safekeeping of assets. These technologies are additional to the native built-in security measures of any single blockchain and, therefore, include potential vulnerabilities for exploitation by bad actors. Custodians will utilise a range of encryption measures to secure blockchain private keys used to prove ownership of funds, typically storing encrypted keys in bank grade hardware security modules or HSMS. Other proprietary and confidential technologies and systems provide additional layers of security.

The Administrator and the Issuer use proprietary technology provided by the Custodians and the Issuer to manage the transfer of Cryptocurrencies in and out of issuers blockchain addresses.

Security controls ensure system access is split across internal roles within the Custodians, Administrator and Issuer, with role redundancy built in.

Major security compromises in these proprietary systems, or unavailability of a large proportion of operational staff beyond the agreed security protocols and procedures, may result in security holders losing all or a proportion of their investments.

(m) *Forking*

A fork is a change of the blockchain protocol version which is distinct from the main one. It can cause several risks such as the trading may be temporarily or indefinitely suspended and the prices can be negatively impacted. A hard fork may result in Cryptocurrency held as collateral with respect to Securities becoming a new forked digital asset. If this were to happen then it could reduce the amount of Cryptocurrency held as collateral with the relevant Custodian(s), the Underlying Specific Entitlement of a Securityholder, and the value of the Securityholder's holding of Securities.

Securityholders may not receive the forked currency depending on the custodian policy. There is no obligation for the Custodians to support the inclusion of any forked assets. The reasons of the fork and the occurrence of this one for a specific Cryptocurrency can be different and unique so it can cause several risks in term of trading, operation, settlement, security, pricing and so on.

Any forked assets that are supported by the Custodians will be compulsorily redeemed by the Issuer and may not have any value. A holder of Securities may not be able to participate in any upside of forked assets as a result of this compulsory redemption.

(n) *Airdrops*

An airdrop occurs when the issuer of a new crypto asset declares to the holder of another specific crypto asset that they will be entitled to claim for free a quantity of the new crypto asset because they are holding this specific other crypto asset. If an airdrop occurs intended to benefit holders of a Cryptocurrency, then the ability of a holder of Securities relating to such Cryptocurrency to participate in the airdrop will depend on the support of the relevant Custodian(s). There is no obligation on a Custodian to support any airdrop or hold the airdropped digital asset and so there is no certainty that holders of Securities will be able to obtain any airdropped digital assets or realise any value from them.

(o) *Risk of Late Settlement*

Owing to the security measures associated with storing digital assets including Cryptocurrencies, large redemptions can result in longer than standard settlement periods as Cryptocurrencies are moved out of cold storage or between Custodians as required. This delay in the redemption process can lead to settlement delays in the secondary market. This increases the risk that the price of Securities at the time the decision is taken to redeem them differs from the price at the time the related Cryptocurrency is delivered to the redeeming security holder or the proceeds from its sale transferred to him.

(p) *Irreversible Transactions*

As mentioned above, transactions within the blockchain are generally irreversible. Any errors in the transfer of assets may not be recoverable and may cause a partial or total loss to the investors. This is a consequence of the distributed nature of blockchains and the lack of a central authority in many blockchains where investors do not have recourse to raise and resolve transaction disputes.

(q) *Rebalancing risk between Custodians*

At launch, Cryptocurrencies collateralising Securities will be held with the initial Custodians. However, the Issuer may subsequently appoint additional Custodian(s) so that a Cryptocurrency supporting a Class of Securities may be held with additional Custodians. Utilising several Custodians may trigger different transfers between them and may cause additional transfer cost but also security risk.

(r) Illegality

Although currently Cryptocurrencies are not regulated or are lightly regulated in most countries, one or more countries may take regulatory actions in the future that severely restricts the right to acquire, own, hold, sell or use or exchange a particular Cryptocurrency. Such an action may also result in the restriction of ownership, holding or trading in the relevant Cryptocurrency. Such a restriction could result in the compulsory redemption of Securities at a time that is disadvantageous to Securityholders.

2.3.2 Risks specific to Equity Linked Securities, Equity-Basket Linked Securities and Equity-Index Linked Securities

(a) General

Equity Linked Securities, Equity-Basket Linked Securities and Equity-Index Linked Securities are not in any way sponsored, endorsed, sold or promoted by the issuer of the underlying shares and such issuers make no warranty or representation whatsoever express or implied, as to the future performance of the underlying shares. Furthermore, the issuers of the underlying shares do not assume any obligations to take the interests of the Issuer or those of the Securityholders into consideration for any reason. None of the issuers of the underlying shares will receive any of the proceeds of the offering of the Securities made hereby and is responsible for, and has participated in, the determination of the timing of, prices for or quantities of, the Securities. The investment in the Securities does not result in any right to receive information from the issuer of the shares, to exercise voting rights or to receive distributions on the shares.

(b) Emerging Market Shares

The Securities may be linked to and secured by Shares of companies with their corporate seats and core business located in emerging market countries. Potential risks related thereto are high rates of inflation; volatile interest rate levels; balance of payments; the extent of governmental surpluses or deficits in the relevant country; the possibility of expropriation of assets; confiscatory taxation and political or social instability or diplomatic developments. All of these factors are, in turn, sensitive to the monetary, fiscal and trade policies pursued by the governments of the related countries. Furthermore certain financial markets, while generally growing in volume, have, for the most part, substantially less volume than more developed markets, and securities of many companies may be less liquid and their prices more volatile than securities of comparable companies in more sizeable markets, thus affecting the value of the Underlying Assets. This might lead to a loss to a Securityholder if a Securityholder is selling its Securities and the value of those Securities has dropped below the value of such Securities at the time of the initial purchase by the Securityholder.

(c) Depositary receipts

The Securities may be linked to and secured by depositary receipts (American Depositary Receipts, Global Depositary Receipts and European Depositary Receipts). These are instruments that represent shares in companies trading outside the markets in which the depositary receipts are traded. Accordingly whilst the depositary receipts are traded on recognised exchanges, there may be other risks associated with such instruments to consider- for example the shares underlying the instruments may be subject to political, inflationary, exchange rate or custody risks. If this is the case, holdings of the depositary receipt, and, accordingly, the Underlying Assets, might be negatively affected. This might lead to a loss to a Securityholder if a Securityholder is selling its Securities and the value of those Securities has dropped below the value of such Securities at the time of the initial purchase by the Securityholder.

(d) Reset risk

In case of an event where the Share(s) constituting the Equity Entitlement (i) can no longer be made available by the issuer or (ii) are no longer available due to the Share(s) reaching their maturity date (if any) or are otherwise cancelled or terminated (a “**Reset Event**”), the Equity Entitlement of the relevant Class of Equity Linked Securities shall be adjusted as further set out Condition 7 of the relevant Issue Specific Option IV. This might result in a replacement of the Equity Entitlement for the relevant Share(s) held in the Secured Property with an Equity Entitlement consisting of (i) solely the additional share(s) or (ii) the Share(s) and the additional share(s). Accordingly, the Issuer may in certain

circumstances effect such adjustment, which might – although the Issuer is required to take into account the interests of the Securityholders – have a negative impact on the return for Securityholders of that Class.

2.3.3 Risks specific to ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities

(a) *Risks specific to ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities in case of an open-end fund*

ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities linked to an open-end fund are Debt Securities or Fund-Shares (in each case as defined in the relevant Issue-Specific Option) which do not provide for predetermined payout amounts and/or interest payments. Redemption amounts will depend on the market value of the Fund-Share which might be substantially less than the issue price or, as the case may be, the purchase price invested by the Securityholder and may even be zero in which case the Securityholder may lose his entire investment.

ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities linked to an open-end fund are not in any way sponsored, endorsed, sold or promoted by the Fund Manager of the underlying Fund-Share and such Fund Manager makes no warranty or representation whatsoever express or implied, as to the future performance of the underlying Fund-Share.

ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities are particularly dependent on the performance of the replicated index, basket of underlying assets or underlying asset. Since open-end funds such as ETFs can replicate different investment classes, such as equity instruments, debt instruments, pension instruments, commodities, indices of all kinds (including, but not limited to equity indices, commodity indices and bond indices) etc., an investor must be able to assess the characteristics of the replicated index, basket of underlying assets or underlying asset and their risks in order to evaluate the performance of the respective open-end fund, for example an ETF.

In the event of a downward movement of the index, basket of underlying assets or underlying asset replicated by such funds, the value of the respective fund generally falls as well.

In addition to funds which solely replicate investment classes, ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities may also be linked to funds, which follow a “short” or “inverse” strategy, which aims to increase in value if the respective benchmark investment class falls in value. These strategies are typically utilise short-selling, futures contracts or other derivative instruments to create an investment product with a performance inverse to its benchmark.

In case of such “short” or “inverse” strategy funds, and in case of an upward movement of the benchmark, the value of the respective fund generally falls.

The occurrence of divergences between the price of the open-end fund and that of the replicated index, basket of underlying assets or underlying asset cannot be excluded (Tracking Error). Although open-end funds are not actively managed, there is usually a management fee that can affect the value of the fund and thus indirectly the value of the Securities. If an open-end fund is not constantly funded, in the long term, the investment company may close such open-end fund. Given that redemption amounts will depend on the market value of the Fund-Share, a closure of the fund might result in the Securityholder losing part of or even all of its investment.

(b) *Risks specific to ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities in case of a closed-end fund*

ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities linked to an closed-end fund are Debt Securities or Fund-Shares (each as defined in the relevant Issue-Specific Option) which do not provide for predetermined payout amounts and/or interest payments. Redemption amounts will depend on the market value of the Fund-Share which might be substantially less than the issue price or, as the case may be, the purchase price invested by the Securityholder and may even be zero in which case the Securityholder may lose his entire investment.

ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities linked to an closed-end fund are not in any way sponsored, endorsed, sold or promoted by the Fund Manager of the underlying Fund-Share and such Fund Manager makes no warranty or representation whatsoever express or implied, as to the future performance of the underlying Fund-Share. Furthermore, the Fund Manager of the underlying Fund-Share does not assume any obligations to take the interests of the Issuer or those of the Securityholders into consideration for any reason. The Fund Manager of the underlying Fund-Share will not receive any of the proceeds of the offering of the relevant Securities made hereby and is not responsible for, and has not participated in, the determination of the timing of, prices for or quantities of, such Securities. The investment in the Securities does not result in any right to receive information from the Fund Manager of the Fund-Share, to exercise voting rights or to receive distributions on the Fund-Shares.

The market value of the Fund-Share depends on the net asset value of the respective closed-end funds which is calculated regularly, based on the value of the assets in the closed-end fund which may be influenced by factors such as dividend levels, portfolio credit quality, general market conditions and relative demand and supply of the respective shares in the market.

To the extent the closed-end fund invests in common stocks, preferred stocks, convertible securities, rights and warrants, it will be exposed to equity risk. Equity markets may experience volatility and the value of equity securities may move in opposite directions from each other and from other equity markets generally. Preferred stocks often behave more like fixed income securities. If interest rates rise, the value of preferred stocks having a fixed dividend rate tends to fall. The value of convertible securities fluctuates with the value of the underlying stock or the issuer's credit rating. Rights and warrants do not necessarily move in parallel with the price of the underlying stock and the market for rights and warrants may be limited.

In case the relevant closed-end fund concentrates its investments in certain industries, the relevant portfolio may be significantly impacted by the performance of the respective market and may experience more volatility and be exposed to greater risk than a more diversified portfolio.

Further, unlike open-end funds, closed-end funds do not continuously offer shares and do not provide for daily redemptions. Rather, if a shareholder determines to buy additional shares or sell shares already held, the shareholder may do so by trading through a broker on the stock exchange (if the shares are listed) or otherwise. Shares of closed-end investment companies frequently trade on an exchange at prices lower than the net asset value.

Unlike open-end funds, closed-end funds are subject to management risk because they are actively managed investment portfolios. The portfolio managers will apply investment techniques and risk analyses in making investment decisions for the fund, but there can be no guarantee that these will produce the desired results. There is a risk that the managers' skill in determining the allocation of assets and in selecting the best mix of investment as well as their evaluation and assumptions regarding asset classes or investments may be incorrect in view of actual market conditions. In addition, actively managed funds are subject to management fees and other expenses.

All these factors might impact the market value of the Fund-Share and, therefore, redemption amounts payable to the Securityholders of ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities, as applicable.

(c) *Risks specific to ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities in case of commodity linked underlyings*

The ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities may also be linked to commodities or indices comprised of commodities (or futures contracts on such commodities).

A commodity is a basic good used in commerce that is interchangeable with other commodities of the same type. The sale and purchase of commodities is usually carried out through futures contracts on exchanges that standardise the quantity and minimum quality of the commodity being traded.

A commodity index tracks the performance of a specified number of commodities (or futures contracts on such commodities). The index is computed from the prices of the commodities such index is comprised of.

Commodity markets are influenced by, among other things, changing supply and demand relationships, weather, governmental, agricultural, commercial and trade programs and policies designed to influence commodity prices, world political and economic events, changes in interest rates and factors affecting the exchange(s) or quotation system(s) on which any such commodities may be traded.

In case the value of the relevant commodity or commodity index falls, this will also have an adverse impact on the value of the ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities linked to such commodity or index. Accordingly, any investor that purchased such Securities at a higher price may lose the value of part or all of its investment if it is not able to sell its Securities quickly and/or at a price such that the investor is able to prevent or minimise any loss of its investment.

(d) Risks specific to ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities in case of funds replicating emissions allowances

The ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities may also be linked to emissions allowances (or futures contracts on such).

The price of emissions allowances may fluctuate widely and is affected by numerous factors, such as global or regional political, economic, environmental or financial events. In case of events and situations which depress economic activity, demand for emissions allowances may weaken causing their price to fall. Very mild winters or very cold summers can decrease demand for electricity and therefore cause utilities to purchase fewer emissions allowances thus causing their price to fall.

Prices of emissions allowances are also affected by activities and emissions of energy-intensive sectors such as those that are subject to the respective compliance schemes. Weaker activity in such sectors may reduce the demand for allowances and thus cause their price to fall. Additionally, advances in technologies for the reduction of greenhouse gases may result in companies being able to reduce their greenhouse gas emissions more quickly and cheaply, thus needing to purchase fewer emissions allowances which may cause the price of emissions allowances to fall.

The price of emissions allowances may also be affected by reduced demand based on the use of government policies to encourage or require the reduction of emissions of greenhouse gases which may reduce the incentive for companies to purchase emissions allowances (as against taking other actions), thus causing the price of emissions allowances to fall as well as by lobbyist, political or governmental goals or policies with respect to climate change and the imposition of environmental plans or climate goals such as achieving carbon neutrality, if such are perceived to be weaker or less credible.

In case the value of the relevant emission allowance decreases, this will also have an adverse impact on the value of the ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities linked to such emission allowance. Accordingly, any investor that purchased such Securities at a higher price may lose the value of part or all of its investment if it is not able to sell its Securities quickly and/or at a price such that the investor is able to prevent or minimise any loss of its investment.

This might lead to a loss to a Securityholder if a Securityholder is selling its Securities and the value of those Securities has dropped below the value of such Securities at the time of the initial purchase by the Securityholder.

(e) Risks specific to ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities with equity instruments as underlying

The ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities may be linked to equity instruments. In such case, the risks set out above in section 2.3.2 apply accordingly.

(f) Risks specific to ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities with fixed income instruments as underlying

The ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities may be linked to fixed income instruments such as (a) bonds issued by corporate issuers (such as euro medium term notes or structured notes) or by governmental and supranational bodies (government bonds), (b) fixed income interest rate swaps, (c) bank deposits, (d) certificates of deposits or (e) bank loans.

The market value of fixed income instruments is especially sensitive to interest rate changes. Interest rates are strongly affected by public budget policy, the policies of the relevant central bank(s), the overall economic development and inflation rates, as well as by foreign interest rate levels and exchange rate expectations. However, the importance of individual factors cannot be directly quantified and may change over time. In general, prices of fixed income instruments will increase as interest rates fall and decrease as interest rates rise. The magnitude of these fluctuations in the market price is generally greater for those fixed income instruments with longer maturities.

To the extent that the fixed income instruments may be prepaid at the option of the obligor, the sensitivity of such fixed income instruments to changes in interest rates may increase (to the detriment of the ETP) when interest rates rise.

These principles also apply to bonds issued by governmental or other supranational bodies (so called government bonds). A bond backed by the “full faith and credit” of a governmental or other supranational body is guaranteed only as to its stated interest rate and face value at maturity, not its current market price. Just like other fixed income instruments, government bonds will fluctuate in value when interest rates change.

In case of rising market interest rates, this will also have an adverse impact on the value of the ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities linked to such fixed income instrument. Accordingly, any investor that purchased such Securities at a higher price may lose the value of part or all of its investment if it is not able to sell its Securities quickly and/or at a price such that the investor is able to prevent or minimise any loss of its investment.

Additionally, Securityholders of the ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities linked to a fixed income instrument bear the risk that the issuer/debtor of such fixed income instrument is not able to meet its obligations under such fixed income instruments, irrespective of whether such instruments are referred to as capital or principal protected or how any principal, interest or other payments under such instruments are to be calculated. If such risk materialises, then that would have a significant negative impact on the Securityholder’s return on the ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities and a Securityholder may lose up to its entire investment.

(g) *Risks specific to ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities with foreign exchange rates as underlying*

The ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities may be linked to foreign exchange rates (FX).

The performance of foreign exchange rates, currency units or units of account is dependent upon the supply and demand for currencies in the international foreign exchange markets, which are subject to economic factors, including inflation rates in the countries concerned, interest rate differences between the respective countries, economic forecasts, international political factors, currency convertibility and safety of making financial investments in the currency concerned, speculation and measures taken by governments and central banks. Such measures include, without limitation, imposition of regulatory controls or taxes, issuance of a new currency to replace an existing currency, alteration of the exchange rate or exchange characteristics by devaluation or revaluation of a currency or imposition of exchange controls with respect to the exchange or transfer of a specified currency that would affect exchange rates as well as the availability of a specified currency.

In connection therewith it should be noted that especially emerging market currencies can be significantly more volatile than currencies of more developed markets. Emerging markets currencies are highly exposed to the risk of a currency crisis happening in the future. These factors result in such exchange rates having an increased risk profile.

If the underlying exchange rate decreases, this will also have an adverse impact on the value of the ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities linked to such exchange rate. This might lead to a partial or even total loss to a Securityholder if a Securityholder is selling its Securities and the value of those Securities has dropped below the value of such Securities at the time of the initial purchase by the Securityholder.

(h) *Risks specific to ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities with volatility instruments as underlying*

The ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities may be linked to volatility strategies. Volatility instruments are primarily based on purchases and sales of futures contracts, call options, and put options on volatility futures.

Volatility futures contracts are unlike traditional futures contracts and are not based on a tradable reference asset. Instead, they are based on a not directly investable index, the levels of which represent the market's expectations for the relative strength of near-term price changes of a specified underlying index.

Volatility futures contracts can be highly volatile and may experience sudden, large and unexpected losses. The market for volatility futures contracts may fluctuate widely based on a variety of factors including changes in overall market movements, political and economic events and policies, wars, acts of terrorism, natural disasters (including disease, epidemics and pandemics), changes in interest rates or inflation rates. The more dramatic the price swings are in the index, the higher the level of volatility, and vice versa.

This will also have an adverse impact on the value of the ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities linked to such volatility instrument and may result in a partial or even total loss to a Securityholder if a Securityholder is selling its Securities and the value of those Securities has dropped below the value of such Securities at the time of the initial purchase by the Securityholder.

(i) *Risks specific to ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities with short instruments as underlying*

The ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities may be linked to short instruments.

Short instruments are ETPs, the terms and conditions of which provide that the amount payable (or deliverable) on the ETPs is based upon the negative performance or falling price, value or level of an underlying asset.

Accordingly, in the case of short instruments, a loss in the value of the underlying asset of the short instrument will result in a gain in the value of the short instrument itself.

In case of rising levels of the underlying asset of the short instrument, the value of the short instrument will therefore decline. This will have an adverse impact on the value of the ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities linked to such short instrument. This might lead to a partial or even total loss to a Securityholder if a Securityholder is selling its Securities and the value of those Securities has dropped below the value of such Securities at the time of the initial purchase by the Securityholder.

With respect to ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities that may be linked to short leveraged instruments, please see also „*Risks specific to ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities with leveraged instruments as underlying*” below.

(j) *Risks specific to ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities with leveraged instruments as underlying*

The ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities may be linked to leveraged instruments.

Leveraged instruments are ETPs, the terms and conditions of which provide that the amount payable (or deliverable) on the ETPs is based upon the performance, price, value or level of an underlying asset multiplied by a factor which is over 100 per cent. (so called “leverage”).

The higher the leverage, the more sensitive the Securities will be to any changes in the value of the underlying.

Due to the ETP Linked Securities’, ETP-Basket Linked Securities’ and ETP-Index Linked Securities’, as applicable, daily investment goals, the relevant Security’s return over holding periods longer than one day will likely differ from the leveraged return of the relevant leveraged instrument forming the underlying asset of such Security and this difference will become more adverse as the holding period increases in length. The Securities are designed to track the daily percentage movement in the value of the relevant underlying asset(s) multiplied by a particular leverage factor. The return from holding ETP Linked Securities, ETP-Basket Linked Securities or ETP-Index Linked Securities linked to leveraged instrument(s) is not the same as the return from buying a leveraged instrument or multiples of the leveraged instruments which comprise the relevant Basket or Index, as applicable. Accordingly, an investment in ETP Linked Securities, ETP-Basket Linked Securities or ETP-Index Linked Securities, as applicable, linked to long and short leveraged instruments may provide a lower return than if a Securityholder had bought on a “leveraged” basis or respectively “shorted” or “short sold” the leveraged instrument(s) serving as underlying asset(s).

Due to the leverage feature, an investment in the ETP, and thus, the ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities, is more speculative than a direct investment in the underlying asset and Securityholders are subject to a considerably increased risk of price fluctuation compared to a direct investment and therefore bear a considerably increased risk of loss, which could ultimately result in a loss of up to the entire value of their investment.

The return on ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities linked to leveraged instruments over a period longer than one day is the result of the return for each day compounded over all days in that period. As a consequence of the daily leverage exposure of the relevant Securities, over periods longer than one day (excluding the effects of any applicable fees and/or any adjustments), the redemption entitlement of a ETP Linked Securities, ETP-Basket Linked Securities or ETP-Index Linked Securities, as applicable, will fall if the change in the value of the relevant underlying asset(s) is flat (i.e. has a zero or close to zero return).

Further, in the event of large movements in the value of any leveraged instruments referenced by an ETP during the course of a Valuation Date, it is possible that an intra-day reset may be triggered with respect may be triggered with respect to such leveraged instrument. An intra-day reset is designed as a stop-loss to restrict (to a certain extent) the loss in value of a leveraged instrument during periods of extreme market movement by providing a new base level for determining the movement in the value of any underlying assets. The effect of an intra-day reset is that a leveraged instrument will for the remainder of that day provide relevant leveraged long or short exposure to the movement in the value of such underlying asset(s) measured from the time the intra-day reset took place (or thereabouts).

If an intra-day reset were to take place, then, for the reasons described above, a leveraged instrument (and the corresponding ETP which reference such leveraged instrument) will not provide leveraged exposure to the movement in the value of the underlying asset(s) throughout the course of that day.

If the value of the underlying asset(s) were to fall (or rise) significantly during the course of a day resulting in an intra-day reset occurring with respect to the corresponding leveraged instrument, but then during the remainder of the day the underlying asset(s) were to recover their losses (or lose their gains) then the relevant leveraged instrument and, therefore, the corresponding ETP Linked Security would still incur a significant loss during such day due to the intra-day reset providing a lower (higher) base level for determining the movement in the value of the underlying asset(s) throughout the remainder of the day. As a result, where an intra-day reset occurs, a Securityholder’s losses may still be significant. The level of any intra-day reset triggers will vary between different Indices. An intra-day reset may not occur with respect to overnight movements in the value of the underlying asset(s) (i.e. from close of a stock exchange on one day to open of the stock exchange the following day). Accordingly, in the event of a large overnight movement in the value of the underlying asset(s)

referenced by a leveraged instrument, the value per ETP Linked Security could significantly fall so that a Securityholder that holds a corresponding ETP Linked Security could lose all or part of its investment.

(k) Risks specific to ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities with covered call instruments as underlying

The ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities may be linked to covered call instruments.

Covered call instruments are ETPs linked to covered call options and structured notes that provide exposure to covered call options.

In case of a covered call strategy, the issuer of the ETP will sell “out of the money” covered call options linked to an underlying asset for a premium. Such call options provide the purchaser with the right (i) to buy the respective underlying asset for a fixed price on a certain date or (ii) if the option is cash settled, to receive a payment equal to the difference between the value of the underlying asset and the exercise price of the relevant call option.

In a rapidly upward-trending market or in an extremely volatile market, a covered call strategy can underperform a long-only investment in the underlying asset, because it will fail to capture all of the potential upside and can miss out on significant gains. Especially in cases where the price of the respective underlying asset ends up above the agreed fixed price for the sale of the underlying assets on the respective agreed date, the return of the ETP is capped at a price equivalent to the exercise price plus the premium received.

In such cases, the covered call strategy might have a negative impact on the value of the covered call instrument and, thus, on the relevant ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities and the return of the Bondholders may be less compared to a direct investment in the underlying asset of the covered call instrument.

(l) Risks specific to ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities with multi-asset instruments as underlying

The ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities may be linked to multi-asset instruments.

Multi-asset instruments are ETPs which are comprised of several assets of various asset classes. In such case, Securityholders are not only subject to the risks connected to an individual asset class, but to several asset classes as well as any correlations between these asset classes, which may result in an amplification as well as in a neutralisation of any performance of the individual asset classes.

In such case, the return of the Bondholders may be less compared to a direct investment in one or several of the underlying assets of the multi-asset instrument.

(m) Reset risk

In case of an event where the ETP(s) constituting the ETP Entitlement (i) can no longer be made available by the issuer or (ii) are no longer available due to the ETP(s) reaching their maturity date (if any) or are otherwise cancelled or terminated (a “**Reset Event**”), the ETP Entitlement of the relevant Class of ETP Linked Securities shall be adjusted as further set out Condition 7 of the relevant Issue Specific Option VII. This might result in a replacement of the ETP Entitlement for the relevant ETP(s) held in the Secured Property with an ETP Entitlement consisting of (i) solely the additional exchange traded product(s) or (ii) the ETP(s) and the additional exchange traded product(s). Accordingly, the Issuer may in certain circumstances effect such adjustment, which might – although the Issuer is required to take into account the interests of the Securityholders – have a negative impact on the return for Securityholders of that Class.

(n) ETPs as Underlying Assets not listed on a Regulated Stock Exchange

To the extent ETPs as Underlying Assets are not listed on a Regulated Stock Exchange but on a MTF or ATS, this might have an impact on the liquidity in the ETP as Underlying Asset and, given that the

liquidity of a Security is inherently linked to the liquidity profile of the ETP as Underlying Asset, also on the liquidity of the Security. Further, while price information on the ETP as Underlying Asset will in any case be available, it might be more difficult to obtain such pricing information compared to ETPs listed on a Regulated Stock Exchange. Accordingly, ETPs as Underlying Assets not listed on a Regulated Stock Exchange may be more difficult to sell.

Investors should be aware that a deterioration in liquidity and underlying market conditions will likely affect their ability to transact in any Security. This may adversely affect the price at which Securityholders are able to trade the Securities in the secondary market and might result in Securityholders suffering a partial or even total loss as they cannot realise the full value of their investment.

(o) Unlisted ETPs as Underlying Assets

To the extent ETPs as Underlying Assets are neither listed on a Regulated Stock Exchange nor an a MTF or an ATS, i.e. in case of unlisted collective investment undertakings, this might have an additional impact on the liquidity in the ETP as well as on further factors relevant for the market price formation of the ETP.

In particular, unlisted collective investment undertakings are susceptible to valuation risks, as unlisted collective investment undertakings are only priced by their respective administrator or issuer and lack of an independent market-driven price formation mechanism.

The administrator or issuer may also have various roles and responsibilities within the collective investment undertaking's structure.

Due to this dependency on the respective administrator's or issuer's discretion for the determination of the pricing and the administrator's or issuer's influence on the structure of the unlisted collective investment undertaking, potential conflicts of interest may arise. These conflicts could affect the administrator's ability to act solely in the best interests of investors so that investors in the collective investment undertaking are subject to the risk of potential biases in asset pricing and valuation discrepancies. As the Securities track the value of the collective investment undertaking as Underlying Asset, this may adversely affect the ability of Securityholders to determine the value of their investment as well as the price at which Securityholders are able to trade the Securities in the secondary market and might result in Securityholders suffering a partial or even total loss as they cannot realise the full value of their investment.

Investors in the collective investment undertaking have no alternative or independent means of verifying the accuracy of the published fair value of the unlisted mutual fund, its net asset value or any related pricing data. This results in risks not only relating to the orderly determination of the fair value, but also exposes investors in the collective investment undertaking to the risk of errors in price in calculations as well as general inaccuracies in pricing. As the administrator or issuer is the sole source of pricing information, investors in the collective investment undertaking are also subject to the risk that the administrator or issuer is not able or even willing to publish any pricing data at all. Should any of these risks realise in relation to the collective investment undertaking as Underlying Asset, Securityholders will not be able to correctly assess the value of the collective investment undertaking and, thus, of the Securities and will be required to make decisions based on missing or inaccurate information. This might result in Securityholders suffering a partial or even total loss as they cannot realise the full value of their investment.

2.3.4 Risks specific to Basket Linked Securities

In addition to the risks set out above, prospective investors in Basket Linked Securities should also be aware that a Rebalancing (i.e. an adjustment to the individual asset entitlement for the relevant asset comprised in the Asset Entitlement for the relevant Class of Securities) may require the Issuer to purchase or dispose of an Underlying Asset from time to time in certain circumstances. The price at which the Issuer is able to do so will impact the composition and weighting of the Underlying Assets comprised in the aggregate Asset Entitlement for a Class of Basket Linked Securities. This may result in the composition and weighting of the Underlying Assets comprised in the relevant Asset Entitlement

being different to the composition of the relevant Underlying Asset in the Basket, thereby increasing tracking error or difference.

2.3.5 Risks specific to Index Linked Securities

(a) *The returns on the Index Linked Securities are not a direct investment in the Underlying Assets comprised in the applicable Index*

The Index which is referenced by an Index Linked Security will comprise of one or more Underlying Asset(s). However, prospective investors should be aware that an investment in an Index Linked Security is not the same as a direct investment in the Underlying Assets comprised in the applicable Index or a direct investment in the Index itself. As a result, changes in the level of the Index will not necessarily result in correlated changes in the value of the Index Linked Securities. In addition, the rules for calculation of the Index may include deductions for fees, a currency hedging component and/or other factors that affect how closely the Index tracks the price of the asset(s) referenced by the Index and may also permit the Index Sponsor to make certain adjustments to the level of the Index. Any such deductions and adjustments may cause the level of the Index to diverge from the value of the Index Linked Securities.

Prospective investors should also be aware that each Index Linked Security will not precisely replicate the composition (and therefore the performance of) the relevant Index. When investing the assets, the Issuer may invest in Underlying Asset that do not fully correlate to the weighting of each Underlying Asset in the Index. This is because the ability of the Issuer to effect a Rebalancing is dependent on (i) the price at which it is able to purchase and sell the relevant Underlying Assets affected by the Rebalancing; and (ii) the ability of the Custodian(s) to support the relevant Underlying Assets. Therefore, the Underlying Assets held in respect of an Index Linked Security may differ from the components of the relevant Index and may be afforded different weightings to those specified in the relevant Index. Any such divergence to the weightings and components of the Underlying Asset held in respect of the Index Linked Securities will cause the level of the Index to diverge from the value of the Index Linked Securities. In certain circumstances, if the Issuer determines that the tracking error is too great and/or if the Issuer permanently loses its licence to use the Index, the Issuer may effect a Voluntary Rebalancing in order to minimise the tracking error and/or to substitute the Index, but there can be no guarantee that such Voluntary Rebalancing will result in the weighting and composition of the Underlying Assets held in respect of such Index Linked Securities exactly reflecting the weighting of each constituent of the Index. While the Issuer is required to take into account the interests of the Securityholders prior to effecting a Voluntary Rebalancing, any such rebalancing and the related execution costs may negatively impact the return for Securityholders of that Class and could, ultimately, result in a partial or full loss of the Securityholders' investment.

(b) *Index Performance*

Prospective investors should note that the value of the Index Linked Securities will be linked to the performance of the relevant Index (before fees and expenses) and the Index Linked Securities will as far as possible and practicable consist of the Underlying Assets that comprise that Index. Accordingly, prospective investors should be aware that the Index Linked Securities may be adversely affected by risks applicable to indices generally, as well as to market fluctuations in the price of the relevant Underlying Assets comprised in that Index.

In particular, the level of an Index can go down as well as up and that the past performance of an Index will not be indicative of its future performance. There can be no assurance as to the future performance of any Index.

The Index Linked Securities may trade differently from the performance of the Index and changes in the level of the Index may not result in a comparable change in the value of the Index Linked Securities.

Accordingly, before investing in any Index Linked Security, prospective investors are advised to carefully consider whether an investment which seeks to replicate the performance of the applicable Index is suitable for them and, in all cases, an investor in Index Linked Securities is advised to carry out its own detailed review of the applicable Index and the rules relating thereto.

(c) *Change in composition or discontinuance of the Index*

The Index Sponsor may add, delete or substitute the Underlying Assets that forms part of the Index or make other changes to the methodology for determining the asset(s) to be included in the Index or for valuing the Index.

The composition of the Index may therefore change over time to satisfy the eligibility criteria applicable to the Index or where asset(s) currently included in the Index fail to satisfy such criteria. Such changes to the composition of the Index by the Index Sponsor may affect the level of the Index as a newly added asset may perform significantly worse or better than the asset it replaces. As the value of the Index Linked Securities is influenced by the composition of the Index, changes in the composition of the Index may therefore have an adverse effect on the value of the Index Linked Securities and changes in the methodology of the Index may constitute an Adjustment Event and/or result in a Disruption Event and/or cause the early redemption of the Index Linked Securities.

The rules of the Index may confer on the Index Sponsor in certain circumstances the right to make determinations, calculations, modifications and/or adjustments to the Index and the eligible components of the Index and related matters, which involve, in certain circumstances, a degree of discretion. The Index Sponsor will generally, as far as reasonably practicable, exercise any such discretion with the aim of preserving the overall methodology of the relevant Index. The exercise of such discretion may result in the level of the Index on any day being different to that which it may have been had the Index Sponsor not determined to exercise such discretion. Whilst the Index Sponsor is typically required to act reasonably and in good faith in exercising its discretion, there can be no assurance that the exercise of any such discretion by the Index Sponsor will not affect the level of the Index and/or alter the volatility of the Index and have an adverse effect on the value of the relevant Index Linked Securities.

If the Index Sponsor discontinues or suspends calculation or publication of the Index or fails to calculate or publish the level of an Index, the Index Linked Securities will continue with no further amendments until the Index Sponsor continues or resumes calculation of the Index or an early redemption is carried out in respect of the Index Linked Securities.

(d) *Rebalancing Risk*

When the Weights of each Underlying Asset comprised in an Index are adjusted in accordance with the relevant index methodology, the Issuer will sell the Underlying Assets which form part of the Secured Property for these Underlying Asset(s) in order to purchase different Underlying Assets in order to match, as far as reasonably practicable, the new Weights of each Underlying Asset comprised in the Index.

It may not always be reasonably practicable to match the new Weights of each of the Underlying Assets comprised in the Index, including (without limitation), in circumstances where the relevant Underlying Asset is not supported by the Custodian(s) or there is a market disruption affecting the relevant Underlying Asset during the Rebalancing Period. Any such Rebalancing and the related execution costs may negatively impact the return for Securityholders of that Class.

(e) *Associated Counterparty Risk*

There is no requirement under the Programme to require the counterparty to any such sale to grant any security or provide any collateral in respect of the obligations it owes to the Issuer in respect of the sale. There may be circumstances in which such counterparty fails to perform its obligations under such sale and fails to pay the consideration for the purchase of the relevant Underlying Asset to the Issuer. There is a chance that the Issuer is unable to recover all of the relevant Underlying Asset which would have an adverse effect on the value of the relevant Index Linked Securities.

Where the Underlying Specific Entitlement differs from the composition of the Index, changes in the level of the Index will not necessarily result in correlated changes to the value of the Index Linked Securities. Therefore the value of the Securities may be less than a Securityholder may have expected if the value of the Index Linked Securities was directly correlated to the level of the Index.

(f) Conflict of Interest of the Index Sponsor

Investors should be aware that the Index Sponsor has had no regard to the interests of the Securityholders when creating any Index, and no Index Sponsor will be required to have a regard to the interests of the Securityholders when maintaining, modifying, rebalancing, reconstituting or discontinuing any Index. Actions taken by an Index Sponsor in respect of an Index may have an adverse impact on the value or liquidity of the Index Linked Securities. The interests of an Index Sponsor and the Securityholders of the relevant Index Linked Security may not be aligned. No Index Sponsor will have any responsibility or liability to Securityholders.

3. Economic Overview of the Securities

3.1 Overview of the Securities

The Issuer may from time to time issue exchange traded securities under the Programme which are backed by certain Underlying Asset(s) on the relevant terms set out in the sections 5. “*General Terms and Conditions*” and 6. “*Issue Specific Terms and Conditions*” of this Prospectus, as supplemented and amended in respect of each Class of Securities by the relevant Issue Specific Option and read in conjunction with the Final Terms relating to such Class.

Information specific to each Class of Securities are contained in the Issue Specific Option relevant to that particular Class of Security.

3.2 Redemption structure

Securityholders are entitled to receive units of the Underlying Asset(s) on Redemption of their Securities corresponding to the “**Asset Entitlement**”, which describes the amount of each Underlying Asset per Security that the Securityholder is entitled to on Redemption of the Security. Accordingly, the amount of units of the Underlying Asset(s) received by Securityholders corresponds to the product of the number of Securities redeemed by the Securityholder multiplied with the currently applicable Asset Entitlement on the relevant date.

3.2.1 Calculation of the Asset Entitlement

The initial Asset Entitlement on the Issue Date is set out in the respective Final Terms of the Securities. The details and mechanics for the calculation of the relevant Asset Entitlement for each relevant day is set out in the relevant Issue Specific Option and is based on the specified amount(s) of the Underlying Asset(s) (the “**Underlying Specific Entitlement**”) including any other amounts due and less any applicable Redemption Deductions, whereby the Asset Entitlement (as further set out in the relevant Issue Specific Option) reduces each day from the first day of listing and trading by the total expense ratio (“**TER**”) in respect of the relevant Class of Securities, taking into account the Capital Adjustment Factor and, where applicable, the Weight Adjustment Factor.

3.2.2 Effects of the TER

The TER in respect of each Class is an “all-in” operational fee calculated at the rate per annum specified as such in the Final Terms in respect of each Class of Securities. The TER in respect of a Class is applied to the Asset Entitlement per Security for such Class on a daily basis to determine a daily deduction of an amount of the respective Underlying Asset from such Asset Entitlement per Security.

Based on the ongoing reduction of the Asset Entitlement(s) caused by the TER, the value of the Securities and, thus, of the Securityholders investments will decline over time, if such reduction through the TER is not exceeded by the performance of the Underlying Asset(s). Therefore, the value of the Securityholders’ investments will decline, even if the value of the Underlying Asset(s) remains unchanged. Correspondingly, in case of a declining value of the Underlying Asset(s), such decline in value of the investment of the Securityholders will even be amplified.

The TER in respect of any Class of Securities may be varied by the Issuer from time to time. If the TER is amended, such amendment will be notified through a regulatory information service, and in the case of an increase, it will not take effect for at least 30 days following the publication of such notification in accordance with notice under Condition 20 (*NOTICES*) of the General Terms and Conditions. An increase in the TER in respect of a Class will reduce the Asset Entitlement in respect of that Class by more than would have been the case (and at a faster rate) than if the TER remained the same.

See section 2. “*Risk Factors*” of this Prospectus for a description of the risks associated with an investment in Securities and the relevant Issue Specific Option.

3.2.3 Effects of the Capital Adjustment Factor

The Capital Adjustment Factor is further specified in the relevant Issue Specific Option and represents fees, expenses and, if the relevant Final Terms provide for Staking Arrangements, Dividend Payments or Distribution Payments, profits that may arise or be levied by the relevant counterparties, service providers or market participants. The Capital Adjustment Factor can be positive or negative and can be varied by the Issuer without giving notice to the Securityholders.

3.2.3.1. Calculation of the Capital Adjustment Factor for Staking rewards

- (a) The respective (Individual) Asset Entitlement is calculated on the basis of the following formula, in each case calculated to a specified number of decimal places according to the Asset Entitlement Precision Level:

$$AE_{(i,t)} = AE_{(i,t-1)} \times \left[(1 - TER_{(i,t)})^{1/N} + CA_{(i,t)} \right]$$

where:

i refers to the relevant Class of Securities;

t refers to the applicable day (with t-1 being the previous day);

$AE_{(i,t)}$ is the Asset Entitlement in respect of that Class of Securities for day t;

$AE_{(i,t-1)}$ is the Asset Entitlement in respect of that Class of Securities on the day preceding day t;

$TER_{(i,t)}$ means the Total Expense Ratio as of the relevant calendar day, expressed as a decimal;

$CA_{(i,t)}$ is the per annum Capital Adjustment Factor in respect of the Underlying Asset comprising the Asset Entitlement in respect of that Class of Securities on day t, expressed as a decimal (so that by way of example 50 basis points per annum is expressed as 0.0050); and

N means 365 (or 366 when the relevant calendar day is in a leap year).

- (b) Where the Securities receive Staking rewards related to an Underlying Asset, and the Securities do not onward distribute these payments to Securityholders, such rewards will increase the Asset Entitlement of the Securities.

On the day of receipt of such rewards, the Asset Entitlement is increased by the net reward received (that is less any costs related to the Staking activity).

For the purposes of calculating the Asset Entitlement, the Staking reward is expressed in per cent and published on the Issuer's website as the Capital Adjustment Factor for the day.

- (c) Taking an example:

(i) an Asset Entitlement of 0.1 Underlying Assets on the day immediately preceding the receipt of any payments;

(ii) a TER of 2.00 per cent. per annum;

(iii) a Capital Adjustment Factor determined as follows:

(A) Staking reward per Underlying Asset 0.000076923;

(B) Price per Underlying Asset USD 1650;

The Staking reward of 0.00076923 will raise the Asset Entitlement (of 0.1) by 0.000076923 (= 0.00076923 x 0.1). The corresponding Capital Adjustment of Factor for the day is 0.076923%.

- (iv) all relevant calendar days are not in a leap year; and
- (v) Asset Entitlement Precision Level of 8 decimal numbers with 0.00000005 being rounded upwards:

The Asset Entitlement of the Securities on the day such Staking reward is received would be:

$$AE(i,t) = 0.1 \times [(1 - 0.02)^{1/365} + 0.00076923] = \underline{\underline{0.1000071388}} \text{ Underlying Assets per Security.}$$

3.2.3.2. Calculation of the Capital Adjustment Factor for Distributions and Dividends

- (a) The respective (Individual) Asset Entitlement is calculated on the basis of the following formula, in each case calculated to a specified number of decimal places according to the Asset Entitlement Precision Level:

$$AE_{(i,t)} = AE_{(i,t-1)} \times \left[(1 - TER_{(i,t)})^{1/N} + CA_{(i,t)} \right]$$

where:

- i refers to the relevant Class of Securities;
- t refers to the applicable day (with t-1 being the previous day);
- $AE_{(i,j,t)}$ is the Asset Entitlement in respect of that Class of Securities for day t;
- $AE_{(i,t-1)}$ is the Asset Entitlement in respect of that Class of Securities on the day preceding day t;
- $TER_{(i,t)}$ means the Total Expense Ratio as of the relevant calendar day, expressed as a decimal;
- $CA_{(i,t)}$ is the per annum Capital Adjustment Factor in respect of the Underlying Asset comprising the Asset Entitlement in respect of that Class of Securities on day t, expressed as a decimal (so that by way of example 50 basis points per annum is expressed as 0.0050); and
- N means 365 (or 366 when the relevant calendar day is in a leap year).

- (b) Where the Securities receive Dividend Payments, Distribution Payments or other payments by virtue of holding the Underlying Asset, and the Securities do not onward distribute these payments to Securityholders, such payments are converted into units of Underlying Assets and hence increase the Asset Entitlement of the Securities.

On the day of receipt of such payments, units of the relevant Underlying Asset are purchased for an amount equivalent to the payment received, less any costs related to such purchase.

For the purposes of calculating the Asset Entitlement, the resulting number of units is expressed in per cent and published on the Issuer's website as the Capital Adjustment Factor for the day.

- (c) Taking an example:
 - (i) an Asset Entitlement of 0.1 Underlying Assets on the day immediately preceding the receipt of any payments;
 - (ii) a TER of 2.00 per cent. per annum;

- (iii) a Capital Adjustment Factor determined as follows:
 - (A) Distribution per Underlying Asset EUR 5.00;
 - (B) Price of Underlying Asset EUR 100.00;
 - (C) Costs to purchase Underlying Asset EUR 0.00;

This results in a Capital Adjustment Factor of 5.00%.

- (iv) all relevant calendar days are not in a leap year; and
- (v) Asset Entitlement Precision Level of 8 decimal numbers with 0.00000005 being rounded upwards:

The Asset Entitlement of the Securities on the day such payments are received would be:

$$AE(i,t) = 0.1 \times [(1 - 0.02)^{1/365} + 0.05] = \underline{\underline{0.104994465}} \text{ Underlying Assets per Security.}$$

3.2.4 Effects of the Weight Adjustment Factor

Where applicable, the Weight Adjustment Factor needs to be taken into account in addition to the TER and the Capital Adjustment Factor.

The Weight Adjustment Factor represents a change in the individual asset entitlement for the relevant asset comprised in the Asset Entitlement for that Class of Securities to reflect the quantities of the individual asset held in respect of the Class of Securities following a Rebalancing (as further specified in the relevant Issue Specific Option). It includes costs connected to the Rebalancing such as execution costs and slippage costs.

3.2.5 Effects of Redemption Deductions

In respect of redemption of Securities, Redemption Deductions (i.e. fees) are payable. Such Redemption Deductions may be deducted directly from the amounts due to the Securityholders on redemption. They include execution costs and/or any other applicable fees in connection with the redemption of the relevant Securities (in each case, as further specified in the relevant Issue Specific Option).

3.2.6 Structural link between the value of the Security and the value of the Underlying Asset(s)

As Securityholders are entitled to receive units of the Underlying Asset(s) on Redemption of their Securities, the value and return of their investment is linked to the value of the Underlying Asset(s).

The Securities are expected to closely track the performance of the Underlying Asset(s) (subject to the impact of TER, capital adjustments (positive or negative) and other applicable fees and costs).

Accordingly, due to this structural link to the value of the Underlying Asset(s), any increase or decline in the value of the respective Underlying Asset(s) will result in a corresponding increase or decline in the value of the Securityholders' claim for Redemption as well as in the market value of the Securities on the secondary market.

3.2.7 Calculation of Asset Entitlement – Single Underlying Assets

- (a) For Securities linked to a single Underlying Asset (Cryptocurrency Linked Securities (Issue Specific Option I), Equity Linked Securities (Issue Specific Option IV) or ETP Linked Securities (Issue Specific Option VII)), the respective Asset Entitlement is calculated on the basis of the following formula, in each case calculated to a specified number of decimal places according to the Asset Entitlement Precision Level:

$$AE_{(i,t)} = AE_{(i,t-1)} \times \left[(1 - TER_{(i,t)})^{1/N} + CA_{(i,t)} \right]$$

where:

- i refers to the relevant Class of Securities;
- t refers to the applicable day (with t-1 being the previous day);
- $AE_{(i,j,t)}$ is the Asset Entitlement in respect of that Class of Securities for day t;
- $AE_{(i,t-1)}$ is the Asset Entitlement in respect of that Class of Securities on the day preceding day t;
- $TER_{(i,t)}$ means the Total Expense Ratio as of the relevant calendar day, expressed as a decimal;
- $CA_{(i,t)}$ is the per annum Capital Adjustment Factor in respect of the Underlying Asset comprising the Asset Entitlement in respect of that Class of Securities on day t, expressed as a decimal (so that by way of example 50 basis points per annum is expressed as 0.0050); and
- N means 365 (or 366 when the relevant calendar day is in a leap year).

(b) Taking as an example:

- (i) an initial Asset Entitlement of 0.1 Underlying Assets;
- (ii) a TER of 2.00 per cent. per annum;
- (iii) a Capital Adjustment Factor of zero;
- (iv) all relevant calendar days are not in a leap year; and
- (v) Asset Entitlement Precision Level of 8 decimal numbers with 0.00000005 being rounded upwards:

After 1 day

The Asset Entitlement on the day immediately following the issuance of the Securities would be:

$$AE(i,t) = 0.1 \times (1 - 0.02)^{1/365} = \underline{\underline{0.09999450}} \text{ Underlying Assets per Security.}$$

After 1 year

The Asset Entitlement on the day 1 year following the issuance of the Securities would be:

$$AE(i,t) = 0.1 \times (1 - 0.02)^{365/365} = \underline{\underline{0.09800000}} \text{ Underlying Assets per Security.}$$

After 5 years

The Asset Entitlement on the day 5 years following the issuance of the Securities would be:

$$CE(i,t) = 0.1 \times (1 - 0.02)^{1825/365} = \underline{\underline{0.09039000}} \text{ Underlying Assets per Security.}$$

3.2.8 Calculation of Asset Entitlement – Baskets and Indices

Different from Securities linked to a single Underlying Asset, Basket and Index Linked Securities are linked to numerous, potentially differently weighted Underlying Assets so that for Basket and Index Linked Securities, the Asset Entitlement is not calculated solely based on the initially determined Asset Entitlement for a single Underlying Asset, but on the Individual Asset Entitlements of each of its components in accordance with the following formula in each case calculated to a specified number of decimal places according to the Asset Entitlement Precision Level:

$$AE(i, t) = \sum IAE_{(i,j,t)}$$

Where:

- AE refers to the Asset Entitlement;
- i refers to the relevant Class of Securities;
- j refers to each Underlying Asset comprised in the Asset Entitlement for the relevant Class of Securities on day t; and
- t refers to the applicable day (with t-1 being the previous day).
- IAE_(i,j,t) is the Individual Asset Entitlement for each Underlying Asset comprised in the Asset Entitlement for the relevant Class of Securities on day t.

Accordingly, the Asset Entitlement for Basket and Index Linked Securities is calculated in a two-step process: (i) calculation of the Individual Asset Entitlements for each Underlying Asset and (ii) summing up of the respective Individual Asset Entitlements.

3.2.9 Monetary Value of the Asset Entitlement

As the Asset Entitlement describes the amount of each Underlying Asset per Security that the Securityholder is entitled to on Redemption of the Security, the monetary value of the Asset Entitlement corresponds to the product of (i) the market value of the Underlying Asset(s) and (ii) the currently applicable Asset Entitlement.

Taking as an example the Asset Entitlements used in the example calculations in section 3.2.7 (*Calculation of Asset Entitlement – Single Underlying Assets*) above, based on an initial value of 1 unit of the Underlying Asset (100 per cent) of EUR 100, the monetary value of the Asset Entitlement would be as follows:

	Asset Entitlement at the end of Period	Constant value of Underlying Asset (EUR 100)	20 per cent. increase in value of Underlying Asset (EUR 120)	20 per cent. decline in value of Underlying Asset (EUR 80)
After 1 day	0.09999450	EUR 9.99945000	EUR 11.99934000	EUR 7.99956000
After 1 year	0.09800000	EUR 9.80000000	EUR 11.76000000	EUR 7.84000000
After 5 years	0.09039000	EUR 9.03900000	EUR 10.84680000	EUR 7.23120000

As shown in the table above, any increase or decline in the value of the respective Underlying Asset(s) will result in a corresponding increase or decline in the monetary value of the Asset Entitlement.

For Securities linked to a single Underlying Asset, this is expected to result in a nearly 1:1 tracking of the performance of such Underlying Asset (subject to the deduction of the TER and other applicable fees and costs).

In case of Securities linked to a Basket or an Index, the performance of such Securities depends on the performance of each of the individual Underlying Asset(s) comprising the Basket or Index as well as the composition and weighting of the specific Basket or Index:

In an equally weighted Basket or Index, this means that the performance of the Securities will be positive if the aggregate gains of the components of the Basket or Index with positive performance overcompensates for the aggregate losses of the components with a negative performance.

As a worked example: The following table shows the impact on the monetary value of the Securities depending on the development of an equally weighted Basket comprised of two Shares with a price of EUR 500 each (aggregate value EUR 1,000), taking into account development of the price of Share 1 and Share 2, respectively:

Composition of relevant Basket	Price of Share 1	Price of Share 2	Impact on monetary value of Securities
Equally weighted basket, comprising of two shares (price of EUR 500 each, aggregate value EUR 1,000)	Increase by EUR 50 (= 10 per cent.)	Decrease by EUR 25 (= 5 per cent.)	Increase by EUR 25 (= 2.5 per cent.)
Equally weighted basket, comprising of two shares (price of EUR 500 each, aggregate value EUR 1,000)	Increase by EUR 25 (= 5 per cent.)	Decrease by EUR 50 (= 10 per cent.)	Decrease by EUR 25 (= 2.5 per cent.)
Equally weighted basket, comprising of two shares (price of EUR 500 each, aggregate value EUR 1,000)	Increase by EUR 50 (= 10 per cent.)	Decrease by EUR 50 (= 10 per cent.)	No change

In a non-equally weighted Basket or Index, the performance of the Securities will also be positive in case that the aggregate gains of the components of the Basket or Index with positive performance overcompensate for the aggregate losses of the components with a negative performance. However, other than in case of an equally weighted Basket or Index, any such gains and losses are required to be weight-adjusted to reflect the actual composition of the Basket or Index.

As a worked example: In a Basket comprised of two Shares with the prices of such Shares being EUR 1,000 (66.67 *per cent.*) Share 1 and EUR 500 (33.33 *per cent.*) Share 2, due to the Share 1 being weighted twice as much as Share 2, the aggregate gains of Share 2 must be (at least) twice as high as the losses of Share 1 in order to cancel each other out or to even generate a positive performance.

The following table shows the impact on the monetary value of the Securities depending on the development of a non-equally weighted Basket comprised of two Shares with a price of EUR 1,000 (Share 1) and of EUR 500 (Share 2), taking into account development of the price of Share 1 and Share 2, respectively:

Composition of relevant Basket	Price of Share 1	Price of Share 2	Impact on monetary value of Securities
Non-equally weighted basket, comprising of two shares (price of share 1 EUR 1,000, price of share 2 EUR 500)	Increase by EUR 100 (= 10 per cent.)	Decrease by EUR 25 (= 5 per cent.)	Increase by EUR 75 (= 5 per cent.)
Non-equally weighted basket, comprising of two shares (price of	Increase by EUR 50 (= 5 per cent.)	Decrease by EUR 50 (= 10 per cent.)	No change

share 1 EUR 1,000, price of share 2 EUR 500)			
Non-equally weighted basket, comprising of two shares (price of share 1 EUR 1,000, price of share 2 EUR 500)	Increase by EUR 100 (= 10 per cent.)	Decrease by EUR 50 (= 10 per cent.)	Increase by EUR 50 (= 3.33 per cent.)

3.2.10 Leverage effect of the underlying ETP

With respect to ETP Linked Securities, ETP-Basket Linked Securities and ETP-Index Linked Securities, the relevant Security's return over holding periods longer than one day is likely to differ from the leveraged return of the relevant leveraged instrument forming the underlying asset of such Security. The following table sets out examples, illustrating how the return from buying a leveraged instrument or multiples of the leveraged instruments may differ from the return from investing in an ETP Linked Security, ETP-Basket Linked Security or ETP-Index Linked Security:

4.1 PRIIPS Regulation - EEA Retail Investors

If the relevant Final Terms in respect of any Securities include a legend entitled "*Prohibition of Sales to EEA Retail Investors*", the Securities are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the EEA. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU, as amended ("**MiFID II**") or (ii) a customer within the meaning of Directive 2016/97/EU (as amended, the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Regulation. Consequently, no key information document required by Regulation (EU) No 1286/2014, as amended (the "**PRIIPS Regulation**") for offering or selling the Securities or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Securities or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPS Regulation.

Any person subsequently offering, selling or recommending the Securities (a "**distributor**") should take into consideration the target market assessment; however, a distributor subject to MiFID II

is responsible for undertaking its own target market assessment in respect of the Securities (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the MiFID Product Governance rules under EU Delegated Directive 2017/593 (the “**MiFID Product Governance Rules**”), any dealer subscribing for any Securities is a manufacturer in respect of such Securities, but otherwise neither the Arranger nor the dealers nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID Product Governance Rules.

A determination will be made in relation to each issue about whether, for the purpose of the UK MiFIR Product Governance Rules, any dealer subscribing for any Securities is a manufacturer in respect of such Securities, but otherwise neither the Arranger nor the dealers nor any of their respective affiliates will be a manufacturer for the purpose of the UK MiFIR Product Governance Rules.

6.1 Enforcement of Security constituted by the Security Documents

The Security constituted by the applicable Security Documents in respect of each Class of the Securities shall become enforceable upon the occurrence of an Issuer Insolvency Event or an Event of Default pursuant to Condition 14 (*EVENTS OF DEFAULT*) below.

6.2 Realisation of Security constituted by the Security Documents

At any time after the Security constituted by any Security Document has become enforceable, the Trustee may, at its discretion, and shall, if so directed in writing by holders of at least one-fifth in

The Trustee may, at its discretion, but subject to it having been pre-funded and/or secured and/or indemnified to its satisfaction by one or more Securityholder(s) (i) enforce and/or terminate any relevant Programme Document relating to the Securities of such Class in accordance with its or their terms, and/or take action against the relevant Obligor(s) and/or (ii) take possession of and/or realise all or part of the assets over which the Security constituted by the relevant Security Document shall have become enforceable and may in its discretion, sell, call in, collect and convert into money all or part of such assets, in such manner, at such time and on such terms as it thinks fit, in each case without any liability as to the consequence of such action and without having regard to the effect of such action on individual Securityholders.

The Trustee may, in writing, appoint a receiver or receivers over all or part of the assets over which the Security constituted by the relevant Security Document shall have become enforceable and may remove any receiver so appointed and appoint another in its place. No delay or waiver of the right to exercise these powers shall prejudice their future exercise.

Neither the Trustee nor any receiver appointed by it or any attorney or agent of the Trustee will, by reason of taking possession of any assets or any other reason and whether or not as mortgagee in possession, be liable to account for anything except actual receipts or be liable for any loss or damage arising from the realisation of such assets or from any act or omission to such assets or otherwise unless such loss or damage shall be caused by its own fraud, gross negligence or wilful default.

The Trustee shall not be required to take any action in relation to the Security constituted by the relevant Security Document which may be illegal or contrary to any applicable law or regulation.

The Trustee shall not be required to take any action in relation to the Security constituted by the relevant Security Document which may cause it to expend or risk its own funds or otherwise incur any liability (including any personal liability) in the performance of its duties or in the exercise of any of its rights, powers and discretions, without first being indemnified and/or secured and/or prefunded to its satisfaction.

- (a) The Management and Determination Agent will, as soon as reasonably practicable on such date and/or at such time as the Management and Determination Agent is required in accordance with the Management and Determination Agent Agreement and the Conditions and any other Relevant Provisions, perform such duties and obligations as are required to be performed by it in accordance therewith.
- (b) The calculation by the Management and Determination Agent of any amount, price, rate or value required to be calculated by the Management and Determination Agent under the Relevant Provisions shall be made in good faith and shall (in the absence of manifest error) be final and binding on the Issuer, the Securityholders and the Programme Parties.

12.5 Calculation by alternative agent

If at any time after the Security has become enforceable pursuant to Condition 6.1 (*Enforcement of Security constituted by the Security Documents*) the Management and Determination Agent does not make any calculation relating to the Asset Entitlement or the Redemption Amount when required pursuant to the Conditions and the Programme Documents, then the Issuer will appoint an alternative agent on its behalf to make any calculation in place of the Management and Determination Agent. Any such calculation shall for the purposes of the Conditions and the Programme Documents be deemed to have been made by the Management and Determination Agent. In doing so, the appointed agent shall apply the provisions of the Conditions and/or the relevant Programme Document(s), with any necessary consequential amendments, to the extent that, in its opinion, it can do so, and in all other respects it shall do so in such manner as it shall deem fair and reasonable in the circumstances. The Trustee shall not be liable (whether directly or indirectly, in contract, in tort or otherwise) to the Issuer, the Securityholders or any Programme Party for any calculation (or any delay in making any calculation) so made and will not itself be required to make, have any responsibility for making, any such calculation.

12.6 Management and Determination Agent

- (a) Subject as provided in the Conditions and the Management and Determination Agent Agreement, the Issuer shall use all reasonable efforts to procure that there shall at all times be a Management and Determination Agent for so long as any of the Securities are outstanding. If the Management and Determination Agent resigns or its appointment is terminated for any reason, the Issuer shall use all reasonable efforts to appoint a reputable entity that provides services of a similar type to those required of the Management and Determination Agent under the Relevant Provisions that the Issuer reasonably determines is capable of making the calculation(s) required to be made by the Management and Determination Agent under the Relevant Provisions to act as such in its place.
- (b) The Management and Determination Agent shall not be liable (whether directly or indirectly, in contract, in tort or otherwise) to the Issuer, any Securityholder, any other Programme Party or any other person for any Loss incurred by any such person that arises out of or in connection with the performance by the Management and Determination Agent of its obligations under the Management and Determination Agent Agreement, the Conditions and the other Relevant Provisions provided that nothing shall relieve the Management and Determination Agent from any Loss arising by reason of acts or omissions constituting bad faith, fraud or gross negligence of the Management and Determination Agent (any such act or omission, a “Management and Determination Agent Breach”).
 - (i) If the Management and Determination Agent would, but for the operation of this Condition 12.6(b)(i) (*Management and Determination Agent*), be held liable for any Loss arising as the result of a Management and Determination Agent Breach, the Management and Determination Agent shall nevertheless incur no liability to the Issuer, any Securityholder, any other Programme Party or any other person if such Management and

Determination Agent Breach results solely and directly from either (i) the failure by any other Programme Party to provide any notice, instruction or direction which such Programme Party is required or permitted to give under the Conditions or any relevant Programme Document or (ii) a delay in the delivery by any other Programme Party of any notice, instruction or direction which such Programme Party is required or permitted to give to the Management and Determination Agent under the Conditions or any relevant Programme Document.

- (ii) If the Management and Determination Agent would, but for the operation of this Condition 12.6(b)(ii) (*Management and Determination Agent*), be held liable for any Loss arising as the result of a Management and Determination Agent Breach, the Management and Determination Agent shall nevertheless incur no liability to the Issuer, any Securityholder, any other Programme Party or any other person if such Management and Determination Agent Breach results solely and directly from the reliance by the Management and Determination Agent upon a rate, amount, quotation, value or other calculation or determination notified to the Management and Determination Agent pursuant to the Conditions and/or any relevant Programme Document which is made by another Programme Party in accordance with the Conditions and the terms of any relevant Programme Document.
- (c) The Management and Determination Agent has no obligation towards or relationship of agency or trust with any Securityholder.
- (d) The Management and Determination Agent has no duties or responsibilities except those expressly set forth in the Conditions, the Management and Determination Agent Agreement and the other Relevant Provisions and no implied or inferred duties or obligations of any kind will be read into the Management and Determination Agent Agreement against or on the part of the Management and Determination Agent. The Management and Determination Agent will not, and will not be deemed to, assume or be liable for the obligations or duties of the Issuer or any other person under the Conditions, the Trust Deed or any other Programme Document unless otherwise agreed pursuant to the Relevant Provisions.

12.7 Appointment of Agents

Save as provided below, the Agents act solely as agents of the Issuer. The Agents do not assume any obligation or relationship of agency or trust for or with any Securityholder. The Issuer reserves the right at any time with the prior written approval of the Trustee and in accordance with the provisions of the Agency Agreement, the Management and Determination Agent Agreement, as applicable, to vary or terminate the appointment of the Issuing and Paying Agent, if applicable, any other Paying Agent, the Registrar, the Transfer Agent or the Management and Determination Agent and to appoint additional or other Paying Agents, Registrars, Transfer Agents or Management and Determination Agents. Without prejudice to the provisions for the automatic termination of the appointment of an Agent in connection with the occurrence of an insolvency or similar event or proceedings in the relevant Programme Documents, the Issuer shall use reasonable endeavours to at all times maintain (i) a Registrar, (ii) in respect of any Class of Securities that may be cleared on a Relevant Clearing System other than CREST, an Issuing and Paying Agent other than the Registrar, (iii) a Management and Determination Agent; (iv) a Transfer Agent; and (v) such other agents as may be required by any stock exchange on which the Securities may be listed, in each case, as approved by the Trustee. The Issuer shall promptly give Notice to the Securityholders of any change of Agent or any change to the specified office of an Agent.

Pursuant to the terms of the Trust Deed, at any time after an Issuer Insolvency Event or an Event of Default has occurred in relation to the Securities, the Trustee may (i) by notice in writing to the Issuer, the Issuing and Paying Agent, if applicable, and any other Paying Agents, the Registrar, and/or the Management and Determination Agent, require any and all of such Agents, until notified by the Trustee to the contrary, so far as permitted by applicable law to (a) act as agent of the Trustee under the Trust Deed and the Securities *mutatis mutandis* on the terms of the Agency Agreement or Management and

Determination Agent Agreement, as applicable (with consequential amendments as necessary) and except that the Trustee's liability for the indemnification, remuneration and all other expenses of such Agents (if any) shall be limited to the amounts for the time being held by the Trustee in respect of the Securities on the terms of the Trust Deed and which are available (after application in accordance with the relevant order of priority set out in Condition 6.3 (*Application of proceeds of enforcement of Security*)) to discharge such liability); or (b) deliver the Securities and all moneys, documents and records held by them in respect of the Securities to or to the order of the Trustee or as the Trustee directs in such notice, and (ii) by notice in writing to the Issuer require it to make all subsequent payments in respect of the Securities to or to the order of the Trustee and not to the Issuing and Paying Agent, if applicable, and/or the Registrar (as the case may be) with effect from the receipt of any such notice by the Issuer.

12.8 Business day convention and non-Payment Business Day

- (a) If any date for payment in respect of any Security is not a Payment Business Day, the holder shall not be entitled to payment until the next following Payment Business Day or to any interest or other sum in respect of such postponed payment.
- (b) If any date referred to in the Conditions would otherwise fall on a day that is not a Valuation Date, then such date shall be postponed to the next day that is a Valuation Date.

12.9 Records

For so long as the Securities are represented by a Global Security in NGN form, the records of Euroclear and Clearstream, Luxembourg (which expression in this Condition 12.9 means the records that Euroclear and Clearstream, Luxembourg hold for their customers which reflect the amount of such customers' interests in the Securities) shall be conclusive evidence of the number of the Securities represented by the Global Security and, for these purposes, a statement issued by the Relevant Clearing System (which statement shall be made available to the bearer upon request) stating the number of Securities represented by the Global Security at any time shall be conclusive evidence of the records of the Relevant Clearing System at that time.

12.10 Negotiability of Global Bearer Security

If the Securities are Bearer Securities represented by a Global Bearer Security, the Global Bearer Security is a bearer document and negotiable and accordingly:

- (a) is freely transferable by delivery and such transfer shall operate to confer upon the transferee all rights and benefits appertaining hereto and to bind the transferee with all obligations appertaining hereto pursuant to these Conditions;
- (b) the holder of the Global Bearer Security is and shall be absolutely entitled as against all previous holders to receive all amounts by way of amounts payable or deliverable upon redemption or otherwise payable or deliverable in respect of the Global Bearer Security and the Issuer waives as against such holder and any previous holder of the Global Bearer Security all rights of set-off or counterclaim that would or might otherwise be available to it in respect of the obligations evidenced by the Global Bearer Security; and
- (c) payment upon due presentation of the Global Bearer Security will operate as a good discharge against such holder and all previous holders of the Global Bearer Security.

12.11 Rounding

For the purposes of any calculations required pursuant to the Conditions (unless otherwise specified), (i) any number of Underlying Assets to be delivered to the Issuer shall be rounded up to the Delivery Precision Level, (ii) any number of Underlying Assets to be delivered by the Issuer shall be rounded down to the Delivery Precision Level, (iii) all amounts of cash in the relevant Currency to be paid to the Issuer shall be rounded up to the nearest EUR 0.01 (if the relevant Currency is EUR) or as specified

in the Final Terms (if the relevant Currency is not EUR), and (iv) all amounts of cash in EUR to be paid by the Issuer shall be rounded down to the nearest EUR 0.01 (if the relevant Currency is EUR) or as specified in the Final Terms (if the relevant Currency is not EUR), in each case as may be adjusted by the Issuer (or the Management and Determination Agent on its behalf) from time to time, including to reflect changes in rounding conventions in the trading of the relevant Underlying Assets or payments in the relevant Currency.

13 **PRESCRIPTION**

Claims against the Issuer for payment under the Conditions in respect of the Securities shall be prescribed and become void unless made within 10 years from the date on which the payment or delivery of principal in respect of the Securities first became due or (if any amount of the money payable was improperly withheld or refused) the date on which payment in full of the amount outstanding was made or (if earlier) the date seven days after that on which notice is duly given to the Securityholders that, upon further presentation of the Securities being made in accordance with the Conditions, such payment will be made, provided that payment is in fact made upon such presentation (such date the “**Relevant Date**”) save that if the Securities are in global bearer form claims in respect of principal in respect of the relevant Global Bearer Security shall become void unless the Global Bearer Security is presented for payment within a period of 10 years from the appropriate Relevant Date.

14 **EVENTS OF DEFAULT**

14.1 If any of the following events (each, an “**Event of Default**”) occurs, the Trustee at its discretion may, or will if so directed in writing by holders of at least one-fifth in number of a Class of Securities then outstanding or if so directed by an Extraordinary Resolution of such Class of Securities (provided that in each case the Trustee shall have been indemnified and/or secured and/or pre-funded to its satisfaction), give notice to the Issuer (copied to each Programme Party) (such notice an “**Event of Default Redemption Notice**”) that such relevant Class of Securities are, and they shall immediately become, due and payable at their Redemption Amount in accordance with Condition 9.5 (*Compulsory Redemption on Event of Default*):

- (a) an Issuer Insolvency Event occurs;
- (b) the Issuer defaults in the payment of any sum or delivery of any Asset Entitlement due in respect of that Class of Securities or any of them for a period of 14 calendar days or more;
- (c) the Issuer does not perform or comply with any one or more of its obligations (other than a payment obligation) under that Class of Securities, the Trust Deed, any other Programme Document or any Security Document, which default is incapable of remedy or, if in the opinion of the Trustee capable of remedy, is not remedied within 30 calendar days (or such longer period as the Trustee may permit) after notice of such default shall have been given to the Issuer by the Trustee (and, for these purposes, a failure to perform or comply with an obligation shall be deemed to be remediable notwithstanding that the failure results from not doing an act or thing by a particular time);
- (d) any order is made by any competent court or any resolution passed for the winding-up or dissolution of the Custodian in respect of a Class of Securities, save for the purposes of amalgamation, merger, consolidation, reorganisation or other similar arrangement on terms previously approved by an Extraordinary Resolution; or
- (e) the Custodian in respect of a Class of Securities seeks or becomes subject to the appointment of an administrator, provisional liquidator, conservator, receiver, trustee, custodian or other similar official for it or for all or substantially all its assets.

14.2 The Issuer will, as soon as reasonably practicable after receipt of any Event of Default Redemption Notice, give Notice thereof to the applicable Securityholders of such Class.

14.3 The Issuer has undertaken in the Trust Deed that on each anniversary of the issue date of a relevant Class of Securities issued under the Programme and also within five days after any request by the Trustee, it will send to the Trustee a certificate signed by a director of the Issuer to the effect that as at a date not more than five calendar days prior to the date of the certificate no Compulsory Redemption Event, Issuer Insolvency Event or Event of Default in relation to such Class did then exist and no such event existed at any time prior thereto since the date of the last such certificate (if any) or, in the case of the first such certificate, the date of issue of the relevant Class of Securities.

15 ENFORCEMENT

15.1 Pursuant to the terms of the Trust Deed, only the Trustee may, at its discretion and without further notice, take such action or step or institute such proceedings against the Issuer, as it may think fit to enforce the rights of the Trustee and the rights of the holders of any Class of Securities against the Issuer whether the same arise under general law, the Trust Deed, the relevant Securities, the Security Documents or any other Programme Document to which it is a party or otherwise, but, in each case, it need not take any such action or step or institute proceedings unless in accordance with the terms of the Trust Deed, the Trustee is so directed by an Extraordinary Resolution or in writing by holders of at least one-fifth in number of the Securities of a Class then outstanding and it shall have been secured and/or pre-funded and/or indemnified to its satisfaction. Each Class of Securityholders shall act independently in directing the Trustee to take such action as set out in this Condition 15.1, and any action so taken by the Trustee shall relate only to the rights of the holders of such applicable Class of Securities.

15.2 None of the holders of a Class of Securities shall be entitled to proceed directly against the Issuer unless the Trustee, having become bound to proceed in accordance with the terms of the Trust Deed, fails or is unable to do so within a reasonable period and such failure or inability is continuing.

15.3 The Securityholders of each Class acknowledge and agree that only the Trustee may enforce the Security over the Secured Property applicable to such Class in accordance with, and subject to the terms of, each relevant Security Document.

15.4 The Trustee shall not be required to take any action in relation to the Security constituted by any Security Document which may be illegal or contrary to any applicable law or regulation.

The Trustee shall not be required to take any action in relation to the Security constituted by any Security Document which may cause it to expend or risk its own funds or otherwise incur any liability (including any personal liability) in the performance of its duties or in the exercise of any of its rights, powers and discretions, without first being indemnified and/or secured and/or prefunded to its satisfaction.

Limited Recourse and Non-Petition

15.5 Save as provided for in the Trust Deed, the Securityholders and the Programme Parties in respect of any claim against the Issuer with respect to a Class of Securities shall have recourse only to the Secured Property in respect of such Class of Securities and any sums derived therefrom. If, the Trustee (or any other secured party) having realised the same, the net proceeds are insufficient for the Issuer to make all payments and meet all obligations which, but for the effect of this Condition 15.5, would then be due in respect of the such Class of Securities, the obligations of the Issuer to each Securityholder and the Programme Party of such applicable Class shall be limited to such net proceeds of realisation, neither the Trustee nor any person acting on its behalf shall be entitled to take any further steps against the Issuer to recover any further sums or property in respect of the Securities of any Class. Neither the Trustee nor any Securityholder or Programme Party of any Class shall be entitled to institute, nor join with any other person in bringing, instituting or joining, any bankruptcy, suspension of payments, moratorium of any indebtedness, winding up, re-organisation, arrangement, insolvency or liquidation proceeding or other proceeding under any similar law (whether court based or otherwise) in relation to the Issuer (except for the appointment of a receiver pursuant to the relevant Security Document and lodging claims and proving in any insolvency proceedings of whatsoever nature relating to the Issuer not instituted by it), nor shall they have any claim in respect of any sum arising in or other obligation in respect of the Secured Property for any other Class or any other assets of the Issuer, except as otherwise

provided for in the Trust Deed. The provisions of this Condition 15.5 shall survive notwithstanding any redemption of the Securities or the termination or expiration of any Programme Document.

16 MEETINGS OF SECURITYHOLDERS, MODIFICATION, WAIVER, SUBSTITUTION AND RESTRICTIONS

16.1 Meetings of Securityholders

The Trust Deed contains provisions for convening meetings of the Securityholders of each Class of Securities to consider any matter affecting their interests, including modification by Extraordinary Resolution of the relevant Class of Securities (including these Conditions or the provisions of the Trust Deed insofar as the same may apply to such Class of Securities).

The quorum at any such meeting for passing an Extraordinary Resolution will be two or more Securityholders of the relevant Class of Securities or agents present in person holding or representing in the aggregate more than 50 per cent. of the number of the Securities of such Class for the time being outstanding or, at any adjourned such meeting, two or more Securityholders of the relevant Class of Securities or agents present in person being or representing Securityholders of such Class, whatever the number of the Securities of such Class so held or represented, and an Extraordinary Resolution duly passed at any such meeting shall be binding on all the Securityholders of such Class, whether present or not, except that any Extraordinary Resolution proposed, inter alia, (i) to amend the dates of maturity or redemption of the Securities of such Class (ii) to reduce or cancel the Principal Amount payable on redemption of, the Securities of such Class, (iii) to change any method of calculating the Asset Entitlement, or the Redemption Amount, (iv) to change the currency or currencies of payment or Base Currency (saved as provided for in Condition 18.2 (*Consolidation and division of Tranches and Classes*)) of the Securities of such Class, (v) to take any steps which as specified in the Trust Deed may only be taken following approval by an Extraordinary Resolution to which the special quorum provisions apply, (vi) to modify the provisions concerning the quorum required at any meeting of Securityholders of such Class or the majority required to pass an Extraordinary Resolution, (vii) to modify the provisions of the Trust Deed concerning this exception or (viii) to modify any other provisions specifically identified for this purpose in the Trust Deed, or an applicable relevant Security Document will only be binding if passed at a meeting of the Securityholders of such Class, the quorum at which shall be two or more Securityholders of such Class or agents present in person holding or representing in the aggregate not less than 75 per cent. of the number of Securities of such Class for the time being outstanding, or at any adjourned meeting, two or more Securityholders of such Class or agents present in person being or representing in the aggregate not less than 10 per cent. of the number of the Securities of such Class so held or represented. The holder of a Bearer Security or Registered Security in global form representing all of the Securities of such Class for the time being outstanding will be treated as being two persons for the purposes of such quorum requirements. A resolution in writing signed by or on behalf of the holders of not less than 75 per cent. of the aggregate number of the Securities of each Class for the time being outstanding shall for all purposes be as valid and effectual as an Extraordinary Resolution passed at a meeting of Securityholders of such Class.

16.2 Modification of the relevant Programme Documents

Subject to Condition 16.3 (*Substitution*), the Trustee may agree, without the consent of any of the Securityholders, to (i) any modification to these Conditions, the Trust Deed, the Security Documents and/or any other Programme Document which is, in the opinion of the Trustee, of a formal, minor or technical nature or is made to correct a manifest error, (ii) an Issuer Technical Amendment, provided that the Issuer has certified in writing to the Trustee upon which certification the Trustee may rely without any obligation to investigate or verify or form its own opinion and, absent its wilful misconduct or gross negligence, without liability to any person that any such modification (1) is in its opinion not materially prejudicial to the interests of any Class of Securityholders and (2) has been drafted solely for the purposes indicated in paragraph (i) or (ii) of the definition of Issuer Technical Amendment and meets the requirements of the proviso to such definition, and (iii) any other modification, and any waiver or authorisation of any breach or proposed breach of any of these Conditions or any of the provisions of the Trust Deed and/or any other Programme Document to which the Trustee is a party that is in the opinion of the Trustee not materially prejudicial to the interests of all Classes of Securityholders. Any

such modification, authorisation or waiver will be binding on each Class of Securityholders and such modification will be notified by the Issuer to each Class of Securityholders as soon as reasonably practicable.

16.3 Substitution

The Trust Deed contains provisions permitting the Trustee to agree, without the consent of the Securityholders, to the substitution, in place of the Issuer (or of any previous substitute) as the principal debtor under the Trust Deed, the other Programme Documents to which it is a party and the Securities of each Class, of any other company (incorporated in any jurisdiction) (any such substitute company being the “**Substituted Obligor**”) if the following conditions are satisfied:

- (a) a deed is executed or undertaking given by the Substituted Obligor to the Trustee, in form and manner satisfactory to the Trustee, agreeing to be bound by the Trust Deed, any Security Documents and the Securities of each Class (with such consequential amendments as the Trustee may deem appropriate) as if the Substituted Obligor had been named in the Trust Deed, each Security Document and the Securities as the principal debtor in place of the Issuer;
- (b) the Substituted Obligor assumes all rights, obligations and liabilities in relation to the Secured Property, acknowledges the Security created in respect thereof pursuant to the Security Documents and takes all such action as the Trustee may require so that the Security and the Secured Property constitutes a valid mortgage, charge, assignment, pledge, lien or other security interest as was originally created by the Issuer for the obligations of the Substituted Obligor;
- (c) any director of the Substituted Obligor certifies to the Trustee that it will be solvent immediately after such substitution (in which case, the Trustee need not have regard to the Substituted Obligor’s financial condition, profits or prospects or compare them with those of the Issuer);
- (d) the Trustee will be satisfied (if it requires, by reference to legal opinions) that (a) all necessary governmental and regulatory approvals and consents necessary for or in connection with the assumption by the Substituted Obligor of liability as principal debtor in respect of, and of its obligations under, the Securities of each Class and any Programme Document have been obtained and (b) such approvals and consents are at the time of substitution in full force and effect;
- (e) the Issuer and the Substituted Obligor will execute and the Issuer shall procure that any Programme Party will execute such other deeds, documents and instruments (if any) as the Trustee may require in order that such substitution is fully effective and comply with such other requirements in the interests of the Securityholders as the Trustee may direct;
- (f) the Issuer and the Substituted Obligor comply with such other requirements as the Trustee may direct in the interests of the Securityholders; and
- (g) a legal opinion satisfactory to the Trustee is provided concerning any proposed substitution.

An agreement by the Trustee pursuant to this Condition 16.3 and the Trust Deed will, if so expressed, release the Issuer (or a previous substitute) from any or all of its obligations under the Trust Deed, the Securities and the other relevant Programme Documents. The Substituted Obligor shall give notice of the substitution to the Securityholders within 14 calendar days of the execution of such documents and compliance with such requirements.

In connection with any proposed substitution of the Issuer, the Issuer and the Trustee may, without the consent of the Securityholders, agree to a change of the law from time to time governing such Securities and/or the Trust Deed and/or any Programme Document.

On completion of the formalities set out in this Condition 16.3 and the Trust Deed, the Substituted Obligor shall be deemed to be named in these Conditions, the Trust Deed and the other Programme Documents and the Securities as the principal debtor in place of the Issuer (or of any previous substitute) and these Conditions, the Trust Deed, the other Programme Documents and the Securities shall be

deemed to be amended as necessary to give effect to the substitution.

16.4 Entitlement of the Trustee

In accordance with the terms of the Trust Deed, in connection with the exercise of its functions under the relevant Programme Documents, the Trustee will have regard to the interests of the Securityholders as a whole and will not have regard to the consequences of such exercise for individual Securityholders of any individual Class and the Trustee will not be entitled to require, nor shall any Securityholder be entitled to claim, from the Issuer any indemnification or payment in respect of any Tax consequence of any such exercise upon individual Securityholders of any individual Class.

So long as the Securities are in global form and such Global Security is held by or on behalf of the Relevant Clearing System, in considering the interests of Securityholders, the Trustee may have regard to any information provided to it by the Relevant Clearing System or its operator as to the identity (either individually or by category) of its accountholders or participants with entitlements to any such Global Security and may consider such interests on the basis that such accountholders or participants were the holder(s) thereof.

17 **REPLACEMENT OF SECURITIES**

If a Security in bearer form is lost, stolen, mutilated, defaced or destroyed, it may be replaced, subject to applicable laws, regulations and stock exchange or other relevant authority regulations, at the specified office of the Issuing and Paying Agent in London or such other Paying Agent, as the case may be, as may, from time to time, be designated by the Issuer for the purpose and notice of whose designation is given to Securityholders, in each case on payment by the claimant of the fees and costs incurred in connection therewith and on such terms as to evidence, security, indemnity (which may provide, inter alia, that if the allegedly lost, stolen or destroyed Security is subsequently presented for payment there shall be paid to the Issuer on demand the amount payable by the Issuer in respect of such Security) and otherwise as the Issuer may require. Mutilated or defaced Securities must be surrendered before replacements will be issued.

18 **ISSUE OF FURTHER TRANCHES AND CLASSES OF SECURITIES**

18.1 Further Tranches and Classes

The Issuer may, from time to time (without the consent of the Trustee or any Securityholder), in accordance with the Trust Deed, the Conditions and the Authorised Participant Agreement(s), create and issue further Tranches of Securities so that such further issue shall be consolidated and form a single Class with the outstanding Securities of any Class or upon such terms as the Issuer may determine at the time of their issue and/or incur further obligations relating to such Securities.

Only an Authorised Participant may request that the Issuer issue additional Tranches of Securities by delivering a valid Subscription Form subject to and in accordance with the terms of the relevant Authorised Participant Agreement.

The Issuer will only accept a Subscription Form and issue Securities if:

- (a) a Subscription Form is determined to be valid by or on behalf of the Issuer;
- (b) the acceptance of such Subscription Form will not cause the Programme Maximum Number of Securities to be exceeded; and
- (c) all conditions precedent to an issue of Securities (including, without limitation, payment of the Subscription Fee) are satisfied.

In any event, the Issuer is entitled to reject any Subscription Form at any time, at its absolute discretion.

The Issuer may suspend the issuance of further Securities at any time. If a Subscription Suspension Event occurs, the Issuer shall not accept any Subscription Forms for Securities with effect from the date

of suspension specified in the relevant notice to the Management and Determination Agent and the Authorised Participants until such time (if any) as the Issuer notifies such Programme Parties that it shall recommence the issue of further Tranches of Securities. The effective date of any such suspension will be specified in the related notice and will be a day not earlier than the Business Day following the date of such notice. The Issuer shall give notice to Securityholders in accordance with Condition 20 (*NOTICES*) of any such suspension as soon as reasonably practicable after giving any notice of suspension of subscriptions.

In relation to any Subscription Form which has been accepted by or on behalf of the Issuer but in respect of which the Subscription Settlement Date has not yet occurred as at the date of the occurrence of an Event of Default, each such Subscription Form shall automatically be cancelled with effect from the date of the occurrence of such Event of Default.

In relation to any Subscription Form which is valid but in respect of which Securities are pending issue and settlement to the relevant Authorised Participant as at the Compulsory Redemption Date or the date of delivery of an Event of Default Redemption Notice (due to the Subscription Settlement Date not having occurred at such date, the relevant Authorised Participant not having delivered in full the relevant Subscription Amount on a Subscription Settlement Date falling prior to such date, or otherwise), any such Subscription Form shall automatically be cancelled with effect from such Compulsory Redemption Date or date of delivery of an Event of Default Redemption Notice (as applicable).

If at any time after the occurrence of the Subscription Settlement Date in respect of which the relevant Authorised Participant has not delivered the related Subscription Amount a Compulsory Redemption Event occurs or an Event of Default Redemption Notice is delivered, Securities issued on any such Subscription Settlement Date which are pending settlement to the relevant Authorised Participant shall automatically be cancelled with effect from the date of the occurrence of such Compulsory Redemption Date or date of delivery of an Event of Default Redemption Notice (as applicable). Securities requested for issue and Subscribed for by an Authorised Participant may be held on an inventory basis by such Authorised Participant and offered for sale and/or sold over a period of time.

Any new securities forming a single Class with the Securities and which are expressed to be constituted by the Trust Deed and secured by the applicable Security Documents relating to such Class will, upon the issue thereof by the Issuer, be constituted by the Trust Deed and secured by such Security Documents without any further formality and irrespective of whether or not the issue of such securities contravenes any covenant or other restriction in the Trust Deed, the Class Maximum Number of Securities or the Programme Maximum Number of Securities and references in these Conditions to “**Secured Property**” and “**Securities**” shall be construed accordingly.

18.2 Consolidation and division of Tranches and Classes

- (a) The Issuer may consolidate or divide all of the Securities into Securities of the same Class but with a proportionately larger or smaller Principal Amount and Asset Entitlement (if applicable). Such consolidation or division shall be effected by deed or instrument supplemental to the Trust Deed.
- (b) Whenever as a result of consolidation of Securities a Securityholder would become entitled to a fraction of a Security the Issuer will redeem such fractional Security.

18.3 Further Securities; Other Pools; Transfers To New Pools

The Issuer may at any time (without the consent of the Securityholders and without giving prior notice) determine to divide any Class of Securities (the “**Existing Securities**”) by allocating some of the Secured Property attributable to those Existing Securities to a new Class of Securities with the same type of Underlying Asset(s) (the “**New Securities**”). If the Issuer determines to do so, the following provisions shall apply:

- (a) the Issuer may transfer all or some of the relevant Underlying Asset(s) attributable to the

Existing Securities;

- (b) prior to or on the transfer becoming effective, the Issuer shall create the New Securities on the same terms as the Existing Securities, each having a Principal Amount determined in accordance with Condition 18.3(c) below constituted by an instrument or deed on the same terms (*mutatis mutandis*) as the Principal Trust Deed (for the avoidance of doubt there shall be no obligation to procure a listing of the Securities) and on terms that such New Securities shall have recourse only to the assets allocated to those New Securities, and (subject as provided in Condition 18.3 (e) and (f) shall issue such New Securities to the Securityholders of the Existing Securities outstanding immediately prior to the transfer becoming effective on the basis of one New Security for each Existing Security. For this purpose (but subject as provided in Condition 18.3(e) and (f) any Security in respect of which an Event of Default has occurred and is continuing shall be treated as outstanding;
- (c) the Principal Amount and Asset Entitlement of each New Security shall be the proportion of the Principal Amount and Asset Entitlement respectively of each Existing Security outstanding immediately prior to the transfer becoming effective of the aggregate Base Currency Equivalent of each Underlying Asset to be transferred relative to the aggregate Base Currency Equivalent of the relevant Underlying Asset(s) attributable to the Existing Securities, and on the creation and issue of the New Securities becoming effective the Principal Amount and Asset Entitlement of each Existing Security shall be reduced accordingly. For the purposes of the calculations to be made in accordance with this paragraph:
 - (i) Securities which are the subject of Redemption Orders shall be excluded, and the Principal Amounts and Asset Entitlements referred to therein shall be calculated as though all such Underlying Asset(s) had been transferred; and
 - (ii) Underlying Asset(s) which have been received for the purposes of a Subscription Order that has not been completed by the issue of Securities shall be excluded, and the Principal Amounts and Asset Entitlement referred to therein shall be calculated as though all such Underlying Asset(s) had not been received;

- (i) the Issuer may at any time after the Threshold Event Date, for so long as the Issuer determines that the prevailing market value of the Coin Entitlement of a Crypto-Basket Linked Security of that Class continues to be less than the percentage level of the Principal Amount of a Crypto-Basket Linked Security of that Class specified in the relevant Final Terms, suspend the right to request redemption of such Crypto-Basket Linked Securities pursuant to Condition 3 (*REDEMPTION OF CRYPTO-BASKET LINKED SECURITIES*) of this Issue Specific Option II; and
- (ii) the Issuer shall give notice convening a meeting of Securityholders of such Class on a date not more than 30 calendar days after the Threshold Event Date for the purpose of considering an Extraordinary Resolution which would have the effect of reducing the Principal Amount of a Crypto-Basket Linked Security of that Class to an amount the Issuer determines in its discretion.

- (c) any such suspension may continue for a period of up to 60 days, and may continue thereafter at the discretion of the Issuer in the case of a suspension pursuant to Condition 3.9 (*Disruption Events*) of this Issue Specific Option II, if the Extraordinary Resolution referred to in Condition 3.7 (*Suspension of Redemptions*) of this Issue Specific Option II above has not been passed; and
- (d) any suspension that has been implemented in accordance with Condition 3.7 (*Suspension of Redemptions*) of this Issue Specific Option II shall not affect any redemption pursuant to an Redemption Form, received (or deemed to have been received) on a prior date to that on which the suspension commenced, but any Redemption Form in respect of Crypto-Basket Linked Securities submitted or deemed to be received on a Valuation Date when the right to request redemption of the Crypto-Basket Linked Securities pursuant to Condition 3 (*REDEMPTION OF CRYPTO-BASKET LINKED SECURITIES*) of this Issue Specific Option II is suspended pursuant to this Condition 3.9 (*Disruption Events*) of this Issue Specific Option II shall be invalid.

 - (i) any validated and/or non-validated Subscription and/or Redemption Orders and any request for the Redemption of Crypto-Basket Linked Securities of such Class;
 - (ii) the settlement of any Redemption of Crypto-Basket Linked Securities of such Class; and/or
 - (iii) any Compulsory Redemption Settlement Date, Optional Redemption Settlement Date and/or delivery of any relevant Cryptocurrency or the payment of any amount in connection therewith,

to the Management and Determination Agent, the Authorised Participants, the Trustee, and the relevant Custodian(s), specifying:

- (A) the Disruption Event which has occurred or is existing on the relevant day;
- (B) whether the suspension and/or postponement relating to such Disruption Event

will be in respect of a single day (a “**Suspended Day**”) or for as long as the Disruption Event continues (a “**Suspension Period**”); and

- (C) which of the dates and/or events set out in Conditions 3.10(a)(i) to 3.10(a)(iii) (*Determination of Disruption Events and Suspension*) of this Issue Specific Option II will be postponed and/or suspended on such Suspended Day or during such Suspended Period, as applicable (and, in determining this, the Issuer shall consider whether the relevant Disruption Event would disrupt the actions required to be performed by it, the Management and Determination Agent, any Authorised Participant and/or any other Programme Party in connection with Redemption of Crypto-Basket Linked Securities, and/or any Compulsory Redemption of the Crypto-Basket Linked Securities),

such notice, a “**Suspension Notice**”. If the Suspension Notice is in respect of a Suspension Period, such period will end when the Issuer notifies the Management and Determination Agent, the Authorised Participants and the Trustee that such suspension and/or postponement is over.

- (b) The Issuer is not under any obligation to monitor whether or not a Disruption Event has occurred or is continuing with respect to a Class of Crypto-Basket Linked Securities on any day unless a Suspension Notice has been given in respect of a Suspension Period in which case the Issuer’s obligation to monitor the relevant Disruption Event will continue until it has determined that such Disruption Event has ceased (following which it will give notification at the end of the Suspension Period in accordance with Condition 3.10(a) (*Determination of Disruption Events and Suspension*) of this Issue Specific Option II). The Issuer shall have no liability to the Trustee, any Custodian, any Securityholder, any Authorised Participant or any other person for any determination or non-determination that it makes in good faith in respect of the occurrence or existence of a Disruption Event.
- (c) The Issuer shall, as soon as reasonably practicable after receipt by it of a Suspension Notice give notice thereof to the Securityholders in accordance with Condition 20 (*NOTICES*) of the General Terms and Conditions.

3.11 Postponement relating to the Redemption of the Crypto-Basket Linked Securities

- (a) If, in respect of a Disruption Event, the Issuer has specified in the related Suspension Notice that the Compulsory Redemption Settlement Date, Final Redemption Date and/or Optional Redemption Settlement Date (a “**Disruption Postponable Date**”) shall be postponed until following the end of the Suspended Day or Suspension Period, then if any Disruption Postponable Date does occur on the Suspended Day or during the Suspension Period, such Disruption Postponable Date shall be deemed to have been postponed until the first following Non-Disrupted Day, provided that if no such Non-Disrupted Day has occurred on or prior to the 30th Business Day following such Disruption Postponable Date, the Issuer, acting in good faith and in consultation with the Management and Determination Agent, may determine an appropriate method for Redeeming the Crypto-Basket Linked Securities and determining the Final Redemption Date and/or Optional Redemption Settlement Date, as applicable, for the purposes of such redemption of such Crypto-Basket Linked Securities (a “**Disrupted Redemption Method**”). For the avoidance of doubt, (i) if multiple days are specified as Disruption Postponable Dates, such Disruption Postponable Dates shall be deemed to have been postponed consistently to ensure that the same number of days passes between these multiple days as would pass if no Disruption Event had occurred, and (ii) if any Disruption Postponable Date is postponed in accordance with this Issue Specific Option II, then any other dates or

periods determined by reference to such Disruption Postponable Date that have yet to occur or conclude as at the time of such postponement shall also be postponed or adjusted accordingly.

A Redemption Form that is lodged by the Notice Deadline set out in the relevant Final Terms on a Business Day will be treated as lodged on that Business Day. A Redemption Form that is lodged after the Notice Deadline set out in the relevant Final Terms on a Business Day will be treated as having been lodged on the following Business Day.

4. **COMPULSORY REDEMPTION BY THE ISSUER**

In relation to all Compulsory Redemptions to be effected in accordance with the Conditions and this Issue Specific Option II, the Issuer will, on:

- (a) the Compulsory Cash Redemption Sale Date (in the case of Redemption pursuant to Condition 9.1 (*Compulsory Redemption on Termination – Issuer Call Redemption Event*) of the General Terms and Conditions); or

The Issuer will transfer the Redemption Amount to the relevant Securityholder on the Compulsory Redemption Settlement Date by transfer to the Securityholder's bank account or cheque made payable to the Securityholder and sent by post at the risk of the Securityholder subject to the Securityholder having delivered the Underlying Assets being Redeemed to the Issuer by either depositing them into an appropriate Relevant Clearing System account (as directed by the Issuer) and giving correct delivery free of payment instructions in a Relevant Clearing System or delivering the certificates in respect of them to the Issuer (or otherwise having delivered such Crypto-Basket Linked Securities to the Issuer by agreement with the Issuer) provided that (if applicable) the Securityholder has made Acceptable Delivery.

The obligations of the Issuer in respect of Crypto-Basket Linked Securities being Redeemed shall be satisfied by transferring the Redemption Amount in accordance with the provisions of this Condition.

Securityholder at the time that the Redemption Amount is paid to the Securityholder.

6. AIRDROP AND FORK EVENTS

- 6.1 The Issuer shall not actively engage or participate in any Airdrop Event and neither the Issuer nor the Trustee are obliged to assess or monitor any Airdrop Event.
- 6.2 The occurrence of a Fork Event may result in the Issuer potentially being able to obtain a New Cryptocurrency in which case the Issuer may seek not to obtain any New Cryptocurrency. If, as a result of a Fork Event, the Cryptocurrency attributable to or forming part of the Secured Property in respect of a class of Crypto-Basket Linked Securities has been rendered unavailable or converted into or replaced by a New Cryptocurrency, the Issuer may reduce the Coin Entitlement for the relevant Cryptocurrency held in the Secured Property that has been lost or converted into or replaced by a New Cryptocurrency. If, following the occurrence of a Fork Event, the Issuer opts to obtain the New Cryptocurrency and notifies the Trustee and the Securityholders in writing pursuant to Condition 20 (*NOTICES*) of the General Terms and Conditions accordingly, the Issuer may increase the Coin Entitlement for the relevant Cryptocurrency held in the Secured Property.
- 6.3 Whenever, as a result of the issuance of the Crypto-Basket Linked Securities, the Issuer becomes automatically entitled to receive any New Cryptocurrency as a result of an Airdrop Event, unless otherwise notified in writing to the Trustee and to Securityholders by notice pursuant to Condition 20 (*NOTICES*) of the General Terms and Conditions, the Securityholders shall not be entitled to receive any value from the New Cryptocurrency and no New Cryptocurrencies shall be credited to the Secured Custody Accounts or any other account held by a Custodian in the name of the Issuer. In such case, the Issuer may, however, opt to accept the benefit of the New Cryptocurrency on its own behalf.

This Issue Specific Option II may be amended in accordance with the Trust Deed and the Conditions. Any amendment to this Issue Specific Option II will be notified to Securityholders by notice under Condition 20 (*NOTICES*) of the General Terms and Conditions, and shall not take effect until at least 30 days following such announcement, save that (i) a reduction in any fees and (ii) minor technical amendments which, in the opinion of the Trustee, are not materially prejudicial to the interests of the Securityholders may take effect on announcement.

- 8.3 The Issuer shall endeavour to provide holders of Crypto-Basket Linked Securities with notice of a Voluntary Rebalancing not less than 5 Business Days prior to the expected Rebalancing Date of that Voluntary Rebalancing.

- 8.5 The Issuer shall accordingly adjust the Coin Entitlement of a Class of Crypto-Basket Linked Securities

in existence to correspond, to the extent possible, to the number, quantity and type of Cryptocurrencies held in respect of such Class of Crypto-Basket Linked Securities immediately following the Rebalancing by applying the Weight Adjustment Factor. If, for whatever reason, the Issuer is unable (in good faith) to calculate the Weight Adjustment Factor, such as in circumstances where the trading activities referenced in Condition 8.4 (*REBALANCING OF CRYPTO-BASKET LINKED SECURITIES*) of this Issue Specific Option II above have not completed or settled in full, then the calculation of the Coin Entitlement may be postponed until the Weight Adjustment Factor is able to be calculated by the Issuer.

If, as a result of a Fork Event, the Cryptocurrency attributable to or forming part of the Secured Property in respect of a class of Crypto-Index Linked Securities has been rendered unavailable or converted into or replaced by a New Cryptocurrency, the Issuer may reduce the Coin Entitlement for the relevant Cryptocurrency held in the Secured Property that has been lost or converted into or replaced by a New Cryptocurrency. If, following the occurrence of a Fork Event, the Issuer opts to obtain the New Cryptocurrency and notifies the Trustee and the Securityholders in writing pursuant to Condition 20 (*NOTICES*) of the General Terms and Conditions accordingly, the Issuer may increase the Coin Entitlement for the relevant Cryptocurrency held in the Secured Property.
- 6.3 Whenever, as a result of the issuance of the Crypto-Index Linked Securities, the Issuer becomes automatically entitled to receive any New Cryptocurrency as a result of an Airdrop Event, unless otherwise notified in writing to the Trustee and to Securityholders by notice pursuant to Condition 20 (*NOTICES*) of the General Terms and Conditions, the Securityholders shall not be entitled to receive any value from the New Cryptocurrency and no New Cryptocurrencies shall be credited to the Secured Custody Accounts or any other account held by a Custodian in the name of the Issuer. In such case, the Issuer may, however, opt to accept the benefit of the New Cryptocurrency on its own behalf.

Any amendment to this Issue Specific Option III will be notified to Securityholders by notice under Condition 20 (*NOTICES*) of the General Terms and Conditions, and shall not take effect until at least 30 days following such announcement, save that (i) a reduction in any fees and (ii) minor technical

- 8.5 The Issuer shall accordingly adjust the Coin Entitlement of a Class of Crypto-Index Linked Securities in existence to correspond, to the extent possible, to the number, quantity and type of Cryptocurrencies held in respect of such Class of Crypto-Index Linked Securities immediately following the Rebalancing by applying the Weight Adjustment Factor. such notice, a “**Suspension Notice**”. If the Suspension Notice is in respect of a Suspension Period, such period will end when the Issuer notifies the Management and Determination Agent, the Authorised Participants and the Trustee that such suspension and/or postponement is over.

 - (i) any validated and/or non-validated Subscription and/or Redemption Orders and any request for the Redemption of Equity-Index Linked Securities of such Class;
 - (ii) the settlement of any Redemption of Equity-Index Linked Securities of such Class; and/or

- (C) which of the dates and/or events set out in Conditions 3.10(a)(i) to 3.10(a)(iii) of this Issue Specific Option VI will be postponed and/or suspended on such Suspended Day or during such Suspended Period, as applicable (and, in determining this, the Issuer shall consider whether the relevant Disruption Event would disrupt the actions required to be performed by it, the Management and Determination Agent, any Authorised Participant and/or any other Programme Party in connection with Redemption of Equity-Index Linked Securities, and/or any Compulsory Redemption of the Equity-Index Linked Securities),

such notice, a “**Suspension Notice**”. If the Suspension Notice is in respect of a Suspension Period, such period will end when the Issuer notifies the Management and Determination Agent, the Authorised Participants and the Trustee that such suspension and/or postponement is over.

In addition, if the Issuer determines that a Secured Accounts Disruption has occurred or exists with respect to a Class of Equity-Index Linked Securities on any day, it may (but shall not be obliged to) by the Business Day immediately following a definitive determination give notice of a Permanent Adjustment to the Management and Determination Agent, the Authorised Participants, the Trustee, and the relevant Custodian(s), specifying the amount of that Permanent Adjustment.

For the avoidance of doubt, (i) if multiple days are specified as Disruption Postponable Dates, such Disruption Postponable Dates shall be deemed to have been postponed consistently to ensure that the same number of days passes between these multiple

days as would pass if no Disruption Event had occurred, and (ii) if any Disruption Postponable Date is postponed in accordance with this Issue Specific Option VI, then any other dates or periods determined by reference to such Disruption Postponable Date that have yet to occur or conclude as at the time of such postponement shall also be postponed or adjusted accordingly.

- 5.2 On a Compulsory Redemption of Equity-Index Linked Securities by the Issuer, the Issuer shall notify the Class of Securityholders whose Equity-Index Linked Securities are subject to Compulsory Redemption of the aggregate amount of the Redemption Deductions, and their allocation to particular Securityholders pursuant to Condition 20 (*NOTICES*) of the General Terms and Conditions.

- 7.3 The Issuer shall endeavour to provide holders of Equity-Index Linked Securities with notice of a Voluntary Rebalancing not less than 5 Business Days prior to the expected Rebalancing Date of that Voluntary Rebalancing.

- 7.5 The Issuer shall accordingly adjust the Equity Entitlement of a Class of Equity-Index Linked Securities in existence to correspond, to the extent possible, to the number, quantity and type of Shares held in respect of such Class of Equity-Index Linked Securities immediately following the Rebalancing by applying the Weight Adjustment Factor. If, for whatever reason, the Issuer is unable (in good faith) to calculate the Weight Adjustment Factor, such as in circumstances where the trading activities referenced in Condition 7.4 of this Issue Specific Option VI above have not completed or settled in full, then the calculation of the Equity Entitlement may be postponed until the Weight Adjustment Factor is able to be calculated by the Issuer.

6. AMENDMENTS TO ISSUE SPECIFIC OPTION IX

This issue Specific Option IX may be amended in accordance with the Trust Deed and the Conditions. Any amendment to this Issue Specific Option IX will be notified to Securityholders by notice under Condition 20 (*NOTICES*) of the General Terms and Conditions, and shall not take effect until at least 30 days following such announcement, save that (i) a reduction in any fees and (ii) minor technical amendments which, in the opinion of the Trustee, are not materially prejudicial to the interests of the Securityholders may take effect on announcement.

7. REBALANCING OF ETP-INDEX LINKED SECURITIES

- 7.1 The ETP Entitlement shall be adjusted as provided in this Condition 7 (*REBALANCING OF ETP-INDEX LINKED SECURITIES*) (a “**Rebalancing**”) of this Issue Specific Option IX.
- 7.2 A Rebalancing will take place whenever the Index is rebalanced in accordance with its methodology (a “**Required Rebalancing**”), and may at the election of the Issuer take place on other occasions if the Issuer, acting in good faith and in a commercially reasonable manner, determines that a Rebalancing is desirable to help reduce tracking error with the Index or following the occurrence of a Rebalancing Index Disruption Event (a “**Voluntary Rebalancing**”).
- 7.3 The Issuer shall endeavour to provide holders of ETP-Index Linked Securities with notice of a Voluntary Rebalancing not less than 5 Business Days prior to the expected Rebalancing Date of that Voluntary Rebalancing.
- 7.4 The Issuer shall on the Rebalancing Dates try to match (to the extent reasonably practicable) the proportions of the Fund-Shares held in respect of the relevant ETP-Index Linked Security to the Weights, which may include the addition of a new type of Share subject to that Fund-Share being accepted by a Custodian for custody under the relevant Custody Agreement.
- 7.5 The Issuer shall accordingly adjust the ETP Entitlement of a Class of ETP-Index Linked Securities in existence to correspond, to the extent possible, to the number, quantity and type of Fund-Shares held in respect of such Class of ETP-Index Linked Securities immediately following the Rebalancing by applying the Weight Adjustment Factor. If, for whatever reason, the Issuer is unable (in good faith) to calculate the Weight Adjustment Factor, such as in circumstances where the trading activities referenced in Condition 7.4 (*REBALANCING OF ETP-INDEX LINKED SECURITIES*) of this Issue Specific Option IX above have not completed or settled in full, then the calculation of the ETP Entitlement may be postponed until the Weight Adjustment Factor is able to be calculated by the Issuer.

7.6 No money shall be payable by the Issuer to Securityholders, or by Securityholders to the Issuer, in respect of a Rebalancing.

7. Form of the Securities

The Securities of each Class will be in either bearer form or registered form. Bearer Securities and Registered Securities will be issued outside the United States in reliance on Regulation S under the Securities Act (“**Regulation S**”).

Bearer Securities

Each Class of Bearer Securities will be in bearer form and will initially be issued in the form of a temporary global security (a “**Temporary Global Security**”) which will:

- (a) if the Bearer Securities are intended to be issued in new global note (“**NGN**”) form, as stated in the Final Terms relating to such Class, be delivered on or prior to the original issue date of the Securities to a common safekeeper (the “**Common Safekeeper**”) for Euroclear Bank SA/NV (“**Euroclear**”) and Clearstream Banking SA (“**Clearstream, Luxembourg**”);
- (b) if the Bearer Securities are not intended to be issued in NGN form and the Relevant Clearing Systems are Euroclear and Clearstream, Luxembourg, as stated in the Final Terms relating to such Class, be delivered on or prior to the original issue date of the Securities to a common depository (the “**Common Depository**”) for Euroclear and Clearstream, Luxembourg; and
- (c) if the Bearer Securities are not intended to be issued in NGN form and the Relevant Clearing System is Clearstream Banking AG, Eschborn (“**Clearstream, Frankfurt**”), as stated in the Final Terms relating to such Class, be delivered on or prior to the original issue date of the Securities to Clearstream, Frankfurt.

On 13 June 2006 the European Central Bank (the “**ECB**”) announced that Securities in NGN form are in compliance with the 'standards for the use of EU securities settlement systems in ESCB credit operations' of the central banking system for the euro (the “**Eurosystem**”), *provided that* certain other criteria are fulfilled. At the same time the ECB also announced that arrangements for Securities in NGN form will be offered by Euroclear and Clearstream, Luxembourg as of 30 June 2006 and that debt securities in global bearer form issued through Euroclear and Clearstream, Luxembourg after 31 December 2006 will only be eligible as collateral for Eurosystem operations if the NGN form is used.

Where the Bearer Securities issued in respect of any Class are in NGN form, the Final Terms for such Class will also indicate whether such Bearer Securities are intended to be held in a manner which would allow Eurosystem eligibility. Any indication that the Bearer Securities are to be so held does not necessarily mean that the Bearer Securities will be recognised as eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem either upon issue or at any times during their life as such recognition depends upon satisfaction of the Eurosystem eligibility criteria. The Common Safekeeper for NGNs will either be Euroclear or Clearstream, Luxembourg or another entity approved by Euroclear and Clearstream, Luxembourg.

On or after the date (the “**Exchange Date**”) which is 40 days after the Temporary Global Security is issued, interests in a Temporary Global Security will, upon certification as to non-U.S. beneficial ownership in the form set out in the Temporary Global Security, be exchangeable, in whole or in part, for interests in a permanent Global Security (the “**Permanent Global Security**”) or for definitive Bearer Securities of the same Class (“**Definitive Securities**”), each as described in the Temporary Global Security. The Permanent Global Security in respect of any Class will be exchangeable for Definitive Securities as described in the Permanent Global Security. Each Bearer Security (and any interest therein), whether represented by a Temporary Global Security, Permanent Global Security or Definitive Security, may only be offered and sold to non U.S. persons in offshore transactions satisfying the requirements of Regulation S.

Whilst any Bearer Security is represented by a Temporary Global Security, payments of principal and any other amount payable in respect of the Securities due prior to the Exchange Date will be made (against presentation of the Temporary Global Security if the Temporary Global Security is not intended to be issued in NGN form)

only to the extent that certification (in the form set out in the Temporary Global Security) to the effect that the beneficial owners of interests in the Temporary Global Security are not U.S. persons or persons who have purchased for resale to any U.S. person, as required by U.S. Treasury regulations, has been received by Euroclear and/or Clearstream, Luxembourg and/or Clearstream Frankfurt and Euroclear and/or Clearstream, Luxembourg and/or Clearstream, Frankfurt, as applicable, has given a like certification (based on the certifications it has received) to the relevant Issuing and Paying Agent.

Payments of principal or any other amounts on a Permanent Global Security will be made through Euroclear and/or Clearstream, Luxembourg and/or Clearstream, Frankfurt, as applicable, (against presentation or surrender (as the case may be) of the Permanent Global Security if the Permanent Global Security is not intended to be issued in NGN form) without any requirement for certification.

Each Temporary Global Security or Permanent Global Security relating to Bearer Securities shall be exchangeable in whole but not in part for Definitive Securities if so specified in the relevant Final Terms only upon the occurrence of an Exchange Event. For these purposes, “**Exchange Event**” means that Euroclear or Clearstream, Luxembourg or Clearstream, Frankfurt or any other relevant clearing system is closed for business for a continuous period of 14 days (other than by reason of holidays, statutory or otherwise) or announces an intention to cease business permanently or does in fact do so.. The Issuer shall bear the cost and expense of such exchange.

On or after any Exchange Date, the bearer of a Temporary Global Security or Permanent Global Security may surrender it to or to the order of the Issuing and Paying Agent. In exchange for a Temporary Global Security or Permanent Global Security, the Issuer will deliver, or procure the delivery of, an equal aggregate principal amount of duly executed and authenticated Definitive Securities in an aggregate number equal to the number of Securities represented by the Bearer Security submitted for exchange, security printed substantially in the form set out in the Trust Deed. On exchange in full of the Temporary Global Security or Permanent Global Security, such Temporary Global Security or Permanent Global Security will be cancelled.

The following legend will appear on all Bearer Securities (other than Temporary Global Securities) where TEFRA D is specified in the applicable Final Terms:

"ANY UNITED STATES PERSON WHO HOLDS THIS OBLIGATION WILL BE SUBJECT TO LIMITATIONS UNDER THE UNITED STATES INCOME TAX LAWS, INCLUDING THE LIMITATIONS PROVIDED IN SECTIONS 165(j) AND 1287(a) OF THE INTERNAL REVENUE CODE."

The sections referred to provide that United States holders, with certain exceptions, will not be entitled to deduct any loss on Bearer Securities, receipts or interest coupons and will not be entitled to capital gains treatment in respect of any gain on any sale, disposition, redemption or payment of principal in respect of Bearer Securities.

Securities which are represented by a Bearer Security will only be transferable in accordance with the rules and procedures for the time being of Euroclear, Clearstream, Luxembourg or Clearstream, Frankfurt, as the case may be.

Registered Securities

The Registered Securities of each Class will initially be represented by a global Security in registered form (a “**Global Registered Certificate**”). The Global Registered Certificate in respect of such Registered Securities will be registered in the name of a nominee for, and shall be deposited on its issue date with the Relevant Clearing System or, in case of Euroclear and Clearstream, Luxembourg, with a Common Depositary on behalf of Euroclear or Clearstream, Luxembourg.

Payments of principal and any other amount in respect of the Global Registered Certificate will, in the absence of provision to the contrary, be made to the person shown on the Register (as defined in the Conditions) as the registered holder of the Global Registered Certificate. None of the Issuer, any Paying Agent or the Registrar will have any responsibility or liability for any aspect of the records relating to or payments or deliveries made

on account of beneficial ownership interests in the Global Registered Certificate or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.

Payments of principal, interest or any other amount in respect of the Registered Securities in definitive form will, in the absence of provision to the contrary, be made to the persons shown on the Register on the relevant Record Date (as defined in the Conditions) immediately preceding the due date for payment in the manner provided in the Conditions.

Interests in a Global Registered Certificate will be exchangeable in whole but not in part for Registered Security certificates in definitive form (“**Individual Certificates**”) at the cost and expense of the Issuer only upon the occurrence of an Exchange Event. For these purposes, “**Exchange Event**” means that Euroclear or Clearstream, Luxembourg or Clearstream, Frankfurt or any other relevant clearing system is closed for business for a continuous period of 14 days (other than by reason of holidays, statutory or otherwise) or announces an intention to cease business permanently or does in fact do so.

Registered Securities represented by a Global Registered Certificate shall be exchangeable and transferable only in accordance with, and subject to, the provisions of such Global Registered Certificate and the Agency Agreement, any applicable law and the rules and operating procedures for the time being of Euroclear, Clearstream, Luxembourg or Clearstream, Frankfurt, including the requirement that all Individual Certificates issued in exchange for a Global Registered Certificate shall bear a legend in the same form mutatis mutandis as that set out on the Global Registered Certificate.

Any reference herein to Euroclear and/or Clearstream, Luxembourg and/or Clearstream, Frankfurt shall, whenever the context so permits, be deemed to include a reference to any additional or alternative clearing system specified in the applicable Final Terms.

8. Purpose of Final Terms

In this section 8. the expression “necessary information” means, in relation to any Tranche of Securities of any Class, the information necessary to enable investors to make an informed assessment of the assets and liabilities, financial position, profits and losses and prospects of the Issuer and of the rights attaching to the Securities. In relation to any Securities which may be issued under the Programme, the Issuer has endeavoured to include in this Prospectus and the relevant Issue Specific Option all of the necessary information except for information relating to such Securities which is not known at the date of this Prospectus and the relevant Issue Specific Option and which can only be determined at the time of an individual issue of a Tranche of Securities.

Any information relating to any Securities which is not included in this Prospectus and the relevant Issue Specific Option and which is required in order to complete the necessary information in relation to a Tranche of Securities will be contained in the relevant Final Terms.

In respect of each Tranche of Securities, the related Final Terms must, for the purposes of that Tranche only, be read in conjunction with this Prospectus, the General Terms and Conditions and the relevant Issue Specific Terms and Conditions. The terms and conditions applicable to any particular Tranche of Securities are the Conditions as completed by the related Final Terms.

11. Summary of the Programme Documents

The following are summaries of certain provisions of the principal agreements entered into by the Issuer in relation to the Programme which are qualified in its entirety by reference to the detailed provisions of each such agreement. The following summaries do not purport to be complete, and prospective investors must refer to each programme agreement for detailed information regarding such agreement.

11.1 Trust Deed

The Securities of each Class shall be constituted by the Trust Deed, which shall comprise the principal trust deed dated on or about the Programme Effective Date and made between the Issuer and the Trustee (as amended, supplemented, novated and/or replaced from time to time, the “**Principal Trust Deed**”), as supplemented and amended by a supplemental trust deed relating to that Class and made between the Issuer and the Trustee. The Principal Trust Deed and any supplemental trust deed in respect of each Class of Securities are referred to together as the “**Trust Deed**”. Each Trust Deed will be governed by English law.

The relevant Trust Deed contains the provisions setting out the obligations of the Issuer with respect to the relevant Class of Securities, and will set out the covenants given by the Issuer in relation to such Class, including, without limitation, its covenant to pay, provisions relating to its duty to provide various persons with information, to prepare and display certain information, only to do such things as are contemplated within the applicable Trust Deed (most importantly, in relation to the issue and performance of the Securities) and its duties with respect to its obligations under the Securities. Each Trust Deed will also set out the basis for the remuneration and indemnification of the Trustee in respect of its duties, the conditions for the Trustee’s appointment, retirement and removal and contains provisions which are supplemental to certain statutory provisions and which set out the powers of the Trustee and the extent of its duties.

Any trustee in respect of a Class of Securities may retire upon giving not less than three months’ prior written notice to the Issuer, and the relevant Class of Securityholders may by Extraordinary Resolution remove any trustee or trustees of that Class, *provided that* the retirement or removal of a sole trust corporation will not be effective until a trust corporation is appointed as successor trustee. If a sole trust corporation in respect of a Class of Securities gives notice of retirement or an Extraordinary Resolution is passed for its removal, the Issuer will use all reasonable endeavours to procure that another trust corporation is appointed as trustee for such Class but if it fails to do so before the expiry of such three months’ notice period, the Trustee will have the power to appoint a new trustee.

Pursuant to the Trust Deed in respect of a Class of Securities, the obligations of the Issuer relating to that Class shall be secured in favour of the Trustee, for its benefit and the benefit of the Securityholders of that Class of Securities, by the security over the Secured Property.

14. Tax Considerations

Prospective investors should be aware that the acquisition, holding, transfer or disposal of the Securities, and/or receipt of payments under Securities may result in tax consequences to any investor, which may arise in, but are not limited to, the jurisdiction of the Issuer or the jurisdiction of residence, domicile, citizenship or incorporation of the relevant investor. Prospective investors should consult their own professional advisers concerning such possible tax consequences.

The summaries below are not intended to constitute a complete analysis of all tax consequences relating to the ownership of Securities and the Issuer has only investigated the tax position in the jurisdictions set out below. Prospective security holders should consult their own tax advisers concerning the consequences of their own particular situation.

14.1 Taxation in Jersey

14.1.1 General

The following paragraphs summarise certain aspects of the Jersey taxation treatment of holding Securities. The statements are intended only as a general guide, and should be treated with appropriate caution. They are based on current Jersey law and practice, possibly with retrospective effect. A prospective investor should consult a tax adviser as to the tax consequences relating to its particular circumstances resulting from the purchase, holding, sale and redemption of the Securities and the receipt of payments thereon.

14.1.2 Income tax

The Issuer will be regarded as resident in Jersey under the Income Tax (Jersey) Law 1961 (as amended) (the “**Jersey Income Tax Law**”) and will (except as noted below) be subject to Jersey income tax at a rate of 0 per cent. Securityholders (other than residents of Jersey) should not be subject to any tax in Jersey in respect of the holding, sale, redemption or other disposition of Securities. Redemption payments (other than to residents of Jersey) will not be subject to withholding for or on account of Jersey tax.

14.1.3 Stamp Duty

Under current Jersey law, there are no death or estate duties, capital gains, gift, wealth, inheritance or capital transfer taxes. No stamp duty is levied in Jersey on the issue, transfer, acquisition, ownership, redemption, sale or other disposal of Securities. In the event of the death of an individual sole holder of Securities, duty at rates of up to 0.75 per cent. of the value of the Securities held, subject to a cap of £100,000, may be payable on registration of Jersey probate or letters of administration which may be required in order to transfer or otherwise deal with Securities held by the deceased individual sole holder thereof.

14.1.4 Goods and services tax

The Issuer is an “international services entity” for the purposes of the Goods and Services Tax (Jersey) Law 2007 (the “**GST Law**”). Consequently, the Issuer is not required to: (a) register as a taxable person pursuant to the GST Law; (b) charge goods and services tax in Jersey in respect of any supply made by it; or (c) (subject to limited exceptions that are not expected to apply to the Issuer) pay goods and services tax in Jersey in respect of any supply made to it.

14.1.5 Intergovernmental Agreement between Jersey and the United States

The United States Hiring Incentives to Restore Employment Act resulted in the introduction of legislation in the United States known as the Foreign Account Tax Compliance Act (“**FATCA**”). Under FATCA, a 30 per cent. withholding tax may be imposed on payments of United States source income and certain payments of proceeds from the sale of property that

could give rise to United States source income, unless the Issuer complies with requirements to report on an annual basis the identity of, and certain other information about, direct and indirect United States holders of Securities issued by the Issuer to the United States Internal Revenue Service (“IRS”) or to the relevant Jersey authority for onward transmission to the IRS. A holder of Securities issued by the Issuer that fails to provide the required information to the Issuer may be subject to the 30 per cent. withholding tax with respect to any payments directly or indirectly attributable to United States sources and the Issuer might be required to redeem any Securities held by such holder. On 13 December 2013 an intergovernmental agreement was entered into between Jersey and the US in respect of FATCA which agreement was enacted into Jersey law as of 18 June 2014 by the Taxation (Implementation) (International Tax Compliance) (United States of America) (Jersey) Regulations 2014. Although the Issuer will attempt to satisfy any obligations imposed on it to avoid the imposition of such withholding tax, no assurance can be given that the Issuer will be able to satisfy such obligations. If the Issuer becomes subject to a withholding tax as a result of FATCA, the return on some or all Securities issued by the Issuer may be materially and adversely affected. In certain circumstances, the Issuer may compulsorily redeem some or all of the Securities held by one or more holders and/or may reduce the redemption proceeds payable to any holder of Securities.

14.1.6 Organisation for Economic Co-operation and Development (“OECD”)

Drawing extensively on the intergovernmental approach to implementing the United States Foreign Account Tax Compliance Act, the OECD developed the Common Reporting Standards (“CRS”) to address the issue of offshore tax evasion on a global basis. Aimed at maximising efficiency and reducing cost for financial institutions, the CRS provides a common standard for due diligence, reporting and exchange of financial account information. Pursuant to the CRS, participating jurisdictions obtain from reporting financial institutions, and automatically exchange with exchange partners on an annual basis, financial information with respect to all reportable accounts identified by financial institutions on the basis of common due diligence and reporting procedures.

Jersey has implemented the CRS by the Taxation (Implementation) (International Tax Compliance) (Common Reporting Standard) (Jersey) Regulations 2015. As a result, the Issuer is required to comply with the CRS due diligence and reporting requirements, as adopted by Jersey.

Securityholders may be required to provide additional information to the Issuer to enable the Issuer to satisfy its obligations under the CRS. Failure to provide requested information may subject an investor to liability for any resulting penalties or other charges and/or mandatory redemption of Securities.

14.1.7 Base Erosion and Profit Shifting

The law and any other rules or customary practice relating to tax, or its interpretation in relation to the Issuer, its assets and any investment of the Issuer may change during its life. In particular, both the level and basis of taxation may change. In particular, the outcome of the on-going global Base Erosion and Profit Shifting (BEPS) project could substantially affect the tax treatment of the Issuer. Additionally, the interpretation and application of tax rules and customary practice to the Issuer, its assets and investors by any taxation authority or court may differ from that anticipated by the Issuer. Both could significantly affect returns to Securityholders.

14.2 Taxation in United Kingdom

14.2.1 General

This section summarises certain limited aspects of the UK tax treatment of holding the Securities. They are based on current UK law and HM Revenue & Customs practice, both of

which are subject to change, possibly with retrospective effect. Unless otherwise stated, this summary relates solely to Securityholders (i) who are individuals acting in a private capacity and domiciled and resident in the UK for tax purposes, (ii) which are within the charge to UK corporation tax and holding the Securities as an investment or (iii) which are UK open-ended investment companies or authorised unit trust schemes. The statements in this summary are intended only as a general guide, and they should be treated with appropriate caution. Any person who is contemplating acquiring the Securities (whether or not pursuant to the Programme) is strongly recommended to consult their independent professional adviser immediately.

14.2.2 The Issuer

The Directors intend that the affairs of the Issuer should be managed and conducted so that it should not become resident in the UK for UK tax purposes. Accordingly, and provided that the Issuer does not carry on a trade in the UK through a permanent establishment situated therein for UK corporation tax purposes or through a branch or agency situated in the UK which would bring the Issuer within the charge to UK income tax, the Issuer will not be subject to UK corporation tax or income tax on income and capital gains arising to it. The Directors intend that the affairs of the Issuer are conducted so that no such permanent establishment, branch or agency will arise insofar as this is within their control, but it cannot be guaranteed that the conditions necessary to prevent any such permanent establishment, branch or agency coming into being will at all times be satisfied.

14.2.3 Withholding tax

Any payments made by the Issuer to Securityholders will not be interest, annual payments, or royalties and so the requirement to withhold UK tax from them does not arise. Consequently, no payments made by the Issuer to Securityholders in respect of the Securities should be required to be made under deduction or withholding for or on account of UK tax.

14.2.4 Capital gains tax (for individual Securityholders)

If the Securities are not treated as deeply discounted securities for UK tax purposes (otherwise than by relying on the exemption for “excluded indexed securities”), any gains accruing to a Securityholder upon the sale, redemption or other disposal of the Securities will be taxed as income and not as a capital gain, unless the Issuer achieves certification as a “reporting fund”.

Based on HM Revenue & Customs practice, the Issuer has grounds to believe that the Securities should not be treated as “deeply discounted securities” for UK tax purposes (otherwise than by relying on the exemption for “excluded indexed securities”), however investors should obtain their own tax advice in relation to this.

The Issuer has received certification from HM Revenue & Customs as a “reporting fund” with effect for its first accounting period. While it is expected that certification as a “reporting fund” will be obtained and maintained for all accounting periods, this cannot be guaranteed.

Note that, under the reporting fund rules, the Issuer is required to report to Securityholders all of the net income attributable to the Securities. Depending on the nature of their Underlying Assets, reportable income may arise in respect of the Securities.

A copy of the annual report required to be made to Securityholders under the reporting fund rules will be provided by the Issuer on the following website: <https://www.hanetf.com>.

14.2.5 Income tax (for individual Securityholders)

If the Securities are treated as “deeply discounted securities” for UK tax purposes, any profit arising to an individual Securityholder on transfer or redemption of a Security will be subject to income tax and not to capital gains tax.

Whereas, if the Securities are not treated as deeply discounted securities for UK tax purposes (otherwise than by relying on the exemption for “excluded indexed securities”) and the Issuer maintains its certification as a “reporting fund”, an individual Securityholder will be subject to income tax on only the reportable income arising in respect of the Securities (irrespective of whether that income is distributed to the Securityholder).

14.2.6 Corporation tax

In general, a Securityholder which is subject to UK corporation tax will be treated for tax purposes as realising profits, gains or losses in respect of the Securities on a basis reflecting the treatment in its statutory accounts, in accordance with generally accepted accounting practice. These profits, gains or losses (which will include any profits, gains or losses on a disposal or redemption of the Securities and which may include fluctuations in value relating to foreign exchange gains and losses) will be treated as income profits or losses for the purposes of a Securityholder’s corporation tax computation.

14.2.7 UK open-ended investment companies and authorised unit trust schemes

Although UK open-ended investment companies and authorised unit trust schemes are generally subject to UK corporation tax (currently at the basic income tax rate of 20 per cent.), they are exempt from tax on capital gains. Part 2 of The Authorised Investment Funds (Tax) Regulations 2006 (S.I. No. 2006/964) provides an exemption for capital profits, gains or losses accruing to UK open-ended investment companies and authorised unit trust schemes (other than qualified investor schemes which do not meet the genuine diversity of ownership condition) on creditor loan relationships and derivative contracts. In this respect, capital profits, gains or losses are those which, in accordance with UK generally accepted accounting practice, fall to be dealt with in the statement of total return (under the heading of “net capital gains/losses”) in accordance with the relevant Statement of Recommended Practice. In addition, Part 2B of those Regulations treats all capital profits, gains and losses (determined in accordance with UK generally accepted accounting practice, as described above) arising to a UK open-ended investment company or authorised unit trust, which meets the genuine diversity of ownership condition, from an “investment transaction” (which includes loan relationships and derivative contracts) as a non-trading transaction and thus not taxable as income. These Parts of the Regulations will determine whether any profits, gains or losses arising to a Securityholder which is a UK open-ended investment company or authorised unit trust scheme (other than a qualified investor scheme which does not meet the genuine diversity of ownership condition) in respect of the Securities will be exempt from tax.

14.2.8 Stamp duty and stamp duty reserve tax (SDRT)

Provided that the Register is not kept by or on behalf of the Issuer in the UK, neither stamp duty nor SDRT will be payable on the issue or the subsequent transfer of, or agreement to transfer, the Securities in Uncertificated Form.

In the case of the Securities held in Certificated Form, provided that (i) the Register is not kept by or on behalf of the Issuer in the UK; (ii) any instrument of transfer is not executed in the UK; and (iii) any instrument of transfer does not relate to any property situated or to any matter or thing done or to be done in the UK, neither stamp duty nor SDRT will be payable on the issue or subsequent transfer of the Securities.

No stamp duty or SDRT will be payable on the issue or subsequent transfer of any Securities issued in bearer form, provided that those Securities are not issued in the UK.

The Redemption of the Securities will not give rise to stamp duty or SDRT.

14.2.9 Inheritance tax (for individual Securityholders)

For the purposes of inheritance tax, a Security may form part of the value of the estate of a Securityholder who is an individual domiciled (or treated as domiciled) in the UK, and inheritance tax may (subject to certain exemptions and reliefs) become payable in respect of the value of a Security on a gift of that Security by, or on the death of, such a Securityholder. Such a tax charge may be subject to appropriate provisions in any applicable double taxation treaty.

14.3 Taxation in Switzerland

The following discussion is a summary of certain material Swiss tax considerations relating to (i) Products issued by the Issuer where the holder is a tax resident in Switzerland or has a tax presence in Switzerland or (ii) Products where the issuing and paying agent, Custodian or securities dealer is located in Switzerland. The discussion is based on legislation as of the date of this Prospectus. It does not aim to be a comprehensive description of all the Swiss tax considerations that may be relevant for a decision to invest in Products. The tax treatment for each investor depends on the particular situation. All investors are advised to consult with their professional tax advisers as to the respective Swiss tax consequences of the purchase, ownership, disposition, lapse, exercise or redemption of Products (or options embedded therein) in light of their particular circumstances.

Swiss Withholding Tax

Payments on a Product are currently not subject to Swiss federal withholding tax *provided that* the respective issuer is at all times resident and managed outside Switzerland for Swiss tax purposes.

On November 4, 2015 the Swiss Federal Council announced a mandate to the Swiss Federal Finance Department to institute a group of experts tasked with the preparation of a new proposal for a reform of the Swiss withholding tax system. The new proposal is expected to include in respect of interest payments the replacement of the existing debtor-based regime by a paying agent-based regime for Swiss withholding tax similar to the one published on December 17, 2014 by the Swiss Federal Council and repealed on June 24, 2015 following the negative outcome of the legislative consultation with Swiss official and private bodies. Under such a new paying agent-based regime, if enacted, a paying agent in Switzerland may be required to deduct Swiss withholding tax on any payments or any securing of payments of interest in respect of a Product for the benefit of the beneficial owner of the payment unless certain procedures are complied with to establish that the owner of the Product is not an individual resident in Switzerland. The Swiss Federal Council decided on June 26, 2019, to resume the reform of the withholding tax, which was pending until then. The objectives and guidelines of this reform were adopted at this occasion. The purpose of the reform is to strengthen the Swiss third-party capital market and extend the withholding tax guarantee function at the national level. A draft for consultation should be issued in the fall of 2019.

Income Taxation

Products held as Private Assets by a Swiss resident holder

Structured Notes

If a Product classifies as a structured note, its income taxation depends on whether the bond and the derivative financial instrument(s) embedded therein are recorded separately from each other and whether the Product is classified as a structured note with or without a predominant one-time interest payment (a structured note is classified as a note with a predominant one-time interest payment if the one-time interest payment exceeds the sum of the periodic interest payments):

Non-transparent derivative financial instruments: If the bond is not recorded separately from

the embedded derivative financial instrument(s), the Product is classified as a non-transparent structured note and any return over the initial investment is classified as a taxable interest payment. Non-transparent derivative financial instruments generally include a predominant one-time interest payment and are taxed in accordance with the principles set forth below under “—Transparent derivative financial instruments with a predominant one-time interest payment”.

Transparent derivative financial instruments without a predominant one-time interest payment: If the bond component and the incomes derived therefrom are recorded separately from the embedded derivative financial instrument(s) component and incomes, and the yield-to-maturity predominantly derives from periodic interest payments and not from a one-time-interest-payment (see below “—Transparent derivative financial instruments with a predominant one-time interest payment”), then any such periodic interest payment and the non-predominant one-time interest payment, if any, is taxed when paid to the holder of the Product. A gain, including interest accrued, a loss, respectively, realised on the sale of a Product is a tax-free private capital gain, a non-tax-deductible private capital loss, respectively (see below “Capital Gains Taxation - Products held as Private Assets by a Swiss resident holder”). The same applies if the Product is redeemed except that interest accrued is taxed when paid.

Transparent derivative financial instruments with a predominant one-time interest payment: If the bond is recorded separately from the embedded derivative financial instrument(s) and the yield-to-maturity predominantly derives from a one-time-interest-payment such as an original issue discount or a repayment premium and not from periodic interest payments, then any periodic interest payments and, on the sale or redemption of the Product, the difference between the value of the bond at redemption or sale, as applicable, and its value at issuance or secondary market purchase, as applicable, converted, in each case, into Swiss Francs at the exchange rate prevailing at the time of redemption or sale, issuance or purchase, respectively (modified differential taxation method) constitutes taxable income. A value decrease on the bond respectively realised on the sale or redemption of the Product may be offset against any gains (including periodic interest payments) realised within the same taxation period from all instruments with a predominant one-time interest payment. Any residual return realised on the embedded derivative financial instrument(s) is a tax-free private capital gain, and any residual loss is a non-tax-deductible private capital loss, respectively (see below “Capital Gains Taxation - Products held as Private Assets by a Swiss resident holder”).

Bonds

Bonds without a predominant one-time interest payment: If a Product is classified as a pure bond without a predominant one-time interest payment (the yield-to-maturity predominantly derives from periodic interest payments and not from a one-time-interest-payment), Swiss resident private investors will be taxed on the periodic and any one-time interest payments, if any, converted into Swiss Francs at the exchange rate prevailing at the time of payment. A gain, including interest accrued, a loss, respectively, realised on the sale of a Product is a tax-free private capital gain, a non-tax-deductible private capital loss, respectively (see below “Capital Gains Taxation - Products held as Private Assets by a Swiss resident holder”).

Bonds with a predominant one-time interest payment: If a Product is classified as a pure bond with a predominant one-time interest payment (the yield-to-maturity predominantly derives from a one-time-interest-payment such as an original issue discount or a repayment premium and not from periodic interest payments), Swiss resident private investors will be taxed on any periodic interest payments and on any gains, including capital and foreign exchange gains, realised on the Products (differential taxation method).

Pure Derivative Financial Products

Periodic and one-time dividend equalisation payments realised on a Product which is classified as a pure derivative financial instrument (such as pure call and put options, including low

exercise price options with a maturity not exceeding one year, pure futures, static certificates replicating an index or a basket of at least five shares and with a fixed maturity or an annual redemption right) and which is held as part of a holder's private assets constitute taxable investment income. Any other return will be classified as a tax-exempt capital gain or a non-tax deductible capital loss (see below "Capital Gains Taxation - Products held as Private Assets by a Swiss resident holder").

Low Exercise Price Options

Low exercise price options are call options on shares with a low exercise price. According to the current practice of the Swiss Federal Tax Administration, LEPOs exist if the underlying value has been pre-financed by at least 50% at the time of issuance.

For low exercise price options with a maturity exceeding one year, the interest component of the low exercise price option (i.e. issue discount) constitutes a taxable investment income. Any other return will be classified as a tax-exempt capital gain or a non-tax deductible capital loss (see below "Capital Gains Taxation - Products held as Private Assets by a Swiss resident holder").

Fund-like Products

A Product classified as a fund-like instrument will be considered a pass-through instrument for Swiss tax purposes if dividend and interest income (less attributable costs) from, and capital gains and losses (less costs attributable) realised on, the underlying investments, are reported and distributed separately. Under such conditions, an individual holding a fund-like Product as part of private assets only receives taxable income (which he or she must report annually) over such portion of the distributions (in case the fund is distributing the income realised on the underlying investments) or earnings credits (in case the fund is reinvesting the income realised on the underlying investment) as derive from dividends and interest (less attributable costs) on the underlying instruments. Any distributions or credits deriving from capital gains realised on the underlying investments constitute a tax-free private capital gain and any respective loss on the underlying investments is a non-tax-deductible private capital loss. Any gain realised within a taxation period on the sale of a fund-like instrument (including accrued dividends and interests) is exempt from income taxation as a private capital gain, and, conversely, any loss realised a non-tax-deductible capital loss (see below "Capital Gains Taxation - Products held as Private Assets by a Swiss resident holder").

Products held as Assets of a Swiss Business

Corporate entities and individuals who hold Products as part of a trade or business in Switzerland, in the case of residents abroad carried on through a permanent establishment or a fixed place of business in Switzerland, are required to recognise any payments on, and any capital gains or losses realised on the sale or redemption of, such Products (irrespective of their classification) in their income statement for the respective taxation period and will be taxed on any net taxable earnings for such period.

The same taxation treatment also applies to Swiss-resident individuals who, for income tax purposes, qualify as "professional securities dealers" for reasons of, *inter alia*, frequent dealing and leveraged investments in securities.

Capital Gains Taxation

Products held as Private Assets by a Swiss resident Holder

A gain, a loss, respectively, realised by an individual resident in Switzerland for tax purposes upon the sale or other disposal of a Product held as part of his or her private assets is a tax-free private capital gain, a non-tax deductible capital loss, respectively, unless such individual is classified, for income tax purposes, as a "professional securities dealer" for reasons of, *inter alia*, frequent dealing and leveraged investments in securities. If an individual is classified as a

accordance with the principles set forth above under “Products held as Assets of a Swiss Business”. In relation to the bifurcation of a tax-exempt capital gains component, non-tax deductible capital loss component, respectively, from taxable income components of a Product, see the bifurcation principles set forth above with regard to the different instruments under “Income Taxation, Products held as Private Assets by a Swiss resident holder”). “professional securities dealer” he or she will be taxed in

Products held as Assets of a Swiss Business

Capital gains realised on Products held as Assets of a Swiss Business are taxed in accordance with the taxation principles set forth above under “Income Taxation, Products held as Swiss Business Assets”).

Stamp Taxes

Swiss Federal Issue Stamp Tax

The Products are not subject to Swiss federal stamp tax on the issuance of securities.

Swiss Federal Securities Turnover Tax

Dealings in Products which are classified as pure derivative financial instruments (such as pure call and put options, including low exercise price options with a maturity not exceeding twelve months, pure futures with a maximal pre-financing of 25%, static certificates replicating an index or a basket of at least five shares and with a fixed maturity on an annual redemption right) are not subject to the Swiss federal securities turnover tax.

Dealings in Products which have been issued by an issuer outside of Switzerland and which are classified as structured notes, share-like instruments (including low exercise price warrants on shares with a maturity exceeding twelve months) or fund-like instruments are subject to Swiss federal securities turnover tax of 0.3% on the consideration paid, however, only if a Swiss securities dealer (as defined in the Swiss federal stamp tax act) is a party or intermediary to the transaction and no exemption applies.

Dealings in bonds and structured notes with a maturity not exceeding one year are exempt from Swiss federal turnover tax.

The delivery of an underlying taxable security at exercise or redemption to the holder of the Product is subject to Swiss federal securities turnover tax of 0.3% if a Swiss domestic securities dealer (as defined in the Swiss federal stamp tax act) is a party or intermediary to the transaction and no exemption applies.

Gift, Inheritance and Estate Taxes

Subject to an applicable tax treaty in an international scenario, transfers of Products may be subject to cantonal and/or communal inheritance tax, estate tax or gift tax if the deceased person has had his or her last domicile in Switzerland, if the donor is resident in Switzerland, respectively, or in the case of a foreign deceased or resident person the transfer involves an unincorporated business in Switzerland and Products are held as part of such business. No such taxes exist at the federal level. Rates depend upon the existing relationship (i.e. the relationship between the deceased and the heirs, or between the donor and the donee) and the size of the inheritance or gift. Interspousal gifts and gifts to descendants and inheritances collected by the surviving spouse and descendants are frequently exempt or taxed at very low rates (up to 7%). Gifts and inheritances received from unrelated persons attract rates ranging from 20% to 40%. The taxable base is usually the market value of the property transferred.

Net Worth and Capital Taxes

A holder of Products who is an individual resident in Switzerland for tax purposes or is a non-Swiss resident holding Products as part of a Swiss business operation or a Swiss permanent

establishment is required to report Products as part of private wealth or as part of Swiss business assets, as the case may be, and is subject to annual cantonal and/or communal private wealth tax on any net taxable wealth (including the Products), in the case of non-Swiss resident individual holding Products as part of a Swiss business operation or a Swiss permanent establishment to the extent the aggregate taxable wealth is allocable to Switzerland. Incorporated holders of Products are subject to cantonal and communal capital tax on net taxable equity, in the case of non-Swiss resident person holding Products as part of a Swiss permanent establishment, to the extent the aggregate taxable equity is allocable to Switzerland. No net worth and capital taxes exist at the federal level.

Non-Swiss resident holders

A holder of a Product who is not resident in Switzerland for tax purposes and who during the taxation year has not engaged in trade or business carried on through a business operation or permanent establishment in Switzerland, will neither be subject to income tax and capital gains tax nor net wealth or capital tax in Switzerland.

Automatic Exchange of Information in Tax Matters

On November 19, 2014, Switzerland signed the Multilateral Competent Authority Agreement (the “MCAA”). The MCAA is based on article 6 of the OECD/Council of Europe administrative assistance convention and is intended to ensure the uniform implementation of Automatic Exchange of Information (the “AE01”). The Federal Act on the International Automatic Exchange of Information in Tax Matters (the “AE01 Act”) entered into force on January 1, 2017. The AE01 Act is the legal basis for the implementation of the AE01 standard in Switzerland.

The AE01 is being introduced in Switzerland through bilateral agreements or multilateral agreements. The agreements have, and will be, concluded on the basis of guaranteed reciprocity, compliance with the principle of speciality (i.e. the information exchanged may only be used to assess and levy taxes (and for criminal tax proceedings)) and adequate data protection.

Switzerland has concluded a multilateral AE01 agreement with the EU (replacing the EU savings tax agreement) and has concluded bilateral AE01 agreements with several non-EU countries.

Based on such multilateral agreements and bilateral agreements and the implementing laws of Switzerland, Switzerland began to collect data in respect of financial assets, including, as the case may be, Warrants, held in, and income derived thereon and credited to, accounts or deposits with a paying agent in Switzerland for the benefit of individuals resident in a EU member state or in a treaty state.

Swiss Facilitation of the Implementation of the U.S. Foreign Account Tax Compliance Act

Switzerland has concluded an intergovernmental agreement with the U.S. to facilitate the implementation of FATCA. The agreement ensures that the accounts held by U.S. persons with Swiss financial institutions are disclosed to the U.S. tax authorities either with the consent of the account holder or by means of group requests within the scope of administrative assistance. Information will not be transferred automatically in the absence of consent, and instead will be exchanged only within the scope of administrative assistance on the basis of the double taxation agreement between the U.S. and Switzerland.

14.4 Taxation in Germany

The following is a brief summary of some important principles of German tax law that may be of relevance for Securityholders acquiring, redeeming, holding or selling Securities. The summary does not fully cover all aspects of German tax law that may be of relevance to Securities. The summary is based on German tax law as of the date of this Prospectus. It should

also be noted that the taxation of Securityholders may change at any time as a result of new legislation, court practice or decrees issued by the relevant tax authorities, potentially with retroactive effect.

German Securityholders interested in acquiring the Securities should consult their tax advisors with regard to any tax consequences that may be involved in acquiring, redeeming, holding, selling or otherwise transferring the Securities. Only a tax advisor is able to adequately assess the individual tax situation of a specific investor.

Tax residents

Natural and legal persons who are resident, have their habitual abode, have their statutory seat or principal place of management in Germany are subject to resident taxation in Germany (*unbeschränkte Steuerpflicht*).

Securities with cryptocurrencies, commodities and other non-capital assets (e.g. currencies) as underlying assets

No current income

There will be no current income in the form of interest or similar payments under the Securities.

Taxation of capital gains derived from the disposition of Securities or from the redemption of Securities held as personal assets

Private individuals who are tax-resident in Germany and who hold the Securities as personal assets (*Privatvermögen*) are subject to German personal income tax (*Einkommensteuer*) with regard to income derived from the Securities as follows:

There is currently no case law or administrative guidance on the tax treatment of capital gains on the disposition or redemption of Securities so that the tax consequences are unclear. However, the German Federal Fiscal Court (*Bundesfinanzhof*, “BFH”) rendered a number of decisions on the tax treatment of certificates representing the right to acquire a certain amount of gold. Basically the court stipulated that in case of these instruments the holder should be treated as if he had acquired the gold directly and that he should not be taxed on capital investment income (*Einkünfte aus Kapitalvermögen*) but rather on private capital gains which are generally tax-exempt if the asset is held more than 12 months. There are some arguments to analogously apply the case law on gold certificates to Securities. The relevant provision sec. 23 para. 1 sent. 1 no. 2 sent. 1 EStG which is applicable to gold certificates according to the court’s case law does not differentiate between tangible and intangible assets so that it should not be harmful that asset entitlement is – in contrast to gold – an intangible or digital asset. Furthermore, private individuals can opt for delivery as payment in kind which typically should not fall under definition of income from capital investment.

On 12 May 2015 the BFH rendered decisions (VIII R 35/14, Federal Tax Gazette (*Bundessteuerblatt*) II 2015, p. 834; VIII R 4/15, Federal Tax Gazette II 2015, p. 835; VIII R 19/14, BFH/NV 2015, p. 1559) stating that the disposition or redemption of gold securities is not subject to the German flat tax regime for investment income (*Abgeltungsteuer*). These decisions of the 8. Chamber (*Senat*) of the BFH were confirmed by a subsequent decision of the 9. Chamber on 6 February 2018 (IX R 33/17, BFH / NV 2018, p. 574). Furthermore, on 16 June 2020 the same Chamber of the BFH ruled that its former decisions shall continue to be applicable even if the private individuals were entitled to demand payment of the proceeds from the sale of the gold instead of delivery in order to fulfil the delivery claim (VIII R 7/17).

The BFH has expressly stipulated that this qualification is not jeopardised if in particular situations – e.g. in case of regulatory restrictions for the acquisition of gold – only a claim for repayment of money is available.

The BFH also mentions that it is not relevant whether or not the gold securities are traded on a

regulated stock exchange or whether they are privately traded.

The tax administration has endorsed this position in the general decree on the application of the flat tax on investment income (decree of the Federal Ministry of Finance (*Bundesfinanzministerium*, “**BMF**”) of 18 January 2016, IV C 1 – S 2252/08/100004:017), Federal Tax Gazette I 2016, p. 85 ss, as amended by decree of 10 May 2019, IV C 1 – S 2252/08/100004:21, Federal Tax Gazette I 2019. p. 464, the “**Decree**”). According to the Decree the gold entitlement would only qualify as a regular claim for repayment of a certain amount of money (*Kapitalforderung*), which would be subject to the flat tax on investment income, provided that these claims are not covered by gold or if the terms and conditions of such gold (or other raw material) securities provide that the Issuer can either settle the claim by delivery of gold or by payment of a certain amount of money. The German tax administration has also confirmed that it will apply the case law on physical gold certificates to certificates representing an entitlement to a certain amount of virtual currencies or other token provided that the holder has a claim for delivery of the underlying assets, BMF of 10 May 2022, IV C 1-S 2256 / 19 / 10003, Federal Tax Gazette I 2022, P. 668, marginal number 85 ss. In marginal number 86, the BMF states that payments made on such certificates constitute other income within the meaning of sec. 22 no. 3 German Income Tax Act (*Einkommensteuergesetz*, *EStG*). The BMF letter has been published in the Federal Tax Gazette Part I. Pursuant to sec. 44 para. 1 sent. 3 EStG, this published legal opinion of the tax authorities is binding for the German custody banks with regard to the German withholding tax. With respect to securities secured by cryptocurrency or other assets it should, however, be noted that the German tax authorities or courts could regard such securities as a capital claim if the cash settlement, instead of the delivery of the virtual currency etc., should become the regular repayment method.

On the basis of the above described arguments we expect Securities to be treated the same as gold securities.

Income

If the above-mentioned case law of the BFH on gold securities can be applied accordingly on Securities their sale in general qualifies as a taxable event for the investor in case such sale of the Securities occurs within 12 months after their purchase, sec. 23 para. 1 sent. 1 no. 2 sent. 1 EStG (so-called *privates Veräußerungsgeschäft*). If a Securityholder has purchased more than one Security at different dates, the Security first purchased will be deemed to be first sold. A sale after the end of the 12-month holding period will not be a taxable transaction and profits therefore will be tax-free, but losses are not tax-deductible against other sources of income.

According to the case law of the BFH, the delivery of gold in case of redemption of the gold securities does not qualify as a taxable disposition of the gold securities (dec. of 6 February 2018, IX R 33/17, BFH/NV 2018, p. 578). The BFH takes the view that a disposition within the meaning of sec. 23 EStG requires the transfer of an asset for consideration. In case of the redemption, according to the view of the BFH, there is no such transfer for consideration because the investor only receives gold already attributed to him under the terms and conditions of the gold securities. Commercially, the Securityholder is in the same position as before the redemption. A taxation of any appreciation of the gold would thus not be justified. If this case law of the BFH is applied accordingly to Securities, the delivery of cryptocurrencies etc. should not qualify as a taxable disposition of the Securities since the Securityholder is still in the same position as before the redemption. It is important to note that the German tax administration has not yet endorsed this particular decision and that it is arguable whether it will follow the BFH in this respect. Hence, there is a risk that the tax administration might treat the redemption as a taxable event if it occurs within the 12-month holding period after the acquisition of the Securities. It is also not entirely clear whether a rebalancing with respect to an index of cryptocurrencies etc., if any, could represent a disposal. Although there are good arguments that this should not be the case (as there is no change of or realisation of the cryptocurrencies delivery claim, see ruling of the BFH dated 24 January 2012 (IX R 62/10, Federal Tax Gazette

II 2012, 564), marginal number 28), there is a risk that the German tax authorities could take a different view.

Should the sale of the Securities qualify as a taxable event because it occurs within the 12-month holding period, the taxable income (profit or loss) corresponds to the difference between the sales proceeds and acquisition cost. Should the tax administration not follow the BFH decision of 6 February 2018, then in the case of a redemption during the holding period the taxable income would be determined as the difference between the cash value of the cryptocurrency etc. at the time of redemption and the acquisition cost.

A profit arising during the holding period will not be taxed if – after offsetting with profits or losses from other transactions falling under sec. 23 EStG – it does not exceed EUR 600. Losses from transactions falling under sec. 23 EStG can only be offset against profits resulting from other transactions falling under this provision in the same calendar year. Under certain conditions a carry back of losses exceeding that threshold to previous years can be achieved.

Sale of cryptocurrencies etc. after delivery

In case of delivery of cryptocurrencies etc. the profit derived from a subsequent sale of cryptocurrencies etc. is generally subject to personal income tax at ordinary rates (up to 45% plus solidarity surcharge of 5.5% thereon and church tax if applicable) provided the cryptocurrency etc. is sold within twelve months after the purchase of the Securities. Taking into account the case law of the BFH (in particular dec. of 6 February 2018), the cryptocurrencies may be considered to be acquired at the time the Securityholder acquired the Securities rather than on the subsequent date of the actual delivery of the cryptocurrencies etc. However, it needs to be noted that there is currently no published guidance of the tax administration or case law on this particular point. The decision of 6 February 2018 does not make an explicit statement about this specific issue. The sale of cryptocurrencies etc. on a date after the twelve months holding period expired is not a taxable transaction.

A profit arising during the holding period will not be taxed if – after offsetting with profits or losses from other transactions falling under sec. 23 EStG – it does not exceed EUR 600. Losses from transactions falling under sec. 23 EStG can only be offset against profits resulting from other transactions falling under this provision in the same calendar year. Under certain conditions a carry back of excess losses that threshold to previous years can be achieved.

Withholding tax

Proceeds resulting from transactions falling under sec. 23 EStG are not subject to withholding tax.

Tax assessment

Taxable profits resulting from transactions falling under sec. 23 EStG need to be reported by the investor in his personal tax return. The applicable tax rate is determined according to the progressive income tax schedule which reaches 45% in the highest bracket (plus 5.5% solidarity surcharge thereon and, if applicable, church tax).

Risk of non-applicability of case law of BFH

Should the case law of the BFH on gold securities not be applicable on Securities the capital gains from the sale and redemption of Securities would be expected to be taxed as investment income (sec. 20 para. 2 no. 7 EStG) at a 25% flat tax plus 5.5% solidarity surcharge thereon and, if applicable to the individual investor, church tax at a rate of 8% or 9% (for further details with respect to the taxation of investment income see below “*Securities with equity and ETP (capital assets) as underlying assets*”).

Taxation of capital gains derived from the sale of Securities or from the redemption of Securities held as business assets

In case of tax-resident Securityholders (private individuals and legal persons) which hold the Securities as business assets (*Betriebsvermögen*) any capital gain will be subject to personal income tax (up to 45% plus solidarity surcharge of 5.5% thereon and, church tax if applicable) or corporate income tax at a rate of 15% (plus solidarity surcharge of 5.5% thereon) irrespective of any holding period. In addition, trade tax (*Gewerbesteuer*) might be levied. The trade tax rate depends on a local multiplier which is assessed by the competent municipality.

The same applies in case of delivery of cryptocurrencies etc. upon redemption of the Securities.

Securities with equity and ETP (capital assets) as underlying assets

There are some arguments that the above described taxation principles for cryptocurrency etc. backed assets (see above “*Securities with cryptocurrencies, commodities and other non-capital assets (e.g. currencies) as underlying assets*”) should also apply to capital assets, in particular as Securityholders can opt for a delivery as a payment in kind claim which, in turn, should typically not fall under definition of income from capital investment. However, the German tax authorities may claim that the Securityholders should be treated as if they had acquired the capital asset directly and that they are the beneficial owners of the underlying capital assets (as the Securityholders economically bear the risk and chances arising from the Securities) which are capital assets/investments.

In this case, the capital gains from the sale and redemption of Securities held by a private investor would be expected to be taxed as investment income (sec. 20 para. 2 no. 7 EStG) at a 25% flat tax plus 5.5% solidarity surcharge thereon and, if applicable to the individual investor, church tax at a rate of 8% or 9%. Further particularities have to be considered, if an investment fund backed ETP should be qualified as a fund investment and in case of a delivery of capital assets other than shares.

The flat tax is generally collected by way of withholding and the tax withheld shall generally satisfy the individual investor’s tax liability with respect to the Securities. If, however, no or insufficient tax was withheld, the investor will have to include the income received with respect to the Securities in its annual income tax return. The flat tax will then be collected by way of tax assessment. The investor may also opt for inclusion of investment income in its income tax return if the aggregated amount of tax withheld on investment income during the year exceeded the investor’s aggregated flat tax liability on investment income (e.g. because of available losses carried forward or foreign tax credits). If the investor’s individual progressive income tax rate, which is applicable on all taxable income including the investment income, is lower than 25%, the investor may opt to be taxed at individual progressive rates with respect to its investment income.

Capital losses from the sale or redemption of the Securities held as private assets should generally be tax-recognised irrespective of the holding period of the Securities. However, if the losses result from the full or partial non recoverability of the repayment claim, such losses together with other losses of such kind of the same year and loss carry forwards of previous years can only be offset up to an amount of EUR 20,000. Any exceeding loss amount can be carried forward and offset against future capital investment income, but again subject to the EUR 20,000 limitation. This loss deduction will not be applied by the respective domestic paying agent, but has to be declared in the investor’s income tax return. Further, any tax-recognised capital losses may not be used to offset other income like employment or business income but may only be offset against investment income. Capital losses not utilised in one annual assessment period may be carried forward into subsequent assessment periods but may not be carried back into preceding assessment periods.

Individual investors are entitled to a saver's lump sum tax allowance for investment income of up to EUR 1,000 per year (EUR 2,000 jointly assessed investors). The saver's lump sum tax allowance is also taken into account for purposes of withholding tax if the investor has filed a withholding tax exemption request (*Freistellungsauftrag*) with the respective domestic paying agent. The deduction of related expenses for tax purposes is not permitted.

Corporate and business investors (subject to certain formal requirements as the case may be) should in general not be subject to the withholding tax on gains from the disposition or redemption of the Securities. However, any capital gain in the hands of such investors will be subject to personal income tax (up to 45% plus solidarity surcharge of 5.5% thereon and, church tax if applicable) or corporate income tax at a rate of 15% (plus solidarity surcharge of 5.5% thereon). In addition, trade tax (*Gewerbesteuer*) might be levied.

Non-resident Taxation

Profits derived by a non-resident Securityholder from the disposition of the Securities, from the redemption of the Securities or from the disposition of non-capital assets will not be taxed in Germany unless (i) the Securities or non-capital assets belong to the assets of a permanent establishment (including a permanent representative) or another fixed place of business maintained by the non-resident Securityholder in Germany or (ii) the income can be attributed to other German-sourced income (e.g. rent income derived from domestic property). Particularities could apply with respect to the disposition of certain underlying assets (e.g. equity).

Should a non-resident Securityholder be subject to German taxation, the same principles applicable to tax-resident Securityholders would apply.

Gift or inheritance tax

A transfer of the Securities by way of gift or on death will be subject to German inheritance or gift tax if the Securityholder, or its heir, donee or other beneficiary, is a German resident for German gift or inheritance tax purposes according to the specific rules of the German Gift and Inheritance Tax Act (*Erbschaftsteuergesetz*). This may in particular be the case if the Securityholder, heir, donee or other beneficiary is:

- (a) an individual having at the time of the donation or death his or her residence or habitual abode in Germany or if the individual is a German citizen who has not been living abroad for more than five years without having a residence in Germany; or
- (b) a corporation having its seat or central place of management in Germany; or
- (c) the Securities constitute business assets attributable to a permanent establishment or a permanent representative in Germany.

Other taxes

No stamp, issue, registration or similar direct or indirect taxes or duties will be payable in Germany in connection with the issue, delivery or execution of the Securities or any interest therein. Under certain circumstances, however, entrepreneurs may opt for value added tax with regard to the sale of the Securities to other entrepreneurs. With respect to VAT, further particularities could apply with respect to the sale or redemption of certain underlying assets (e.g. commodities). No net asset tax is currently levied in Germany.

OECD Common Reporting Standard

Drawing extensively on the intergovernmental approach to implementing the United States Foreign Account Tax Compliance Act, the OECD developed the Common Reporting Standard ("CRS") to address the issue of offshore tax evasion on a global basis. Aimed at maximising efficiency and reducing cost for financial institutions, the CRS provides a common standard for

due diligence, reporting and exchange of financial account information. Pursuant to the CRS, participating jurisdictions will obtain from reporting financial institutions and automatically exchange with exchange partners on an annual basis financial information with respect to all reportable accounts identified by financial institutions on the basis of common due diligence and reporting procedures. The first information exchanges are expected to begin in 2017.

Germany has enacted a law implementing the CRS, which has entered into force on 1 January 2016 and provides for the exchange of information in relation to the calendar year 2016 and later.

In the event that Securityholders hold the Securities through a German financial institution (as meant in the German implementation of the CRS), Securityholders may be required to provide additional information to such financial institution to enable it to satisfy its obligations under the German implementation of the CRS.

14.5 Taxation in Italy

General

The information set out below is a summary of certain limited aspects of the Italian tax consequences of the acquisition, ownership and disposition of the Securities and it does not purport to be a comprehensive description of all the tax issues that may be relevant to a decision to purchase the Securities. This summary does not describe any tax consequences arising under the laws of any state, locality or taxing jurisdiction other than Italy. This summary is based on the tax laws of Italy as in effect on the date of this Prospectus, as well as current regulations, Italian Tax Authority (“Agenzia delle Entrate”) positions, rulings and decisions of other authorities available on or before such date and now in effect.

All of the foregoing is subject to change, which change could apply retroactively and could affect the continued validity of this summary. Because it is a general summary, holders of the Securities should consult their own tax advisers as to the Italian or other tax consequences of the purchase, holding and disposition of the Securities including, in particular, the application to their specific situations of the tax aspects discussed below, as well as the application of state, local, EU, foreign or other tax laws.

This summary assumes that (i) the Issuer is not a tax resident nor deemed to be a tax resident of Italy according to Article 73, paragraph 3 of Presidential Decree No. 917 of 22 December 1986 (Testo Unico delle Imposte sui Redditi, also known as “**TUIR**”) and that (ii) the Issuer does not have (and will not have at any time) a permanent establishment in Italy as defined under Article 162 of TUIR.

With Ruling No. 72/E of 12 July 2010 the Agenzia delle Entrate has established that Exchange Traded Commodities (ETC) should be treated as **derivative financial instruments** for Italian tax purposes, because they are characterised by the following aspects: (i) value is dependent on an underlying asset, group of assets, or benchmark; (ii) price derives from fluctuations in the underlying asset; and (iii) settlement could be carried out through the delivery of the underlying asset, rather than in cash.

Tax on income and capital gains deriving from “derivative financial instruments”

For the purposes of Italian tax law and based on current tax authorities’ approach, The Securities are subject to the tax regime of derivative financial instruments (or bundles of derivative financial instruments) as defined by art. 67, par. 1, lett. c-quater of TUIR.

Italian tax regime applicable to derivative financial instruments received by a Securityholder is determined according to the following criteria: (i) net cash proceeds received from a redemption or sale of the Securities, (ii) the sum paid at the time of subscription or purchase and (iii) the legal nature of the Securityholder.

If the Securityholder is (a) an Italian resident corporations or similar commercial entity, or (b) an Italian individuals engaged in entrepreneurial activities to which the Securities are effectively connected, (c) a permanent establishments in Italy non-Italian resident to which the Securities are effectively connected (as well as unrealised gains reported in the statutory financial statement), proceeds from the sale or redemption of the Securities received shall be included in the relevant holder's taxable income, which is subject to corporate income tax ("Imposta sul reddito delle società – IRES", currently applicable at an ordinary rate of 24 per cent., increased by 3.5 per cent for insurance companies, banks and some financial intermediaries, including, without limitation, parent companies of banking groups, fund management companies and investment firms, while the above-specified ordinary rate is reduced to 12 per cent for companies that start activities in the "Special Economic Zones – ZES" of Italy, as determined by the Italian government) for cases (a) and (c) or to personal income taxation (as business income), for case (b), according to the ordinary rules.

In addition, in certain cases, depending on the status and the type of activity of the holder (e.g. securities trading activity), proceeds from the sale or redemption of the Securities may also be relevant for the purpose regional income tax on productive activities ("Imposta regionale sulle attività produttive – IRAP");

If the Securityholder is (a) Italian resident individuals not engaged in entrepreneurial activities to which the Securities are effectively connected or (b) a non-commercial entities according to Article 5 of Legislative Decree no. 461 of 21 November 1997, as defined under the combined provisions of Articles 67 of TUIR and Article 3 of Law Decree no. 66 of 2014, gains realised upon the sale for consideration or redemption of the Securities are considered as "other income" (redditi diversi) and are generally subject to a substitute tax (imposta sostitutiva) currently at the rate of 26 per cent.

Italian tax law provides for the application of a substitute tax of 26% (as final taxation) on gains of a financial nature through three alternative regimes:

- (a) The so-called "Regime della dichiarazione", as required by Article 5 of Legislative Decree no. 461 of 21 November 1997, the standard regime for taxation of capital gains realised by Italian resident individuals not engaged in an entrepreneurial activity.

Imposta sostitutiva on capital gains is applied, on a cumulative basis, on all capital gains realised in a fiscal year, net of any incurred capital loss. In regard with the sum of capital gain or loss, it is evident that all disposals of the Securities and other financial instruments triggering have to be subject to the same tax regime.

In addition, these individuals and non-commercial entities must report the overall capital gains realised, net of any relevant incurred capital loss, in the annual Italian tax return and file it to the Italian tax authorities. Capital losses in excess of capital gains may be carried forward against capital gains realised in any of the four succeeding tax years;

- (b) The so-called "Regime del Risparmio Amministrato", according to Article 6 of Legislative Decree no. 461 of 21 November 1997, is carried out through the provision of non-discretionary administration/Backing Issuer services to the relevant taxpayer and allows to pay the imposta sostitutiva separately on the capital gains realised upon each sale or redemption of the Securities under this regime.

Such a separate taxation of each capital gain is allowed only if: (a) the Securities being deposited with an Italian bank, or an investment firm as a Società di Intermediazione Mobiliare (SIM) or with one of certain other authorised financial intermediaries, (b) each relevant capital gain being realised through such intermediary, and (c) an express election for the Risparmio Amministrato regime being timely made in writing by the relevant Securityholder. The financial intermediary, on the basis of the information

provided by the taxpayer, accounts for imposta sostitutiva in respect of capital gains realised on each sale or redemption of the Securities (as well as in respect of capital gains realised at revocation of its mandate and upon other specific circumstances which are deemed to trigger an assignment under this regime), net of any incurred capital loss, and is required to pay the relevant amount of tax to the Italian fiscal authorities on behalf of the taxpayer, deducting a corresponding amount from proceeds to be credited to the Securities holder.

Under the Regime del Risparmio Amministrato, where a sale or redemption of the Securities results in a capital loss, such loss may be used to reduce the subsequent capital gains realised in the same tax year and up to the following fourth.

All gains that have been subject to the Regime del Risparmio Amministrato do not have to be included in the yearly income tax return of the holder of the Securities;

- (c) The so-called “Regime del Risparmio Gestito”, according to Article 7 of Legislative Decree no. 461 of 21 November 1997, is performed through the management of an authorised Italian financial intermediary, providing discretionary portfolio management services, who directly applies the imposta sostitutiva.

The tax base is represented by the computation of the annual increase in value of the managed assets accrued, which include the increase or decrease in the fair market value of the Securities, as well as the gains or losses realised upon the sale for consideration or redemption of the same securities, even if not realised, at year end.

Under the Regime del Risparmio Gestito, any depreciation of the managed assets accrued at year end may be carried forward and deducted against future increase in value of the managed assets in the four succeeding years. All gains that have been subject to the Regime del Risparmio Gestito do not have to be included in the yearly income tax return of the holder of Securities.

Capital gains in respect of the Securities realised upon sale, transfer or redemption by Italian resident individuals not engaged in entrepreneurial activities to which the Securities are effectively connected could also be exempted from taxation, including the 26 per cent imposta sostitutiva, if the Securities are included in a long-term individual savings account (“Piano Individuale di Risparmio a lungo termine – PIR” or also “Alternative PIR”) that, combining the Securities with PIR eligible financial instruments, comply with (i) Article 1 (paragraphs 100 – 114) of Law no. 232 of 2016, as last amended by the Law Decree no 124 of 2020, converted into Law no. 157 of 2020, and/or with (ii) the Law Decree no 34 of 2020, converted into Law no. 77 of 2020. For the avoidance of doubts, the Securities are not, per se, PIR eligible financial instruments, but may be entitled to the tax exemption only if the Securities are included in a bucket of non-PIR eligible financial instruments that doesn’t exceed 30% of the total assets within the PIR and do not exceed the threshold for individual securities in a PIR;

If the Securityholder is an Italian resident collective investment schemes (e.g. UCITS), the increase or decrease in the fair market value of the Securities, as well as the gains or losses realised upon the sale for consideration or redemption of the same securities, other than real estate investment funds, and hedge funds are not subject to taxation at the fund’s level;

If the Securityholder is an Italian pension funds (subject to the regime provided for by Articles 14, 14-ter and 14-quater, paragraph 1, of Legislative Decree 21 April 1993, no. 124 as further substituted by Legislative Decree no. 252 of 5 December 2005), the increase or decrease in the fair market value of the Securities, as well as the gains or losses realised upon the sale for consideration or redemption of the same securities are included in the determination of the yearly NAV accrued appreciation or depreciation of the assets under management that is subject to a substitute tax (imposta sostitutiva) currently at a rate of 20 per cent, reduced to 12.50 per cent for the portion of the appreciation of the assets under management attributable to bonds

issued by Italy or "white list" countries;

If the Securityholder is a Non-Italian resident without a permanent establishment in Italy to which the Securities are effectively connected, it is not subject to income tax in Italy on the proceeds realised on the sale of the Securities, provided that:

- (a) the Securities have not been deposited in Italy; or
- (b) the Securities have been deposited in Italy and are traded on a regulated market; or
- (c) the Securities have been deposited in Italy but are not traded on a regulated market and the beneficial owner of the proceeds from the Securities: (i) complies with certain filing requirements; and (ii) is a resident of a country which is included in the list of jurisdictions allowing exchange of information with the Italian tax authorities as provided under the relevant list which is contained in a specific Ministerial Decree and in the following periodical updating.

Inheritance and gift taxes

Law no. 286 of 24 November 2006, which has converted into law, with amendments, Law Decree no. 262 of 3 October 2006, has introduced inheritance and gift tax to be paid at the transfer of assets (such as the Securities) and rights by reason of death or gift.

As regards the inheritance and gift tax to be paid at the transfer of the Securities by reason of death or gift, the following rates apply:

- (a) transfers in favour of spouses and direct descendants or direct relatives are subject to an inheritance and gift tax of 4 per cent. on the value of the inheritance or the gift exceeding EUR 1,000,000.00 for each beneficiary;
- (b) transfers in favour of brothers and sisters are subject to an inheritance and gift tax of 6 per cent. on the value of the inheritance or the gift exceeding EUR 1000,000.00 for each beneficiary;
- (c) transfers in favour of relatives up to the fourth degree or relatives-in-law to the third degree, are subject to an inheritance and gift tax of 6 per cent. on the entire value of the inheritance or the gift;
- (d) any other transfer is subject to an inheritance and gift tax of 8 per cent. on the entire value of the inheritance or the gift; and
- (e) transfers in favour of seriously disabled persons are subject to an inheritance and gift tax at the relevant rate as described above on the value of the inheritance or the gift exceeding EUR 1,500,000.00 for each beneficiary.

The payment of the gift and inheritance taxes should be made directly by the relevant taxpayer and not by means of withholding by a tax agent.

Moreover, an anti-avoidance rule is provided by Law no. 383 of 18 October 2001 for any gift of assets (such as the Securities) which, if sold for consideration, would give rise to capital gains subject to the imposta sostitutiva provided for by Legislative Decree no. 461 of 21 November 1997 (see section 15.66 above). In particular, if the beneficiary of the gift sells the Securities for consideration within five years from the receipt thereof as a gift, the same beneficiary is required to pay the relevant imposta sostitutiva on capital gains as if the gift had never taken place.

Securities Transfer and Registration Tax

According to Article 37 of Law Decree no. 248 of 31 December 2007, as converted with

amendments into Law no. 31 of 28 February 2008, the transfer of the Securities is not subject to Italian stock exchange tax.

Contracts relating to the transfer of the Securities are subject to the following registration tax: (i) public deeds and notarised deeds are subject to a fixed registration tax at a rate of €200.00; (ii) private deeds are subject to registration tax at a rate of €200.00 only if they are voluntary registered or if the so-called "caso d'uso" or "enunciazione" occurs.

Financial Transaction Tax (Tobin tax)

Having regard to Article 1, paragraphs 491 to 499 of the Law No 228 of 24 December 2012 and to Decree of the Minister of Economy and Finance of 21 February 2013, the transfer of the Securities is not subject to the application of the tax Financial Transaction Tax.

Stamp Duty

Pursuant to Article 19(1) of Law Decree No. 201 of 6 December 2011 ("**Decree 201**"), as converted into Law no. 214 of 22 December 2011, a proportional stamp duty applies on an annual basis to the periodic reporting communications sent by financial intermediaries, carrying out their business activity within the Italian territory, to their clients for the Securities deposited therewith. The stamp duty applies at the current rate of 0.2 per cent. This stamp duty is determined on the basis of the market value or, if no market value figure is available, the nominal value or redemption amount of the Securities held. The stamp duty has a cap of euro 14.000 if the taxpayer is different from a natural person.

Wealth Tax on securities deposited abroad

Pursuant to Article 19, paragraph 18, of Decree 201, Italian (a) resident individuals, (b) non-commercial entities (e.g. trusts, foundations, etc.) and (c) non-commercial partnerships (i.e. Società Semplice) holding the Securities outside the Italian territory are required to pay a wealth tax ("Imposta sul valore delle attività finanziarie detenute all'estero – IVAFE") at the current rate of 0.2 per cent.

The IVAFE's tax base is the market value of the Securities at the end of the relevant year or at the end of the holding period, if on 31 December the Securities are no longer held. When market value figure is not available, IVAFE is calculated on the nominal value or the redemption value of such financial assets held outside the Italian territory. Taxpayers are entitled to an Italian tax credit equivalent to the amount of wealth taxes paid in the State where the financial assets are held (up to an amount equal to the IVAFE due).

Tax Monitoring

Pursuant to Law Decree no 167 of 28 June 1990, converted into Law no. 227 of 4 August 1990, as amended, Italian (a) tax resident individuals, (b) non-commercial entities (e.g. trusts, foundations, etc.) and (c) non-commercial partnerships (i.e. Società Semplice), whose, during the fiscal year, hold the Securities abroad must disclose to the Italian tax authorities filling the Italian tax return.

Tax monitoring is not due when the Securities are placed in custody or administration with an authorised Italian financial intermediary (e.g. Italian banks, fiduciary companies). In this event also IVAFE is not due, as Stamp Duty (see. Par. 15.77) becomes applicable.

OECD Common Reporting Standards

Drawing extensively on the intergovernmental approach to implementing the United States Foreign Account Tax Compliance Act, the OECD developed the Common Reporting Standard ("**CRS**") to address the issue of offshore tax evasion on a global basis. Aimed at maximising efficiency and reducing cost for financial institutions, the CRS provides a common standard for

due diligence, reporting and exchange of financial account information. Pursuant to the CRS, participating jurisdictions will obtain from reporting financial institutions, and automatically exchange with exchange partners on an annual basis, financial information with respect to all reportable accounts identified by financial institutions on the basis of common due diligence and reporting procedures. The first information exchanges began in 2017.

Italy has enacted Law No. 95 of 18 June 2015 ("**Law 95/2015**"), implementing the CRS (and the amended EU Directive on Administrative Cooperation), which has entered into force on 1 January 2016 and provides for the exchange of information from the calendar year 2016 onwards.

In the event that the Securities are held through an Italian financial institution (as meant in the Ministerial Decree of 28 December 2015 implementing Law 95/2015), the holders of the Securities may be required to provide additional information to such financial institution to enable it to satisfy its obligations under the Italian implementation of the CRS.

 - (iii) not a qualified investor as defined in Regulation (EU) 2017/1129 as it forms part of English law by virtue of the European Union (Withdrawal) Act 2018 (the “**UK Prospectus Regulation**”); and
- (b) the expression an offer includes the communication in any form and by any means of sufficient information on the terms of the offer and the Securities to be offered so as to enable an investor to decide to purchase or subscribe for the Securities.

If the relevant Final Terms in respect of any Securities specify “*Prohibition of Sales to UK Retail Investors*” as “*Not Applicable*”, any relevant person has represented that it has not made and will not make an offer of Securities which are the subject of the offering contemplated by this Prospectus as completed by the final terms in relation thereto to the public in the United Kingdom except that it may make an offer of such Securities to the public in the United Kingdom:

- (i) if the relevant final terms in relation to the Securities specify that an offer of those Securities may be made other than pursuant to Article 1(4) of the UK Prospectus Regulation in the United Kingdom (a “**Non-exempt Offer**”), following the date of publication of a prospectus in relation to such Securities which has been approved by the Financial Conduct Authority provided that

any such prospectus has subsequently been completed by final terms contemplating such Non-exempt Offer, in accordance with the UK Prospectus Regulation, in the period beginning and ending on the dates specified in such prospectus or final terms, as applicable, and the Issuer has consented in writing to its use for the purpose of that Non-exempt Offer;

- (ii) at any time to any legal entity which is a qualified investor as defined in the UK Prospectus Regulation;
- (iii) at any time to fewer than 150 natural or legal persons (other than qualified investors as defined in the UK Prospectus Regulation) subject to obtaining the prior consent of the relevant dealer or dealers nominated by the Issuer for any such offer; or
- (iv) at any time in any other circumstances falling within Article 1(4) of the UK Prospectus Regulation,

provided that no such offer of Securities referred to in (ii) to (iv) above shall require the Issuer to publish a prospectus pursuant to Article 3 of the UK Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the UK Prospectus Regulation and/or section 87G of FSMA.

For the purposes of this provision the expression “**offer of Securities to the public**” in relation to any Securities in the United Kingdom means the communication in any form and by any means of sufficient information on the terms of the offer and the Securities to be offered so as to enable an investor to decide to purchase or subscribe for the Securities.

United Kingdom - Other regulatory restrictions

Any person subsequently offering, selling or recommending the Securities has to ensure that:

- (c) it has only communicated or caused to be communicated and will only communicate or cause to be communicated an invitation or inducement to engage in investment activity (within the meaning of Section 21 of the FSMA) received by it in connection with the issue or sale of the Securities in circumstances in which Section 21(1) of the FSMA does not apply to the Issuer; and
- (d) it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to the Securities in, from or otherwise involving the United Kingdom.

United States

The Securities have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the “**Securities Act**”), and may not be offered, sold or delivered within the United States of America (the “**United States**”) to or for the account or benefit of, US Persons except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. Accordingly, the Securities are being offered and sold only (1) to “accredited investors” (as defined in Rule 501 of Regulation D under the Securities Act) in compliance with Rule 506(c) or Rule 506(b) of Regulation D under the Securities Act; (2) to ‘qualified institutional buyers’ as defined in Rule 144A under the Securities Act; and (3) in “offshore transactions” (as defined in Regulation S under the Securities Act) in reliance upon Regulation S under the Securities Act. Any person acting as a distributor of the Securities exclusively outside the United States has represented and agreed that neither it nor any persons acting on its behalf has offered, sold or delivered or will offer, sell or deliver any Securities within the United States except in accordance with Rule 903 of Regulation S under the Securities Act. Accordingly, each such distributor has

represented and agreed that neither it, its affiliates nor any persons acting on its or their behalf has engaged or will engage in any directed selling efforts with respect to the Securities offered in reliance on Regulation S. Terms used in this subparagraph have the meaning given to them by Regulation S.

Switzerland

Any person subsequently offering, selling or recommending the Securities will be required to confirm, represent and agree that:

- (a) it has only made and will only make an offer of the Securities to the public in Switzerland, other than pursuant to an exemption under Article 36(1) Swiss Financial Services Act (“**FinSA**”) or where such offer does not qualify as a public offer in Switzerland, if the applicable Final Terms in respect of any Securities published according to Article 64 FinSA specify "Swiss Non-exempt Offer" as applicable, in the offer period specified in the applicable Final Terms, and if consent has been granted to use the Prospectus and the applicable Final Terms for a public offer in Switzerland in accordance with Article 36(4) FinSA; or
- (b) it has not offered and will not offer, directly or indirectly, Securities to the public in Switzerland, and has not distributed or caused to be distributed and will not distribute or cause to be distributed to the public in Switzerland, this Prospectus, the applicable Final Terms or any other offering material relating to the Securities, other than pursuant to an exemption under Article 36(1) FinSA or where such offer or distribution does not qualify as a public offer in Switzerland.

For these purposes "public offer" refers to the respective definitions in Article 3(g) and (h) FinSA and as further detailed in the implementing Swiss Federal Financial Services Ordinance (“**FinSO**”).

If Securities qualifying as debt instruments with a “derivative character” (as such expression is understood under FinSA) are offered to private clients within the meaning of FinSA in Switzerland a key information document under Article 58 FinSA (Basisinformationsblatt für Finanzinstrumente) or Article 59(2) FinSA in respect of such Securities must be prepared and published. According to Article 58(2) FinSA, no key information document is required if Securities are acquired for private clients under an asset management agreement. For this purpose, a private client means a person who is not one (or more) of the following: (i) a professional client as defined in Article 4(3) FinSA (not having opted-in on the basis of Article 5(5) FinSA) or Article 5(1) FinSA; or (ii) an institutional client as defined in Article 4(4) FinSA; or (iii) a private client with an asset management agreement according to Article 58(2) FinSA. For these purposes “offer” refers to the interpretation of such term in Article 58 FinSA.

The Securities do not constitute a participation in a collective investment scheme in the meaning of the Swiss Federal Act on Collective Investment Schemes (“**CISA**”) and are not subject to the supervision by the FINMA, and investors will not benefit from the specific investor protection under the CISA.
